1.0 Executive Summary

On May 21, 2013, Miami-Dade County ("County") approved a Consent Decree ("CD") with the United States of America, the State of Florida Department of Environmental Protection ("FDEP"), and the State of Florida, in the case styled United States of America et. al. v. Miami-Dade County, Florida, No. 1:12-cv-24400-FAM (the "Case"). On June 6, 2013, the CD was lodged with the United States District Court for the Southern District of Florida (the "Court"). The Effective Date of the CD is December 6, 2013 (six (6) months after the date of lodging). On April 9, 2014, the Court approved the CD with the United States of America, the Florida Department of Environmental Protection, and the State of Florida.

Per the approved CD, the County submits this Annual Report ("Report") to the Environmental Protection Agency ("EPA") and the FDEP for review and comment in accordance with the requirements of Paragraph 33. On July 18, 2024, a Motion to Modify Miami-Dade's Reporting Requirements and Corresponding Order Requiring Status Reports was filed in the Case. The Court approved the non-material modification to Paragraph 33 of the CD to discontinue the Semi-Annual Reports and modified its Order Requiring Status Reports to require the United States to annually file each Status Report with the Court within 60-days from the date of receipt of County's Annual Reports.

This 2024 Annual Report includes a description of the projects and activities completed and milestones achieved during the 2024 calendar year (January 1, 2024 through December 31, 2024) and also provides projections for significant projects and activities anticipated to be completed in the next calendar year (January 1, 2025 through December 31, 2025).

During the 2024 annual reporting period, there were no transfers of funds from the Miami-Dade Water and Sewer Department (WASD) that are required to be tracked and reported pursuant to Subparagraph 19(j)(v) of the CD and the Policy Resolutions. This is in conformity with the County-approved Resolution No. R-282-14 ("Resolution"), which was enacted on March 18, 2014. The Resolution required that there be no transfer of funds from the collection of sewer rates for purposes not related to the management, operation, or maintenance of the Sewer System or its capital improvement needs.

During the 2024 calendar year, the County reported substantial completion on one (1) Appendix D Capital Improvement Project ("CIP"): 1.11 General Electric, which was completed on July 23, 2024. There was one (1) CD CIP compliance deadline due during this annual reporting period for CD 2.8: Secondary Clarifiers Plant 2, which had a compliance date of December 1, 2024. Notably, a Force Majeure Delay Notification and Time Extension Request for CD 2.7, 2.8 and 2.9 was submitted to EPA and FDEP on November 15, 2023. All other CD requirements were met.

In accordance with Section IX, Paragraph 52 of the CD, the County provided the following notices:

- CD 2.2 – Building Improvements at CDWWTP met Substantial Completion on January 17, 2020 with a 113-day delay past the EPA Compliance date of September 26, 2019 due to several Force Majeure events. A Request to Waive Potential Stipulated Penalties was submitted to EPA and FDEP on March 27, 2024.

- CD 5.5- Replacement of Switchgear and Rehabilitation of Wet Well Pump Station No. 0415 met the Construction Completion milestone on November 13, 2019 with a 72-day delay past the EPA Compliance Date of September 2, 2019 due delays experienced during the construction and commissioning phases. A Request to Waive Potential Stipulated Penalties was submitted to EPA and FDEP on June 7, 2024.

- CD 5.2- Decommissioning of Pump Station No. 0691 Replacement of Switchgear and Rehabilitation of Wet Well Pump Station No. 0415 achieved Substantial Completion on November 8, 2019 with a 285-day delay past the EPA Compliance Date of January 27, 2019 due Force Majeure delays. A Request to Waive Potential Stipulated Penalties was submitted to EPA and FDEP on June 7, 2024.

- CD 1.3- Oxygenation Trains at SDWWTP project was divided into three (3) child projects and experienced a Force Majeure delay caused by an 88-week supply chain delay of the four (4) Medium voltage (MV) 3000kVA transformers needed to complete the electrical substations that are part of the CD 1.3(3) – new electrical substations 5/6 and 15/16. A Force Majeure Notification was submitted to EPA and FDEP on August 28, 2024.

- During construction, a total of eight (8) CD projects (CD 1.6- Gravity Sludge Thickeners, CD 1.8- Dewatering Facility, CD 2.12- Gravity Sludge Thickeners Plant 1, CD 2.13- Gravity Sludge Thickeners Plant 2, CD 2.16- Dewatering Building, CD 2.18- Odor Control Systems, CD 2.19- Co-Gen Improvements, and CD 3.3- Oxygenation Trains) experienced Force Majeure Delay Claims due to a Tropical Storm Warning (Hurricane Milton) with delays ranging from four (4) days to seven (7) days. A Force Majeure Notification for CD Appendix D, CIP Projects in Construction due to Tropical Storm Warning associated with Hurricane Milton was submitted to EPA and FDEP on October 21, 2024.

- CD 1.11- General Electric at SDWWTP met Substantial Completion on July 23, 2024. A Notification of Completion for CD CIP 1.11 was submitted to EPA and FDEP on November 15, 2024.

The County continues to be fully engaged with the successful implementation and compliance of the CD, in the midst of the global supply chain challenges, economic inflation, and the lack of workforce availability as exemplified by the following efforts: (1) the County's continued development and implementation of the nine (9) new CMOM Programs (CD Section VI, Paragraph 19), all of which have been approved; (2) the County's execution of the eighty-one (81) Capital Improvement Projects included in Appendix D, which have an approximate total cost of $2.15 billion as well as the Supplemental Environmental Project ("SEP") included in Appendix E; (3) as of this reporting period, sixty-two (62) projects with a total cost of $909 million have reached Substantial Completion, fourteen (14) projects with a cost of $894 million are in the construction phase, and five (5) projects with a cost of $343 million are in the pre-construction phases of planning and procurement.

The projects, activities and milestones achieved as well as the deliverables submitted to EPA and FDEP are listed on Table 1-1 (page 9). The upcoming projects, activities, milestones, and deliverables for the upcoming calendar year are listed on Table 1-2 (page 13). Additional program and project information is included in the Work Progress Tables and Gantt charts in **Appendix A**

and **Appendix B**, respectively. Any issues, clarifications, decisions, and resolutions are included on Table 1-3 (page 14).

Table 1-3 is an "Issues Log," which includes issues that have been identified by WASD, Department of Regulatory and Economic Resources-Division of Environmental Resources Management ("RER-DERM"), EPA or FDEP with regard to the CD and any clarifications, decisions, or resolutions of these issues.

