**RE: Consent Decree (Case: No.: 1:12-cv-24400-FAM)
Reference DOJ Case No.: 90-5-1-1-4022
Section VI – Fats, Oils and Grease (“FOG”) Control Program, Paragraphs 19(a)**

Dear Sir/Madam:

The Miami-Dade County (County) is in receipt of your request for additional information related to the June 8, 2015, submittal of the Fats, Oils and Grease (“FOG”) Control Program as required by Paragraph 19.(a) of the above referenced Consent Decree (CD). Following please find the restatement of EPA/FDEP comments and the County’s responses, clarification, and/or additional information to your questions and/or comments.

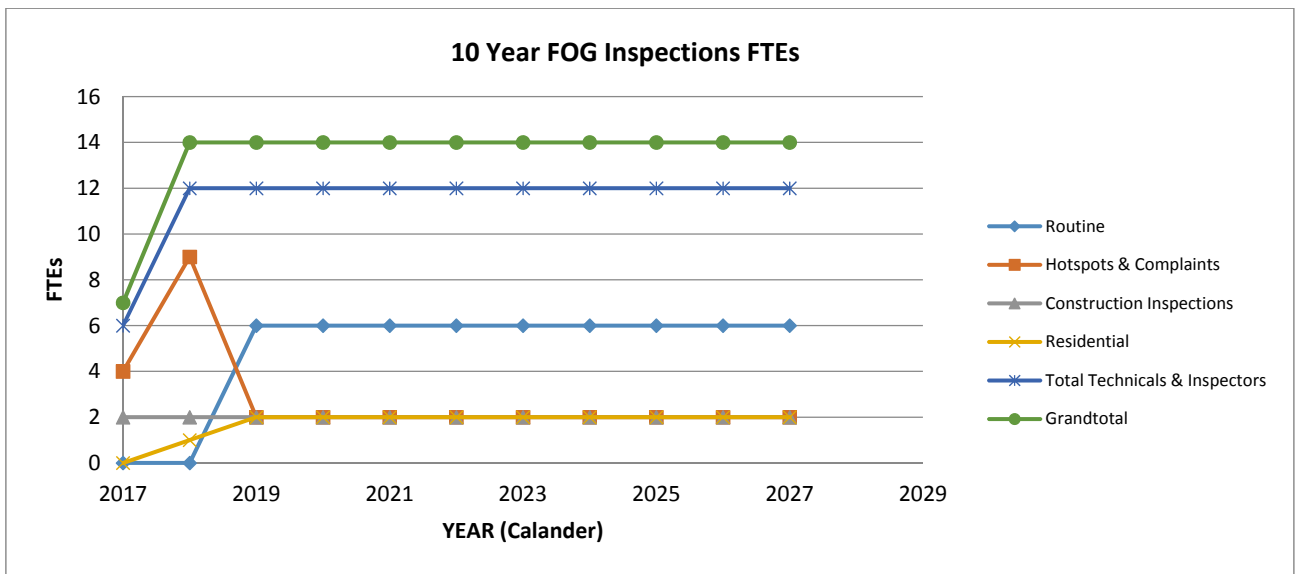

To facilitate the review process, the following terms are used to refer to the ordinance submitted on June 5, 2015 (included as **Attachment 1A**) and the latest ordinance (included as **Attachment 1B**): *Proposed Ordinance* and *Revised Ordinance*, respectively. Where a response to EPA/FDEP Comments includes a change to the *Proposed Ordinance*, line numbers are included to identify the changes. All changes to the *Proposed Ordinance* included in the *Revised Ordinance* are identified as tracked changes.

- Black underlined text is “new” text added to Chapter 24 as included in the *Proposed Ordinance*.

- Blue underlined text is “new” text added to the *Proposed Ordinance* and submitted as the *Revised Ordinance*.
- ~~Black strikethrough text~~ is text deleted from Chapter 24 as included in the *Proposed Ordinance*.
- ~~Blue strikethrough text~~ is text deleted from the *Proposed Ordinance* and submitted as the *Revised Ordinance*.

1. Paragraph 19.(a).(vi). of the CD requires that the FOG Control Program provide compliance inspection protocols, including scheduling. Currently, Miami-Dade inspects all commercial and industrial sources of FOG every three to five years. In the FOG Control Program, Miami-Dade proposes to ramp up inspections for the first two years to address FOG "hot spots" within the WCTS and the Volume Sewer Customers' sanitary sewers. After that two year effort, Miami-Dade proposes to switch some staff to routine compliance visits, upgrade verification inspections and residential inspections (apartments and residential condominiums). The graph showing staff devoted to each type inspection (Graph I, pg. 09-15) shows the total number of staff staying constant at 8 full-time equivalents (FTEs) and shows the trend described above, but contains an error because in 2018-2025, there will be 6 FTEs devoted to routine inspections and only 1 FTE devoted to 2018 upgrades and/or residential inspections. That only totals to 7 FTEs; especially concerning given the number of Food Service Establishments (FSE) that are in Miami-Dade's service area.