Table 1-3 Issues Log

Item	Date	Description	Resolution/Clarification/Decision
1	7/20/2017	At the July 20, 2017 EPA/FDEP/ WASD CD Program Update Meeting, WASD proposed a scope modification for CD CIP 5.9 Replacement of Plumbing and Electrical Equipment at PS 0301.	The scope modification request for CD CIP 5.9, included the construction of a new Submersible PS, which exceeded the CD description and as such will require a revision to the CD Appendix D CD CIP 5.9 schedule. After the presentation, EPA/FDEP requested a formal request for the proposed change. On July 28, 2017, the County sent EPA/FDEP an official scope modification request for CD CIP 5.9 Replacement of Plumbing and Electrical Equipment. On October 16, 2019, the County re-distributed the scope modification for CD CIP 5.9 letter as requested by EPA. This item is pending final decision.
2	2/13/2018	On February 13, 2018, the County advised EPA, FDEP and Department of Justice (DOJ) that the Public Document Repository (PDR) site would be migrated to a Microsoft cloud-based system. WASD communicated to EPA and FDEP that their Public Information Office (PIO) will continue to provide access to deliverables digitally. Upon request for hard copies, the PIO will provide in accordance with public records law.	On February 14, 2018, EPA, DOJ and FDEP did not object to the proposed migration. Once effective, this migration of PDR site will be included in the next Status Report to the Court. On August 1, 2019, the County electronically notified the EPA/FEP that the PDR was unavailable to the public for an estimated four (4) days due to a server failure. The new cloud-based PDR system was put into production on July 31, 2019 and by August 1, 2019 most of the library was restored. On October 4, 2019, the County submitted a letter detailing the timeline of the breach in PDR compliance.

Table 1-3 Issues Log			
Item	**Date**	**Description**	**Resolution/Clarification/Decision**
3	4/19/2018	At the April 2018 CD Program Update Meeting, WASD mentioned that there will be an amendment to the County Ordinance regarding the time a business must connect to a public lateral. In line with federal laws, it will be modified to reflect one (1) year. There is reference in Appendix E Supplemental Environmental Project Plan of the CD, however, indicating a different timeframe, i.e., "Pursuant to existing regulations, businesses will have ninety (90) days to abandon their septic systems and connect to the public laterals."	EPA stated there may be a need to change that language in the CD and that the matter would be discussed with the DOJ. On December 19, 2019, the County provided SEP CD Language to EPA that is under consideration by DOJ. At the December 2020 CD Program Update Meeting, EPA requested to resend information of the SEP language changed by the Ordinance. The information was resent on December 17, 2020. This item is pending final decision.
4	4/19/2018	At the January 24, 2017 monthly meeting, WASD mentioned that the Ocean Outfall Legislation Program is in the process of developing the Conceptual Memorandum. After the development of that Report the change of scope for CD CIP 2.14 CDWWTP Digesters Plant 1 will be submitted to EPA/FDEP. At the April 2018 CD Program Update Meeting, WASD reported that the complete rehabilitation of Plant 2 Clusters 1, 2, and 3 under CD CIP 2.15 will provide full digestion treatment capacity required for CDWWTP and no improvement for CD CIP 2.14 is anticipated for both the CD and Ocean Outfall Legislation Program (OOL). 2.0 Introduction

Miami-Dade County ("County") submits this Annual Report ("Report") to the Environmental Protection Agency ("EPA") and the State of Florida Department of Environmental Protection ("FDEP") for review and comment in accordance with the requirements of Paragraph 34 of the Consent Decree ("CD"). This Report includes a narrative of progress made, including key accomplishments and significant activities, under the CMOM Programs implemented or modified pursuant to the CD for the most recent Calendar Year (January 1, 2024 through December 31, 2024), and provides a trends analysis of the number, volume, average duration, and cause of Miami-Dade's SSOs for the previous Calendar Years.

On May 21, 2013, the County approved a Consent Decree (CD) with the United States of America, the State of Florida Department of Environmental Protection, and the State of Florida, in the case styled *United States of America et. al. v. Miami-Dade County, Florida*, No. 1:12-cv-24400-FAM. On June 6, 2013, the CD was lodged with the United States District Court for the Southern District of Florida ("Court"). The Effective Date of the CD is December 6, 2013 (six (6) months after the date of lodging). On April 9, 2014, the Court approved the CD with the United States of America, the State of Florida Department of Environmental Protection, and the State of Florida.

3.0 Requirements

Beginning two (2) months after the first full Calendar Year following the Effective Date of the CD, and two (2) months after each subsequent Calendar Year until termination of the CD, Miami-Dade shall submit to EPA/FDEP for review and comment an Annual Report. In addition, this annual report includes the Semi-Annual reporting requirements found in Paragraph 33 of the CD. Each Annual Report shall cover the most recent applicable Calendar Year and shall include, at a minimum:

1. "A narrative summary of progress made, including key accomplishments and significant activities, under the CMOM Programs implemented or modified pursuant to this Consent Decree for the most recent Calendar Year."

2. A description of projects and activities completed, and milestones achieved during the most recent Calendar Year pursuant to the requirements of the CD, in Gantt chart or similar format, including a description of the status of compliance or non-compliance with the requirements of this CD and, if applicable, the reasons of non-compliance;

3. A summary of significant projects and activities anticipated to be performed, and milestones anticipated to be achieved, in the most recent Calendar Year to comply with the requirements of the CD, in Gantt or similar format;

4. The amount, recipient, and the date of transfer or use during the most recent Calendar Year of funds obtained by the County from the collection of sewer rates for any purpose not related to the management, operation, or maintenance of the Sewer System or to any capital improvement needs of the Sewer System that is required to be tracked and reported pursuant to the Financial Analysis Program set forth in Subparagraph 19(j)(v) of the CD;

5. Any additional information the County determines is appropriate to demonstrate that the County is implementing the remedial actions required under the CD in an adequate and timely manner.

6. "A trends analysis of the number, volume, average duration, and cause of Miami-Dade's SSOs for the previous two (2) Calendar Years."

3.1 Reporting Schedule

Pursuant to Paragraph 33 of the CD, Semi-Annual Reports are to be submitted to the EPA and FDEP beginning one (1) month after the first two (2) Calendar Quarters following the Effective Date of the CD, and one (1) month after each subsequent two (2) Calendar Quarters until termination of the CD. Since the Effective Date of the CD is December 6, 2013, the first Semi-Annual Report was submitted on July 30, 2014, according to the above requirement. Subsequent Semi-Annual Reports are being submitted pursuant to Paragraph 33 of the CD. Six (6) years from the Effective Date of the Consent Decree and each subsequent year until termination, the United States, FDEP, and the County agree to consider whether to discontinue the Semi-Annual Reports. If the United States, FDEP and the County agree to discontinue the Semi-Annual Reports, such modification shall be considered a non-material change to this CD pursuant to Section XX

(Modification); and the information required in Subparagraphs 33(a) through (d) in the CD shall then be included in each Annual Report submitted pursuant to Paragraph 34 of the CD and shall cover the applicable Calendar Year rather than two (2) Calendar Quarters. On July 18, 2024, the Joint Motion to Modify Miami-Dade's Reporting Requirements and Corresponding Order Requiring Status Reports was approved. Therefore, the Court approved the non-material modification to Paragraph 33 of the Consent Decree to discontinue semi-annual reports and modified its Order Requiring the United States to annually file each Status Report with the Court within 60 days from the date of receipt of the County's Annual Reports.

3.2 Reporting Structure

Work progress is presented in the body of the Report in a narrative format, as well as in Tables found in **Appendix A**. The narrative includes a brief description of each CD project, as well as any activities completed or milestones that were achieved in the most recent calendar year and those anticipated to be completed in the next calendar year. In addition to these descriptions, a schedule containing each of the projects in Gantt chart format is provided in **Appendix B**

.

The WWTP OMP was submitted to EPA/FDEP on May 5, 2015, ahead of the CD compliance date of May 6, 2015. WASD received comments on the Program from EPA/FDEP on August 22, 2016. WASD corrected all comments in the Program identified by EPA/FDEP and submitted responses to the comments on November 21, 2016. On November 20, 2017, EPA/FDEP conditionally approved the WWTP OMP and requested additional information. A response to EPA/FDEP's Request for Additional Information was submitted on January 29, 2017. On October 31, 2017, RER-DERM submitted the Hauled Waste Guidance Manual to EPA/FDEP. EPA/FDEP sent comments on the Manual on November 27, 2017. A response to EPA/FDEP's comments on the Hauled Waste Guidance Manual was submitted on February 13, 2018. The WWTP OMP and the Hauled Waste Guidance Manual were approved by the EPA/FDEP on April 19, 2018 and June 4, 2018, respectively. The final WWTP OMP was submitted to EPA/FDEP on August 6, 2018. Work on this Program is ongoing, and details can be found in the work progress tables in **Appendix A**.

Specific Capital Improvement Projects ("CIPs")

Based on previous investigations, the County has identified certain rehabilitation projects that are intended to address conditions currently causing SSOs or contributing to NPDES permit violations. These specific CIPs are identified and described in the Work Plan set forth in Appendix D of the CD. The County shall complete each of these CIPs in accordance with the schedules set

forth in Appendix D.

The following CIPs were completed during the most recent Calendar Year (January 1, 2024 through December 31, 2024):

Wastewater Treatment Plant (WWTP)

- General Electric (CIP 1.11) met Substantial Completion when child project CIP 1.11 (1.1)- Substations No.9 through No.12, was completed on July 23, 2024. A Notification of Completion was submitted on November 15, 2024.

Financial Analysis Program ("FAP")

The purpose of the FAP is to effectively establish and track the sufficiency of funds for operations and maintenance, capital projects financing, and debt service coverage associated with the Sewer System, including, without limitation, the continued work pursuant to the CD.

The FAP was completed and submitted to EPA/FDEP on December 4, 2014, ahead of the CD compliance date of December 8, 2014. WASD received comments on the Program from EPA/FDEP on November 25, 2015. WASD corrected all comments in the Program identified by EPA/FDEP and submitted responses to the comments on January 29, 2016. The FAP was approved by the EPA/FDEP on October 17, 2017. Work on this Program is ongoing, and details can be found in the work progress tables in **Appendix A**.

Despite the significant efforts and progress to date, the County encountered challenges that delayed the completion of certain CIP. In addition, on December 22, 2017, the County submitted correspondence detailing the challenges being encountered during program execution and a request for non-material schedule modifications of forty-three (43) projects. The modifications of these project schedules were approved by EPA/FDEP on April 11, 2018.

As of this reporting period, sixty-two (62) projects with a total cost of $909 million have reached Substantial Completion, fourteen (14) projects with a cost of $894 million are in the construction phase, and five (5) projects with a cost of $343 million are in the pre-construction phases of planning and procurement. All CD requirements were met during the most recent calendar year, except for meeting the final deadlines for one (1) Appendix D CIP Project:

1) CD CIP 2.8- Secondary Clarifiers Plant 2 – On November 15, 2023, the County submitted to EPA and FDEP a Delay Notification and Request for Time Extension for Consent Decree Appendix D-2, Capital Improvement Projects 2.7- Secondary Clarifiers Plant 1, 2.8- Secondary Clarifiers Plant 2 and 2.9- RS Pump Station Plant 1 at the CWWTP. The EPA Compliance date for CIP 2.8 is December 1, 2024 and for CIP 2.7 and 2.9 the EPA compliance date is August 15, 2026, however this request for a time extension proposed new revised compliance dates for all three (3) projects to achieve Substantial Completion by December 31, 2027.

5.0 CMOM Programs Subject to Reporting Requirements

5.1 Continuation of Capacity, Management, Operations and Maintenance ("CMOM") Programs of the First Partial Consent Decree and Second and Final Partial Consent Decree – Paragraph 18

A narrative summary of the continuing CMOM Programs and their significant activities for the previous calendar year can be found in **Appendix A** Table A-1.

5.2 New CMOM Programs – Paragraph 19(a) through (h) and (j)

A narrative summary of the New CMOM Programs and their significant activities for the previous calendar year can be found in **Appendix A** Table A-2.

As of June 4, 2018, nine (9) new CMOM Programs were approved by the EPA/FDEP. The Force Main Criticality Assessment and Prioritization Report was prepared in accordance with Section VI, Paragraph 19(g)(ii) of the CD, and was submitted on July 17, 2018. Approval by EPA and FDEP of the Force Main Criticality Assessment and Prioritization Report is pending. The status of the CMOM Programs submitted to EPA/FDEP for review and comment are listed below in Table 1-1.

Implementation schedules are required to be included in CMOM Program deliverables. However, these programs are interrelated, and one program directly affects another. At the January 22, 2015 CD Program Monthly Progress Meeting with EPA/FDEP, WASD recommended that a consolidated implementation schedule be developed once all the CMOM Program deliverables have been submitted.