RESPONSE: The June 5, 2015 submittal included an arithmetic error as noted in EPA's December 22, 2016 letter. Subsequent to the June 5, 2015 submittal, RER-DERM has continued to evaluate staffing and inspection procedures. The proposed staffing for the next ten (10) years (2017 through 2027) is shown below in graphic and tabular forms. The starting point on the timeline below assumes that that the *Revised Ordinance* will be approved by EPA and FDEP in 2017.

Response to EPA and FDEP Comments on the FOG Control Program

May 1, 2017

In response to Comment No. 6 of EPA's December 22, 2016 letter and December 8, 2016 meeting discussions regarding removing upgrade requirements (Line 306 to 337 of the *Proposed Ordinance*), two inspections types have been modified: FOG inspectors have been added (construction inspections category) and no staff have been assigned to upgrades. Refer to response No. 6 for further discussion on construction inspections and below for discussion on removal of upgrade requirements.

As discussed during the December 8, 2016 meeting, RER-DERM is proposing to remove the requirement that existing facilities upgrade - by date certain – from the *Proposed Ordinance*, Lines 306 to 337. The basis for this proposed change is supported by observations and findings made by RER-DERM from June 2015 to date. Specifically, RER-DERM has found that:

- Food service establishments (FSEs) have a high turnover rate and this turnover provides the opportunity to require upgrades based on the proposed operations. This approach results in upgrades at the time other upgrades are typically being proposed.
- FSEs with no cooking can generate significant FOG. However, the source of FOG is generally limited to three (3)-compartment sinks. Requiring this type of establishment to connect all back of house fixtures will not appreciably increase FOG interception.
- As proposed, the FOG Ordinance requires upgrading an FSE that is found to be in non-compliance. That is, an FSE that is discharging excessive FOG (refer to Response No. 8 for discussion on quantity or concentration of FOG considered excessive) will be required to upgrade. FSEs that discharge excessive FOG are identified by routine inspections, liquid waste transporter reports, complaints and hot-spot assessments. It should be noted that the RER-DERM has implemented this requirement successfully. Samples of enforcement action taken in this regard are included as **Attachment 2**.
- Hot-Spot and complaint inspections identify areas with excessive FOG discharges.

Based on the above, establishing a date-certain for all establishments to upgrade, independent of how they are being operated or their actual impact, is not warranted. Therefore, the *Revised Ordinance* does not include this requirement.

2. Paragraph 19.(a).(viii). of the CD requires that the FOG Control Program provide establishment of a FOG disposal manifest system, including the requirement that FOG and septage not be comingled. The FOG Control Program states that Miami-Dade will give waste haulers until January 2, 2017 to cease comingling FOG and septage. During the December 8, 2016 meeting, Miami-Dade proposed to issue a FOG hauler permit by 4/1/2017 and issue the FSE permits in January 2018. Miami-Dade shall explain why this grace period has been so long.

RESPONSE: Paragraph 19.(a).(viii) of the CD required that Miami-Dade submit to EPA and FDEP for review and comment a new FOG Control Program within 18-months after the effective date of the CD, and that said new program establish a FOG disposal manifest system with the included requirement that FOG and septage not be comingled. The June 5, 2015 submittal included these requirements and proposed an effective date of January 2017 to implement the no comingling requirement.

The January 2017 start date was proposed knowing that implementing a no commingling requirement would require extensive public outreach to affected stakeholders, the most significant being the liquid waste transporters and disposal facilities. These stakeholders would need time to adjust or modify current practices and contractual obligations and requirements with their respective customers. At the December 8, 2016 meeting, RER-DERM stated that the no commingling requirement would be implemented on April 1, 2017 to coincide with the Liquid Waste Transporter Operating Permit renewal cycle (April 2017 – March 2018) and the implementation of an electronic manifest system. The new manifest system was implemented on April 1, 2015 (ahead of the June 5, 2015 submittal) and the electronic manifest system and process (eManifest) are scheduled to go live on April 1, 2017, also coinciding with the Liquid Waste Transporter Operating Permit renewal cycle (April 2017 – March 2018). The significance of aligning these requirements with the new permit cycle is that specific operating conditions can be incorporated in the new operating permits and thereby facilitate compliance and enforcement of the no commingling requirement and eManifest system.