On March 19, 2015, EPA/FDEP agreed to allow the County to submit a consolidated implementation schedule for all CMOM programs once all program documents have been submitted. At the September 17, 2015 CD Program Monthly Progress Meeting with EPA/FDEP, The County requested a deadline of March 2016 for the submittal of the CMOM Programs Consolidated Schedule of Implementation Activities. EPA and FDEP agreed to the requested deadline. On March 31, 2016, the CMOM Programs Consolidated Implementation Schedule was submitted to EPA and FDEP for review and approval.

On March 28, 2017, WASD, EPA and United States Department of Justice ("DOJ") held a teleconference. At that teleconference, it was agreed that an updated CMOM consolidated schedule will be submitted 30 days after all CMOM Programs have been approved. The WWTP OMP and the Hauled Waste Guidance Manual were approved by the EPA and FDEP on April 19, 2018 and June 4, 2018, respectively.

Subsequently, the CMOM Programs Consolidated Schedule of Implementation Activities was submitted on CD compliance date of August 6, 2018. The County has progressed with program elements included within the Consolidated Schedule as reported in annual reports.

At the June 18, 2020, CD Program Update meeting between EPA, FDEP, and the County, FDEP

suggested that the County provide an updated CMOM Programs Consolidated Schedule of Implementation Activities. The County made the necessary adjustments to the schedule and submitted it for review and approval on March 19, 2021. Report on the progress is being documented in the Annual Reports as required by the CD.

5.2.1 Specific Capital Improvement Projects ("CIPs") Program – Paragraph 19(i)

The County has identified certain rehabilitation projects that are intended to address conditions currently causing SSOs or contributing to NPDES permit violations. In accordance with Paragraph 19(i), these specific capital improvements are identified and described in the Work Plan set forth in Appendix D of the CD. A narrative summary of these CIPs and their significant activities for the previous calendar year can be found in Tables A-3.1, A-3.2, and A-3.3 for the WWTPs; Tables A-4.1 and A-4.2 for the WCTLs; and Table A-5 for the Sewer Pump Station Systems included in **Appendix A**.

5.2.2 Supplemental Environmental Project Plan

This project was performed pursuant to Section VIII and Appendix E of the CD. The construction of the SEP reached Final Completion on December 26, 2018, ahead of the CD Compliance deadline of November 18, 2019. The County installed at least seven thousand six hundred sixty (7,660) linear feet of new gravity sewer mains within an industrial area that had no access to sanitary sewers and relied on septic systems.

The SEP Completion Report was submitted on the CD Compliance deadline of December 18, 2019. The EPA and FDEP review, and approval, of the SEP Completion Report is pending. Some of the properties required to connect were able to establish sewer connections. After being impacted by the Pandemic, RER-DERM has reinitiated enforcement actions for SEP property owners with overdue Notice of Required Connection (NORC). The list of properties that have received NORC letters and those that have connected to date is presented in the connection database spreadsheet included as **Appendix D**.

6.0 Additional Information

According to Paragraph 33(d), this Annual Report shall include "any additional information the County determines is appropriate to demonstrate that Miami-Dade is implementing the remedial actions required under this Consent Decree in an adequate and timely manner".

6.1 State's Ocean Outfall Legislation

In 2008, the Florida Legislature enacted a law requiring all wastewater facilities in southeast Florida utilizing ocean outfalls for disposal of treated wastewater to reduce nutrient load discharges, cease the normal use of outfalls, and expand reuse systems, all by the end of 2025. The primary approach to reduce outfall use is to install new injection wells at North and Central District WWTPs.

The EPA, FDEP, and the County acknowledged that the implementation of the Ocean Outfall Legislation ("OOL") may impact the scope of scheduling certain CIPs identified in the Consent Decree Appendix D. Pursuant to Paragraph 19(i), any modifications agreed upon in writing by the EPA, FDEP, and the County to this list of projects or schedules set forth in Appendix D shall constitute a non-material change to the Consent Decree as set forth in Section XX (Modification).

The following progress was completed during the reporting period (January 1, 2024 - December 31, 2024).

- The two (2) industrial wells at the CDWWTP were operated at full capacity. These industrial wells reduced about 34 to 36 mgd from the outfall discharge each month. In July 2024, the FDEP modified the operating permit and allowed centrate to be discharged into the industrial wells, and the diversion of nutrients has increased. All municipal injection well construction was scheduled to be completed by the end of 2024. Eight (8) municipal wells were finished, and the final well will reach Substantial Completion by June 2025. The completed wells will remain sealed until FDEP approves full-scale testing when the associated yard piping and pump station are complete.

  The remaining phases for the CDWWTP OOL Facilities are either under construction (Electrical Building 2), in final permitting (Municipal Injection Well Pump Station), or in design (Outfall and Transfer Pump Station). The Electrical Building 2 construction is approximately 27 percent complete. The Municipal Injection Well Pump Station design is approximately 92 percent complete but permitting is taking longer to finish because the County is requiring additional investigations and monitoring protocols related to contaminated soils and groundwater. The Outfall and Transfer Pump Station design is dependent on the outfall pump station remaining operational; therefore, the phasing of work is incorporated. In addition, inspection of the wet well is required to determine its structural condition. The design phase of the outfall pump station achieved 25 percent completion in 2024.

- NDWWTP's four (4) existing injection wells are continuing to be used to divert reclaimed water from the outfall (50 to 70 percent reduction of daily flow typical). The NDWWTP initial OOL projects included the installation of five (5) new Class I municipal injection wells that were finished by December 31, 2024. The NDWWTP injection wells will be sealed until ready for final testing and start-up of the new WWTP additions.

The NDWWTP wetland Environmental Resource Permit, Miami-Dade Class I, and Section 404 Individual Permit (State and Federal Dredge and Fill), were issued, including modifications allowing for additional subsurface investigations (404 Permit). The investigations of geotechnical and groundwater conditions in the wetlands were completed and results provided to the design consultants. In May 2024, the Site Preparation Project was issued a notice to proceed, and the extensive clearing and fill effort began. This site work will continue until mid-2025.

The designs for the NDWWTP Municipal Injection Well Pump Station and High-Level Disinfection (HLD) Facilities were 95% complete at the end of 2024.

- The bid packages for the construction of the HLD and Municipal Well Pump Station Facilities were still under development on December 31, 2024.
- The County's approval of the soil and groundwater management plans and permitting are pending.
- WASD developed a pre-purchase package for the disc filters, and the invitation to bid was issued in December 2024.
- The design for the electrical building for the new facilities (EDB-2 at NDWWTP) was at 75 percent complete at the end of 2024.
- The design consultant is coordinating with FPL for a new service connection.
- A pre-purchase bid package for the temporary switchgear is under development.
- An Air Construction Permit application for EDB-2 is being processed by the FDEP.

7.0 Sanitary Sewer Overflow Analysis

A trends analysis of the number, volume, average duration, and cause of the County's Sanitary Sewer Overflow (SSO) and Building Backup (BBU) events was conducted for the previous two Calendar Years and the current reporting period (January 1, 2024 through December 31, 2024). The data gathered in accordance with the CD quarterly reporting requirements since the effective date of the CD is also depicted in the figures below.

7.1 Number of Sanitary Sewer Overflows

Figure 7.1 provides a summary of the number of SSO and BBU events per year.

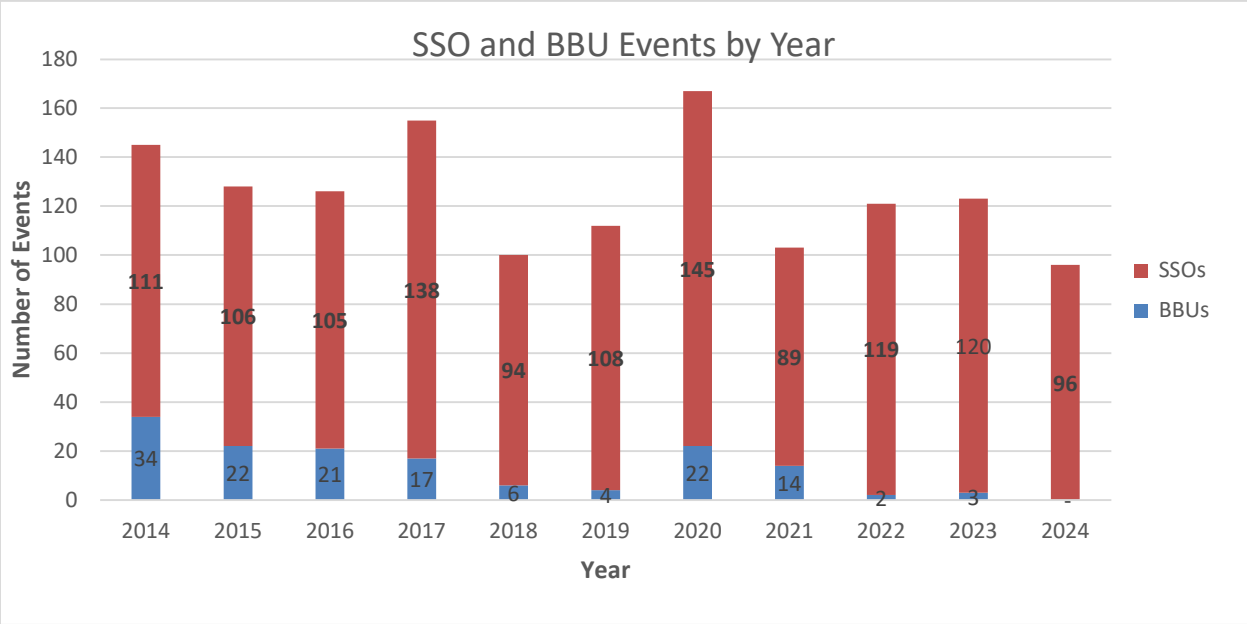

Figure 7. 1 - SSO and BBU Events by Year

The yearly number of SSO and BBU events are shown in Figure 7.1. There was a reduction in the number of SSOs during the reporting period as compared to the previous calendar year. In 2024, the County experienced 96 SSOs, 24 less than in 2023, a 20% reduction. There were 23 SSOs less than in 2022. To date, the total number of SSOs reported in 2020 remains the highest number of events during a reporting period since the inception of these annual reports. It should be noted that 2020 brought unique challenges that impacted WASD's operations and resulted in a high number of SSOs during that calendar year. During the year 2020, Miami-Dade County experienced multiple storms with rainfall amounts exceeding design return frequency storm

criteria and higher ground water table elevations leading to urban flood advisories; street flooding, associated with inability of stormwater drainage and canal systems to convey stormwater; and numerous SSOs associated with increases in inflow and infiltration into the gravity sanitary sewer collection systems operated by the County and by the other Volume Sewer Customers. A remarkably high amount of rainfall (~80 inches) was experienced over the course of 2020, significantly higher than the historical average of approximately 60 inches.

There were no BBU events recorded in 2024, whereas there were 3 BBU events in 2023 and 2 BBU events in 2022.

The following figures and graphs are intended to provide additional information including the causes and volume distribution of the SSO and BBU events.

Figure 7.2 provides the source distribution of the SSO and BBU events by year.