A copy of the 2017/2018 Liquid Waste Transporter permit conditions and eManifest forms are included as **Attachment 3**.

3. Paragraph 19.(a).(xv). Of the CD requires that the FOG Control Program provide a schedule to review, evaluate and revise the FOG Control Program on at least an annual basis. Miami-Dade proposes to provide an annual update to the EPA and FDEP by June 30th of each year, starting on June 30, 2018. The EPA reminds Miami-Dade that implementation of the FOG Control Program shall be also reported in the Semi-Annual and/or Annual Reports required by Paragraphs 33 and 34 of the CD.

RESPONSE: Miami-Dade will (1) review, evaluate and revise the FOG Control Program annually as previously proposed and (2) report on the implementation of the program in accordance with Paragraph 33 and 34 of the CD.

4. In reviewing the proposed FOG Ordinance (Attachment 2 of the FOG Control Program), the following comment is made:
 - Section 24-42.6.(8)(c)(ii) (Maintenance for new FOG generators or operators) requires that "All FOG control devices and equipment shall be serviced to function properly and continuously to prevent the discharge of FOG into building sanitary drains, building sewers, utility or non-utility owned or operated sanitary sewer systems, and onsite sewage treatment and disposal systems." The underlined "and" should be an "or."

RESPONSE: As noted in Comment No. 4, Line No. 516 of the *Proposed Ordinance* was modified as follows in the *Revised Ordinance*:

"1279 systems, or and onsite sewage treatment and disposal systems. Where cleaning of"

5. During the December 8, 2016 meeting, Miami-Dade mentioned that many of its environmental ordinances are open to variances or extensions if heard by the Environmental Quality Control Board. Miami-Dade should severely limit or restrict what deadlines in the FOG Ordinance are subject to variances or extensions of time and this should be outlined in the FOG Ordinance itself.

RESPONSE: RER-DERM has revised Sections 24-8 and 24-11 of Chapter 24 to prohibit time extensions and/or variances of requirements originating from the CD.

Refer to Lines 217 – 306 of the *Revised Ordinance*.

6. The EPA and FDEP has serious concerns about Miami-Dade's Department of Regulatory and Economic Resources conducting FOG inspections after construction, but not being a part of the construction inspection process when a facility is installing a grease interceptor.

RESPONSE: RER-DERM has revised Chapter 24 to clarify that RER-DERM will perform construction inspections. This inspection will also serve as the first “routine” inspection.

Refer to Lines 825 – 837 of the *Revised Ordinance*.

7. Grease traps should be located outside the building. Also, specifically prohibit grease traps above the ground floor, Neither would be able to be cleaned effectively and the County should consider odor issues when cleaning.

RESPONSE: RER-DERM concurs that for some facilities the preferred location for a grease interceptor is immediately outside and below grade/ground to intersect the building drain. However, for many locations having a grease interceptor located outside the building is (1) impossible due to a lack of space or (2) problematic if the distance between the fixtures generating FOG and the grease interceptor is excessive. RER-DERM has observed that locating a grease interceptor outside the facility generating FOG can result in a “disconnect” between the facility and the condition of the grease interceptor (out of sight and smell – out of mind). For this reason, RER-DERM has included provisions to require new grease interceptors to be installed below ground/grade to intersect the building/grease drain and be placed as close as possible to the FOG source. Where a grease interceptor can't be located close to the FOG source, provision are included for maintenance access, monitoring and alarms.

Refer to Lines 974 – 979 of the *Revised Ordinance*.

8. Sec.24-42.6 (2): Specific limits in the pretreatment ordinance should be referenced in this grease trap ordinance, as the language is too vague. What quantity or concentration does the County believe will cause negative effects or hinder the operation of any onsite sewage treatment and disposal system, sewage collection, transmission or treatment system or cause a sanitary nuisance?

RESPONSE: Section 24-42.6(2) has been revised to include a concentration of 150 mg/L, the concentration above which the County believes “will cause negative effects or hinder the operation of an onsite sewage treatment and disposal system, sewage collection, transmission or treatment system or cause a sanitary nuisance.”

Refer to Lines 604 – 610 of the *Revised Ordinance*.

This concentration is included in Section 24-42.4(2)(d)(vi), and also proposed for the design of FOG control devices in Section 24-42.6(8) of the *Revised Ordinance*.

The *Proposed Ordinance* included the standards in Section 24-42.4(2)(a)(vi), Miami-Dade County Environmental Code (Code), as the standards for the design and operation of grease

interceptors. This section of Code includes a standard for FOG of 100 mg/L Hexane Extractable Materials (EPA Method 1664). For an example, refer to Section 24-42.6(7)(b), Lines 446 to 451 of the Proposed Ordinance.

The basis for the *Proposed Ordinance* was the FOG Study completed prior to June 5, 2015. However, the Department continued to research and investigate FOG Control, resulting in further refinement of the FOG Control Program. One such area of refinement is the FOG effluent limit. While a 100 mg/L standard should apply to significant industrial users, it may not be the most appropriate standard for facilities required to operate under Section 24-42.6: restaurants, cafeterias, day cares, etc. Facilities operating under Section 24-42.6 have the following characteristics:

- Wastewater flow is less than 25,000 gallons average annual daily flow,
- Are NOT subject to Categorical Pretreatment Standards,
- FOG is the pollutant of concern, and
- Are required to obtain an annual Grease Discharge Operating (GDO) permit.

For facilities required to obtain a GDO permit, additional analysis was performed to better define the appropriate effluent limit/standard. This analysis involved reviewing existing standards in Florida and further evaluating mechanisms for FOG impacts to the wastewater collection, transmission and treatment systems.

Below is a summary of several jurisdictions in Florida that have a standard for FOG.

City	Oil & Grease Standard	Code
Fort Lauderdale	400 mg/L	Sec. 28-204. - Prohibited discharges
Tampa	400 mg/L	Sec. 26-306. - Grease traps and interceptors
Orlando	250 mg/L	Sec. 30.03. - Pretreatment of Wastewater
Port St. Lucie	100 mg/L	Sec. 64.04. - Prohibitions and limitations on discharge into the wastewater system
Rivera Beach	100 mg/L	Sec. 20-144. - Prohibitions and limitations on discharge into the CRBSS
Palm Bay	100 mg/L	§ 201.21 PROHIBITED DISCHARGE STANDARDS
Mexico Beach	60 mg/L	§ 54.06 GENERAL SEWER USE REQUIREMENTS
Oldsmar	50 mg/L	Sec. 70-229. - Specific pollutant limitations

With regards to evaluating mechanisms for FOG impacts, FOG in the collection and transmission system is known to cause blockages, pipe and pump capacity reduction, corrosion, air release valve failure, wet-well level control interference, and increases operation and maintenance cost. FOG in the wastewater treatment plant interferes with instruments (e.g., flow meters and probes), reduces treatment efficiency, causes corrosion, and increases operation and maintenance cost. With regards to biological treatment processes, FOG can impact floc formation and lead to poor settling in secondary clarifiers.

In determining the most appropriate FOG effluent limit for facilities required to obtain a GDO permit, two (2) FOG impact mechanisms were evaluated:

1. The concentration of FOG at which deposition, blockage and corrosion are negligible.
2. The concentration of FOG at which impacts to the wastewater treatment operations are negligible.

Both mechanisms are discussed below.

FOG Effluent Limit Based on Grease Interceptor Efficiency

Determining the concentration of FOG at which deposition, blockage and corrosion are negligible is not possible given the number of contributing physical, mechanical, chemical and biological variables and unknowns. Instead, a deterministic analysis of grease interceptor effectiveness can be performed to determine a range of possible effluent concentrations that can be achieved using currently available and approved grease interceptors.

Existing FOG Control Devices (e.g., grease interceptors) are tested and certified using standards developed by the Plumbing and Drainage Institute (PDI), American Society of Mechanical Engineers (ASME), or Canadian Standards Association (CSA). All standards share common criteria for certification (i.e., passing):

- 90 percent FOG retention efficiency
- Total retention (pounds, Lbs) of no less than two (2) times the flow rate (gpm); e.g., a 25 gpm unit shall retain no less than 50 Lbs FOG.

Most grease interceptors are tested to a greater retention efficiency than 90 percent. Some are tested to 96 percent or higher. The CSA has a standard testing method that incorporates effluent concentration – but no grease interceptors are currently available that have been tested accordingly.