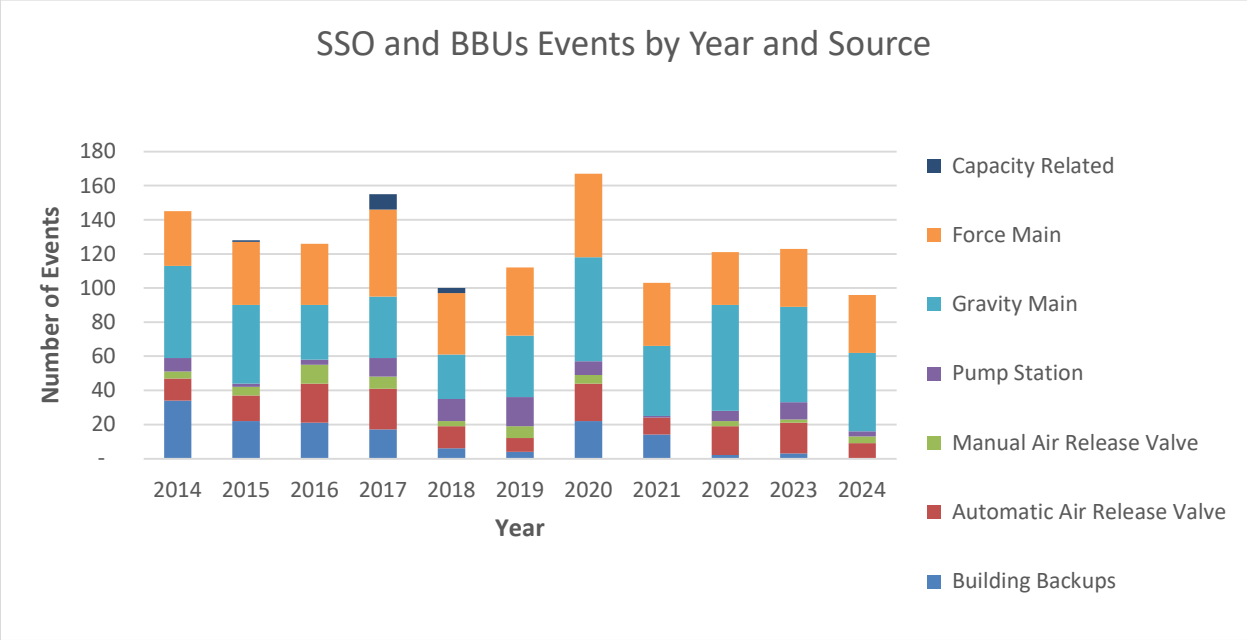

Figure 7.2 - SSO and BBUs Events by Year and Source

Figure 7.2 illustrates the distribution of SSOs and BBUs by source type on an annual basis.

There were 9 automatic air release valve (AARV) related incidents in 2024; 18 AARV SSOs in 2023 and 17 AARV SSO in 2022. Over the past two years, the number of AARV SSOs has decreased by 47%. The Wastewater Collection and Transmission Line Division have implemented an AARV replacement program to phase out a AARVs with known vulnerabilities and the downward trend is anticipated to continue.

There were 4 manual air release valve (ARV) incidents in 2024, which is a small increase from 3 and 2 SSOs in 2023 and 2022 respectively. Three of the four ARV SSOs were attributed to non-standard material failure. WASD has implemented new standards for ARV.

In 2024, there were 3 pump station (PS) related SSO incidents. In 2023, there were 10 PS related SSOs. There were 6 PS SSOS in 2022. From 2024 to 2023, PS SOOS were reduced by 70%.

Gravity main related SSOs events decreased from 56 in 2023 to 46 in 2024, an 18% decrease. In 2022, there were 62 gravity main related SSOs and represent a 26% decrease compared with the 2024 number. The County continued using Smart Covers to monitor areas with known grease blockage issues and worked with RER-DERM when grease trap maintenance issues were suspected.

The number of force main related SSOs has remained stable at 34 events in 2024 and 2023. However, the force main SSOs increased by 9% since 2022.

7.2 Volume of Sanitary Sewer Overflows

Figure 7.3 shows the total SSO volume distribution within each categorized source. A complete breakdown of all SSO volumes is available in Appendix B of this document.

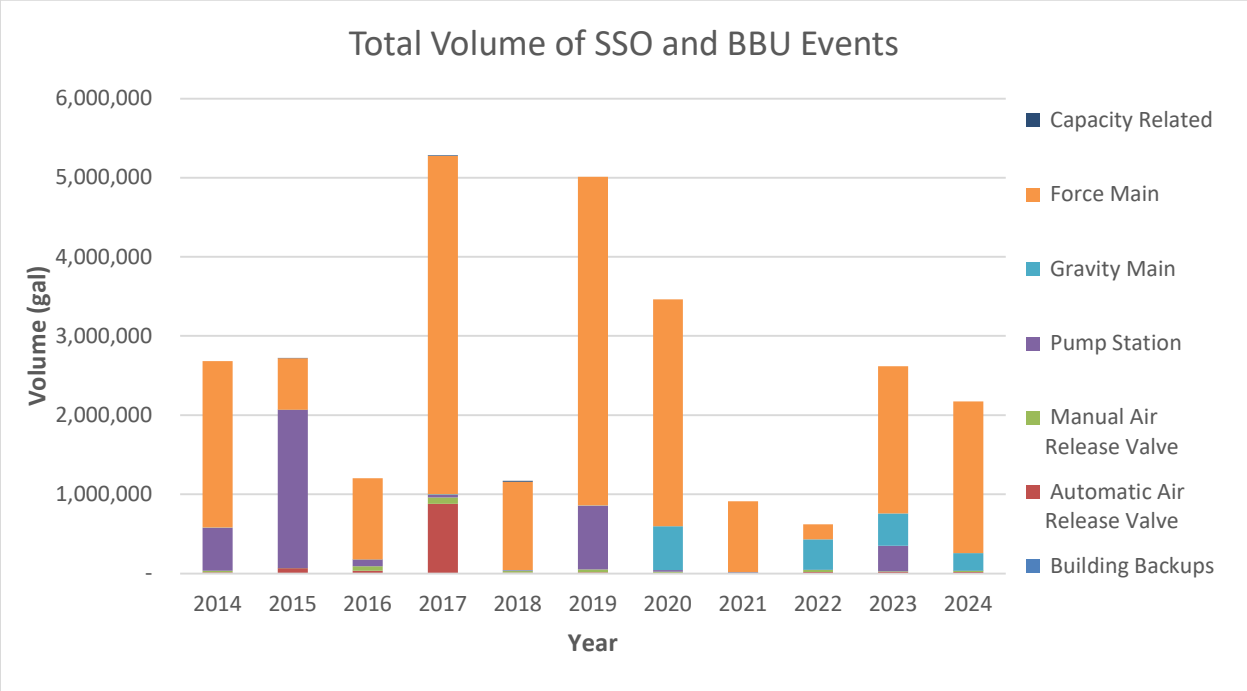

Figure 7.3 - Total Volume of SSO and BBU Events

Figure 7.3 illustrates the total SSO volume by source since 2014 and how much SSO volume was contributed by each source in the WCTS.

The cumulative annual volumes for AARV related SSOs were 17,739 gallons. in 2024, 17,787 gallons in 2023, and 15,522 gallons in 2022.

The manual air release valves (ARV) volume discharged in 2024 was 13,081 gallons. 7, 012 gallons were attributed to ARV SSOs in 2023 and 28,474 gallons in 2022.

The PS SSO volume recorded in 2024 was 1,030 gallons. The PS SSO volume decreased significantly from 325,416 gallons in 2023. The PS SSO volume decreased by 42% from 1,785

gallons in 2022 to 1,030 gallons in 2024.