To evaluate FOG effluent limit, the following assumptions were used:

- Testing of grease interceptors is done with an influent concentration of approximately 12,000 mg/L.
- Retention efficiency typically ranges from 90 to 96 percent.
- Single grease interceptor FOG effluent concentration can be estimated as follows:
 - $C_{EFF} = C_{IN} (1-r) = C_{IN} (R)$
 - C_{IN} = Influent concentration, mg/L
 - r = retention efficiency (90 to 96%)
 - $R = 1 - r$
- Multiple grease interceptor FOG effluent concentration can be estimated as follows:
 - If r is constant:
 - $C_{EFF} = C_{IN} (1-r)^n = C_{IN} (R)^n$
 - n = number of grease interceptors with equal reduction efficiency.
 - If r is not constant:
 - $C_{EFF} = C_{IN} (1-r_1)(1-r_2)$

Considering a single grease interceptor, the effluent concentration for r ranging between 90 and 96 percent is:

$$C_{EFF90\%} = C_{IN} (1-r) = 12,000 \text{ mg/L} (1 - 0.90) = 1,200 \text{ mg/L}$$

$$C_{EFF96\%} = C_{IN} (1-r) = 12,000 \text{ mg/L} (1 - 0.96) = 480 \text{ mg/L}$$

For two (2) grease interceptors in series, considering that retention is not constant ($r_2 = 2/3 \times r_1$):

$$C_{EFF90\%} = C_{IN} (1-r_1)(1-r_2) = 12,000 \text{ mg/L} (1 - 0.90)(1-0.60) = 480 \text{ mg/L}$$

$$C_{EFF96\%} = C_{IN} (1-r_1)(1-r_2) = 12,000 \text{ mg/L} (1 - 0.96)(1-0.64) = 172 \text{ mg/L}$$

For two (2) grease interceptors in series, considering that retention is not constant ($r_2 = 3/4 \times r_1$):

$$C_{EFF90\%} = C_{IN} (1-r_1)(1-r_2) = 12,000 \text{ mg/L} (1 - 0.90)(1-0.675) = 390 \text{ mg/L}$$

$$C_{EFF96\%} = C_{IN} (1-r_1)(1-r_2) = 12,000 \text{ mg/L} (1 - 0.96)(1-0.72) = 134 \text{ mg/L}$$

For two (2) grease interceptors in series, considering that retention is constant ($r_2 = r_1$):

$$C_{EFF90\%} = C_{IN} (1-r_1)^n = 12,000 \text{ mg/L} (1 - 0.90)^2 = 120 \text{ mg/L}$$

$$C_{EFF96\%} = C_{IN} (1-r_1)^n = 12,000 \text{ mg/L} (1 - 0.96)^2 = 19.2 \text{ mg/L}$$

Based on the above analysis, the estimated FOG effluent concentration for a single grease interceptor ranges from 1,200 mg/L to 480 mg/L. For two grease interceptors in series, the estimated FOG effluent concentration ranges from 480 mg/L to 19.2 mg/L.

Based on the above and field observations and sampling results, an appropriate FOG effluent limit for GDO facilities utilizing available grease interceptors is 150 mg/L. For many facilities, upgrading to two (2) or more interceptors in series will be required to comply with 150 mg/L.

It is important to note that third-party testing of interceptors arranged in series was not available to DERM during the preparation of the *Proposed Ordinance*. To address this, DERM engaged the National Sanitation Foundation (NSF) and one manufacturer volunteered to test units in series. Data from the series test is included as **Attachment 4**. The test results show that achieving one hundred percent (100%) retention efficiency in a laboratory setting is possible when interceptors are arranged in series. Specifically, the units tested in series are rated at 100 gallons per minute and are therefore required to achieve a minimum grease capacity of 200Lbs. The testing demonstrated that the units tested achieved a grease capacity of 1,417.54 Lbs, exceeding the required minimum grease capacity by 700 percent at 99% retention efficiency or 1,191 percent at 94%.

Furthermore, the average retention efficiency over the duration of the test for the series configuration tested was 99.3%, which is considered an exceptional level of performance. On an incremental (drop by drop) basis, drop #32 saw efficiency at >99% before a slow decline began on a drop by drop to 94% on drop #45. Based on calculation using the accumulated grease value of 1417.54 Lbs recorded at drop #32, this represents 196-202 US Gallons of FOG capacity based on a specific gravity range of 0.87 to 0.84. This compares well with the maximum allowed FOG and solids storage capacity of gravity

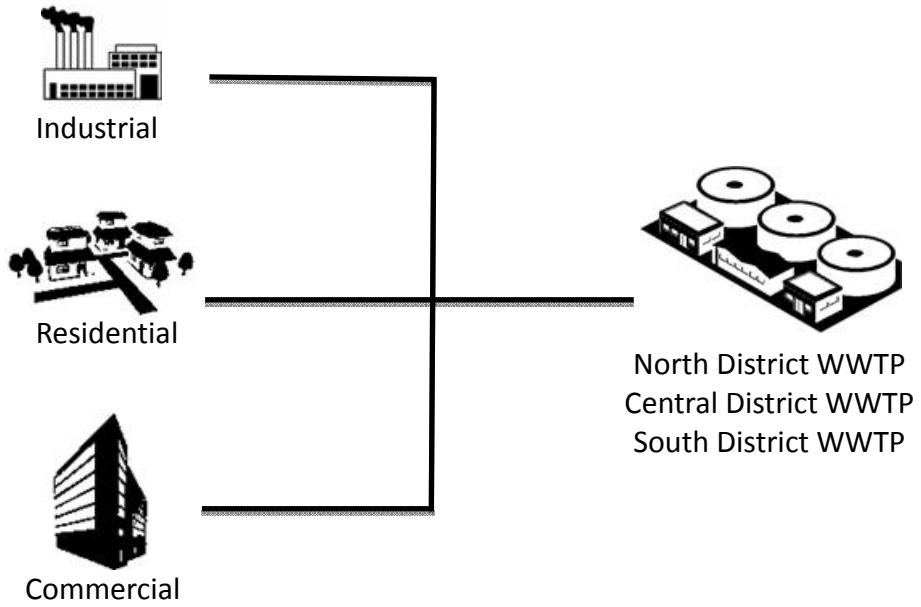

grease interceptor when applying the 25% FOG capacity limit. As such, the performance of the series configuration tested demonstrates that third-party certification of FOG control devices to 99% is achievable and included in the *Revised Ordinance*.

FOG Effluent Limit Based on Wastewater Treatment Plant

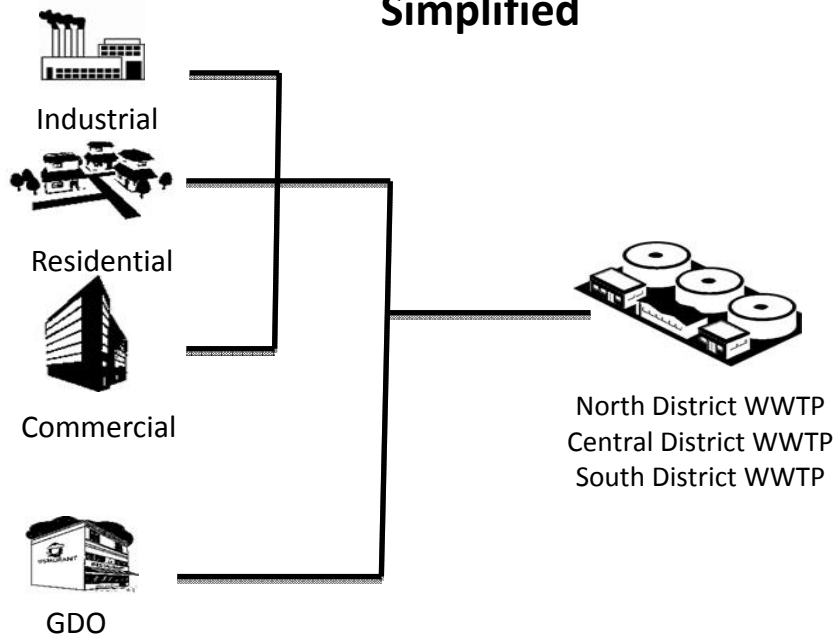

The evaluation to determine the concentration of FOG at which impacts to the wastewater treatment operations are negligible was based on Miami-Dade Water and Sewer Department Design Criteria of 34 mg/L (**Attachment 5**) and EPA's publication *The Impact of Oily Materials on Activated Sludge Systems, EPA Water Quality Office Project No. 12050 DSH, March 1971*. This publication provides that *"the influent to the biological system should contain less than 75 mg/L hexane extractable materials and preferably less than 50 mg/L."*

To evaluate FOG effluent limit based on wastewater treatment plants, two (2) mass rate loadings were estimated: Maximum Allowable Headworks Loading (MAHL) and Maximum Allowable FOG Control Device Loading (MAFCDL). The MAFCDL was evaluated in terms of MAHL. FOG contributions to the wastewater treatment plants include industrial, residential and commercial users (refer to schematic below, Treatment Users). To simplify the process of evaluating MAHL and MAFCDL, a simplified treatment users schematic was utilized (refer to schematic below, Treatment Users, Simplified). For the purpose of evaluating FOG contributions, users were grouped into two groups: GDO and non-GDO. Non-GDO uses include industrial, residential and commercial (other than GDO).