In 2022,. The volume of GM SSO was 557, 115 gal. in 2020, 2,806 gal. in 2021 and 383,063 in 2022. This represents a 99% increase when compared to the 2021 volume but an overall 31% reduction when comparing to the 2020 data. The high gravity main volume that occurred in 2020 and 2022 are correlated to the occurrence and the severity of several heavy rain events. Represented the largest percentage volume discharged between 2020 and 2021 decreased from 557,115 gallons to 2,806 gallons respectively, a significant amount of the total volume discharged in 2020 was contributed to heavy rain.

The annual volumes associated with force main SSOs were 2,864,403 gal. in 2020, 893,572 gal. in 2021 and 189,867 gal. in 2022. This is overall reduction of 93% since 2020 and 79% since 2021.

Section 7.4 provides a breakdown of the volume attributed to various SSO causes and will convey how contractor break and gravity main SSO volume associated with severe rain event were significant contributing causes in 2022.

7.3 Average Duration of Sanitary Sewer Overflows

The average duration of SSO events can be viewed in Table 7.1. For BBUs, the “Time” and “Duration” parameters are seldom characteristically the same. As a result, BBUs have not been included in the calculations of average duration.

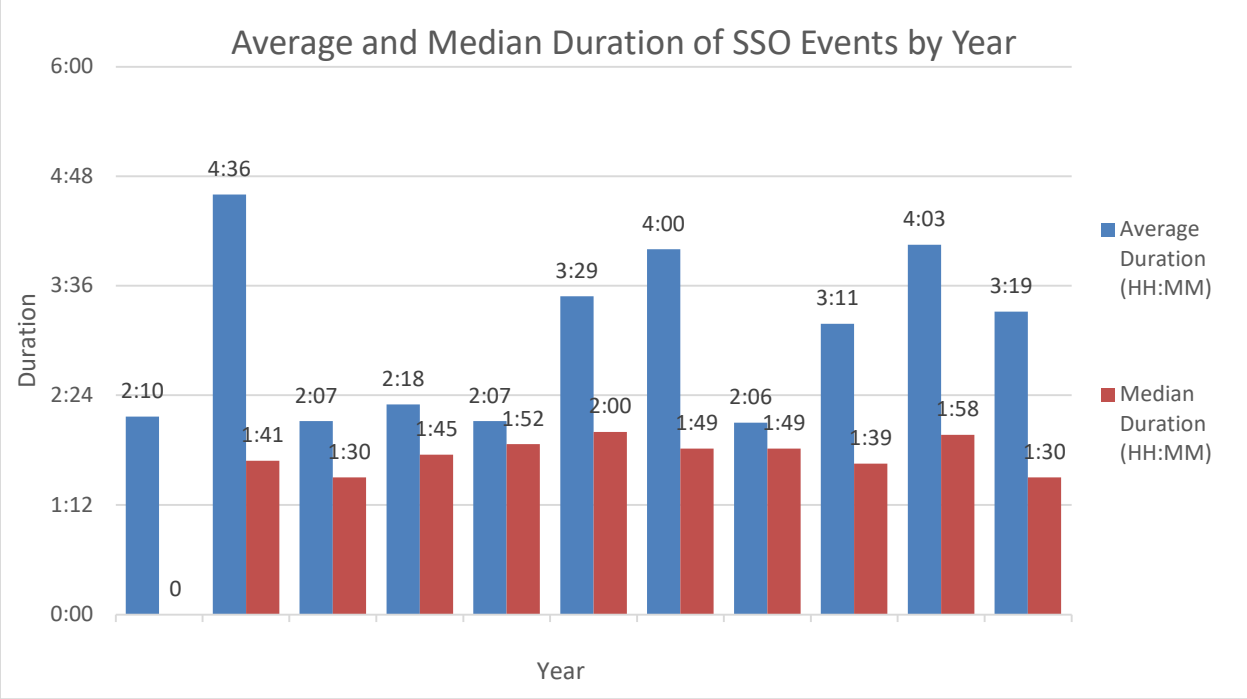

Figure 7. 4 - Average and Median Duration of SSO Events by Year

Table 7.1 contains the average (arithmetic mean) and median (the number in the middle of the set of given numbers) for the duration of all SSOs in the reporting period. The average and median

duration for all SSOs in the reporting period remained within the range of previous reporting periods.

Table 7- 1 - Average and Median Duration of SSO Events

Year	Average Duration (HH:MM)	Median Duration (HH:MM)
2014	2:10	N/A
2015	4:36	1:41
2016	2:07	1:30
2017	2:18	1:45
2018	2:07	1:52
2019	3:29	2:00
2020	4:00	1:49
2021	2:06	1:49
2022	3:11	1:39
2023	4:03	1:58
2024	3:19	1:30

7.4 Cause of Sanitary Sewer Overflows

A breakdown by cause of SSOs is shown in Figure 7.5. A complete breakdown of SSO causes is available in Appendix B of this document.