Treatment Users

Treatment Users Simplified

The simplified treatment user schematic can be expressed mathematically as follows:

$$Q_{WWTP} = Q_{NON-GDO} + Q_{GDO}$$

$$QC_{WWTP} = QC_{NON-GDO} + QC_{GDO} \quad \text{OR} \quad M_{WWTP} = M_{NON-GDO} + M_{GDO}$$

$$M_{WWTP} < MAHL$$

Where,

$Q_{NON-GDO}$ = AADF from all users other than GDOs (MGD)

Q_{GDO} = AADF from all GDOs (MGD)

Q_{WWTP} = AADF to all WWTPs (NDWWTP, CDWWTP and SDWWTP) (MGD)

$C_{NON-GDO}$ = Average FOG concentration from all users other than GDOs (mg/L)

C_{GDO} = Average FOG concentration from all GDOs (mg/L)

C_{WWTP} = Average FOG concentration to all WWTPs (mg/L)

$M_{NON-GDO}$ = Mass Rate of FOG contributed by non-GDO users (lbs_{FOG}/day).

M_{GDO} = Mass Rate of FOG contributed by GDO users (lbs_{FOG}/day) or MAFCDL

M_{WWTP} = Mass Rate of FOG to WWTPs (lbs_{FOG}/day).

MAHL = Maximum Allowable Headworks Loading (lbs_{FOG}/day).

Average FOG concentration from all GDOs was estimated from sampling results obtained by the Department from operating GDOs with grease interceptors; i.e., FOG Control Device effluent. Sampling data is summarized below and included in **Attachment 6**.

GDO FOG Effluent Summary

Number of Samples: 141
 Max FOG Concentration: 13,300 mg/L
 Minimum FOG Concentration: 1.5 mg/L
 Average FOG Concentration: 768 mg/L

GDO flow rates were taken from the Department's permitting database and are summarized below and included in **Attachment 7**.

Mark	Description	Value
A	Total Number of Active GDO Facilities:	6,456
B	Total Number of Active GDO Facilities with Flow Data:	5,643 (87%)
C	Average Annual Daily Flow Rate (GDOs with data):	12,250,021 gpd
D = C/B	Average Annual Daily Flow Rate per GDO (unit rate):	2,171 gpd
E = A X D	Total Average Annual Daily Flow Rate (all GDOs):	14,014,910 gpd

GDO FOG and flow rate estimates are used to calculate the FOG mass rate based on current conditions:

$$M_{GDO} = 8.34 Q C_{GDO} = 8.34 \times 14 \text{ MGD} \times 768 \text{ mg/L} = 89,672 \text{ lbs/day}$$

Average FOG concentrations and annual average flow rates for WWTPs were estimated from sampling results and flow meter data obtained for years 2014, 2015 and 2016. Sampling results and flow rate data are summarized below and included in **Attachment 8**.

Wastewater Treatment Plant	2014			2015			2016		
	AADF (MGD)	CFOG (mg/L)	MFOG (lb/day)	AADF (MGD)	CFOG (mg/L)	MFOG (lb/day)	AADF (MGD)	CFOG (mg/L)	MFOG (lb/day)
NDWWTP	92	28.2	21,604	89	31.8	23,673	85	19.1	13,545
CDWWTP	115	26.5	25,416	128	29.9	32,021	126	23.2	24,252
SDWWTP	98	25.1	20,433	98	22.3	18,250	99	63.9	52,968

Given that there is limited data available, a conservative assumption was made to utilize the highest concentration to represent the FOG concentration for all WWTPs: 63.9 mg/L (2016). Therefore, the FOG mass rate at the WWTPs was estimated as follows:

$$M_{WWTP} = 8.34 Q C_{WWTP}$$

$$Q_{WWTP} = (85 + 126 + 99) = 310 \text{ MGD}$$

$$C_{WWTP} = 63.9 \text{ mg/L}$$

$$M_{WWTP} = 8.34 \times 310 \text{ MGD} \times 63.9 \text{ mg/L} = 165,207 \text{ lbs/day}$$

The mass rate contributed by non-GDO users:

$$M_{NON-GDO} = M_{WWTP} - M_{GDO} = 165,207 - 89,672 = 75,535 \text{ lbs/day}$$

Utilizing the current condition estimate for $M_{NON-GDO}$ and M_{GDO} , the impact to MAHL for a range of MAFCDL can be evaluated:

$$MAHL = M_{NON-GDO} + M_{GDO} = 75,535 \text{ lbs/day} + M_{GDO}$$

$$M_{GDO} = 8.34 Q C_{GDO}$$

$$M_{GDO100} \text{ (100 mg/L), } M_{GDO} = 8.34 \times 14 \text{ MGD} \times 100 \text{ mg/L} = 11,676 \text{ lbs/day}$$

$$MAHL_{100} = 75,535 \text{ lbs/day} + 11,676 \text{ lbs/day} = 87,211 \text{ lbs/day}$$