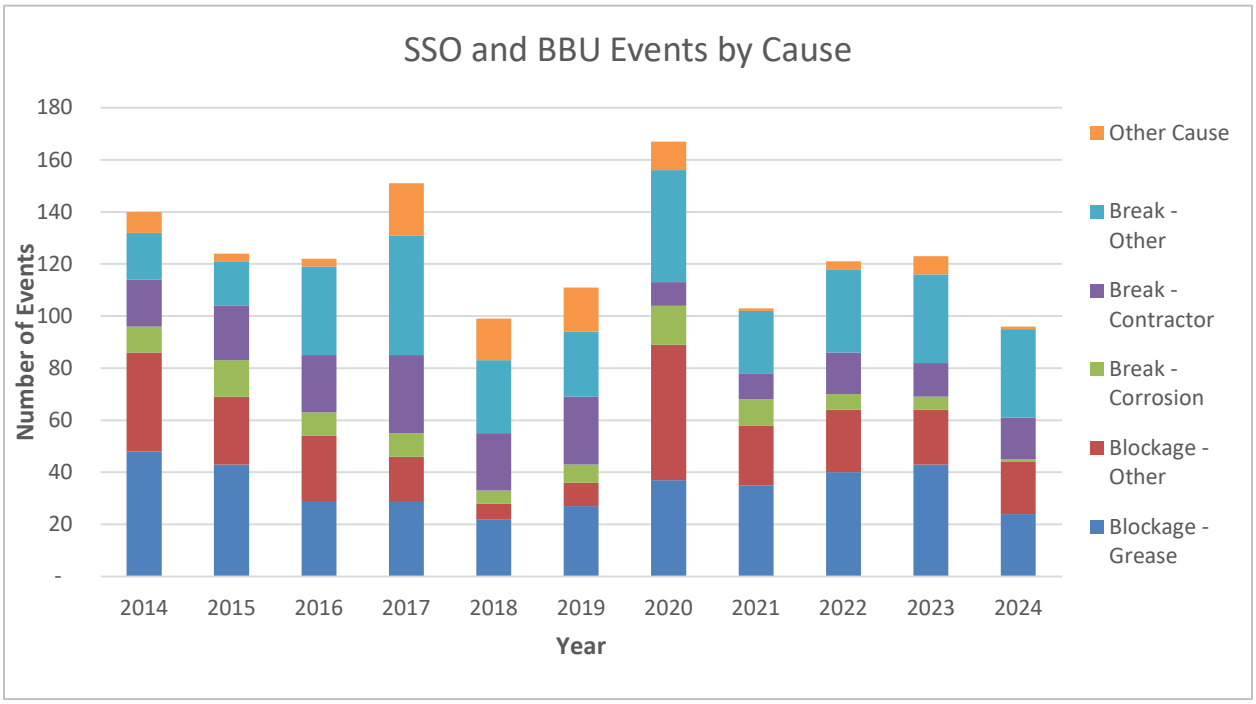

Figure 7. 5 - SSO and BBU Events by Cause

The number of SSOs caused by grease blockages in the system decreased by 44% between 2024 and 2023, with 24 and 43 events, respectively and decreased by 40% between 2024 and 2022, with 24 and 40 events, respectively.

Blockages attributed to other cause than grease include, but are not limited to wipes, rags, construction debris, rain catcher, etc. There were 24 of these events in 2022, 21 in 2023 and 20 in 2024. From 2022 to 2024, there was a 17% reduction and a slight decrease of 58% from 2023 to 2024.

Broken equipment due to corrosion continued to decrease since 2020. In fact, there were a 80% and 83% decrease since 2023 and 2022 respectively. The County continued to prioritize the replacement of assets afflicted with corrosion issues.

Contractor related breakages increased from 13 in 2023, to 16 in 2024. There were 16 contractor related SSOs in 2022.

Breakages attributed to other causes increased from 32 incidents in 2022 to 34 in 2023 and 2024. These breakages include but are not limited to malfunction, leaking force main, valve, pumps, or other equipment components, electrical issues, and bedding settlement.

The amount of SSOs classified as “Other Cause” may include PS related SSOs as FPL Service

Outage, Pump, Bypass Operation, Contractor Involved, SCADA, and other issues.

Figure 7.6 shows the total volume of all SSOs broken down by the cause of the SSO. A full breakdown of all SSO volumes is available in Appendix B of this document.

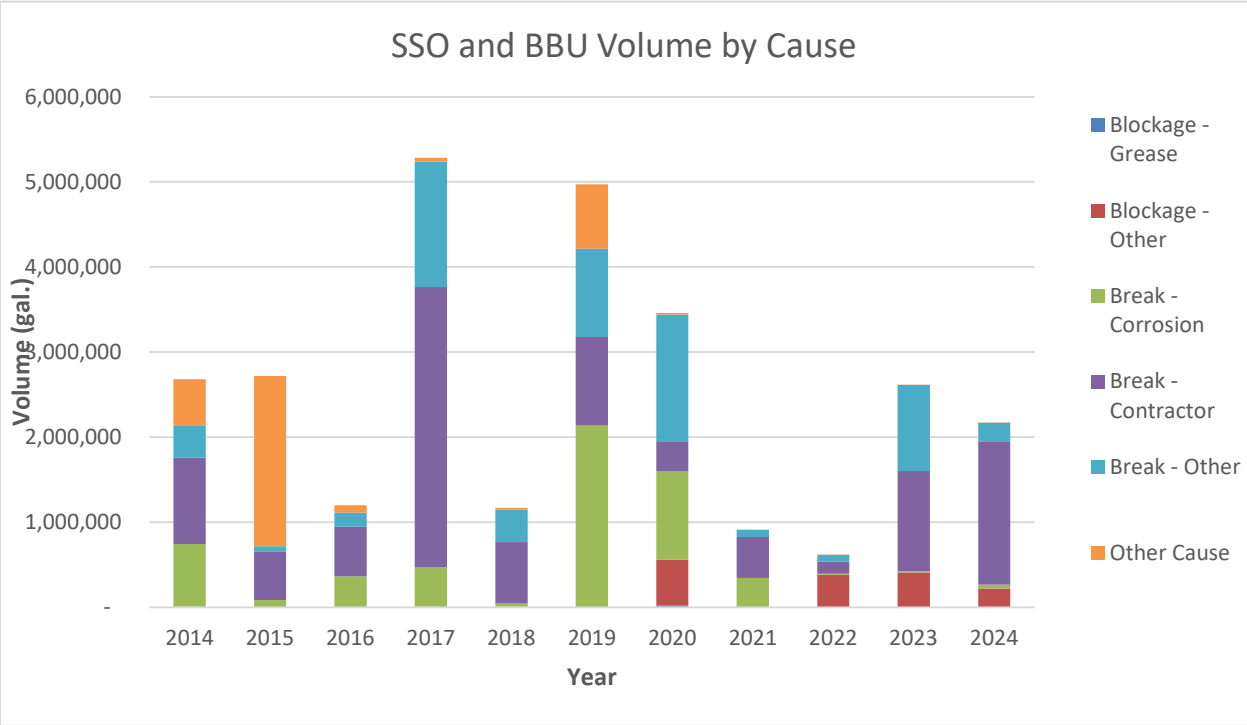

Figure 7.6 - SSO and BBU Volume by Cause

As Figure 7.6 shows, the total volume discharged from SSOs in 2024 decreased in comparison with 2023 by . In 2022, the volume reported for gallons of sewage discharged from the system was 617,856, compared to 2,616,699,in 2023 and 2,171,059 in 2024.

Grease related blockages volume reported in 2024 decreased from 5,017 gal. in 2023 to 3,495 gal, a 30% reduction. However, grease related volume increased by 41% when comparing with the 2022 volume of 2,063 gal

Spills due to blockages caused by other means decreased from 380,255 gallons in 2022 to 217.948 gal. in 2024 which is a 43% reduction over the last two years.

The volume discharged due to corrosion breakages increase from 17,201 gal in 2023 to 43,770 gal. in 2024. A 60% increase.

Breakages attributed to contractors also increased from 1,174,271 gal. in 2023 to 1,678,403 gal. in 2024, which represents a 30% increase.