$$C_{WWTP} = 87,211 / (8.34 \times 310) = 34 \text{ mg/L}$$

$$M_{GDO150} \text{ (150 mg/L), } M_{GDO} = 8.34 \times 14 \text{ MGD} \times 150 \text{ mg/L} = 17,514 \text{ lbs/day}$$

$$MAHL_{150} = 75,535 \text{ lbs/day} + 17,514 \text{ lbs/day} = 93,049 \text{ lbs/day}$$

$$C_{WWTP} = 93,049 / (8.34 \times 310) = 36 \text{ mg/L}$$

$$M_{\text{GDO}200} (200 \text{ mg/L}), M_{\text{GDO}} = 8.34 \times 14 \text{ MGD} \times 200 \text{ mg/L} = 23,352 \text{ lbs/day}$$

$$\text{MAHL}_{200} = 75,535 \text{ lbs/day} + 23,352 \text{ lbs/day} = 98,887 \text{ lbs/day}$$

$$C_{\text{WWTP}} = 98,887 / (8.34 \times 310) = 38 \text{ mg/L}$$

The calculations show that setting the FOG limit to 150 mg/L and utilizing conservative assumptions, the calculated MAHL is well below the recommended limit of 50 to 75 mg/L published by EPA (*The Impact of Oily Materials on Activated Sludge Systems, EPA Water Quality Office Project No. 12050 DSH, March 1971*) and within 2 mg/L of WASD's wastewater treatment plant design criteria.

Based on field observations, FCD sampling and analysis of FOG impact mechanisms, changing the numerical FOG standard for GDO facilities is warranted. The *Revised Ordinance* includes proposed changes to Section 24-42.4 to reflect a numeral standard for facilities subject to Section 24-42.6 of 150 mg/L. This standard reflects what can be accomplished by maximizing current FOG Control Device technology while being protective of wastewater treatment facilities.

9. FDEP believes FOG generators should not be served by onsite disposal systems. We suggest that existing FOG generators should be only allowed on existing onsite disposal systems for a set amount of time after the effective date of the ordinance (e.g. 10 years after the effective date). This allows the owner time to connect to public sewer or relocate the business.

RESPONSE: Chapter 64E-6, Florida Administrative Code, allows FSEs to utilize onsite sewage treatment and disposal systems (OSTDS), including grease interceptors, when public sanitary sewers are not available. Florida Statutes defines availability for public sewer connection as follows:

381.0065 Onsite sewage treatment and disposal systems; regulation

(a) "Available," as applied to a publicly owned or investor-owned sewerage system, means that the publicly owned or investor-owned sewerage system is capable of being connected to the plumbing of an establishment or residence, is not under a Department of Environmental Protection moratorium, and has adequate permitted capacity to accept the sewage to be generated by the establishment or residence; and:

- 1. For a residential subdivision lot, a single-family residence, or an establishment, any of which has an estimated sewage flow of 1,000 gallons per day or less, a gravity sewer line to maintain gravity flow from the property's drain to the sewer line, or a low pressure or vacuum sewage collection line in those areas approved for low pressure or vacuum sewage collection, exists in a public easement or right-of-way that abuts the property line of the lot, residence, or establishment.*
- 2. For an establishment with an estimated sewage flow exceeding 1,000 gallons per day, a sewer line, force main, or lift station exists in a public easement or right-of-way that abuts the property of the establishment or is within 50 feet of the property line of the establishment as accessed via existing rights-of-way or easements.*

Section 24-43.1(7) of the Code requires connection to "available" public sewer and abandonment of OSTDS.

(7) Notwithstanding any provision of this code, when an approved public gravity sanitary sewer or approved sanitary sewer force main is available and operative in a public right-of-way or easement abutting the property, the use of any liquid waste storage, disposal or treatment methods shall cease within ninety (90) days of the date the Director or the Director's designee determines that the approved public sanitary sewer is available and operative. Thereafter, all liquid wastes that are generated, handled, disposed of, discharged or stored on the property shall be discharged to an approved and operative gravity sanitary sewer or approved sanitary sewer force main except those liquid wastes, other than domestic sewage, that are permitted by this chapter to be generated, handled, treated or stored on the property. Notwithstanding the foregoing, graywater may, at the option of the property owner, be discharged to a graywater disposal system approved by the Director or the Director's designee.

Available, when used in Section 24-43.1(7) shall mean the following:

(c) Non-residential land uses that generate only domestic sewage: (including residential with mixed use):

(i) For properties complying with the sewage loading provisions of Section 24-43.1(4)(b) using the sewage flows set forth in Section 24-43.1(5) and with sewage flow less than or equal to 1,000 gallons per day (gpd) calculated using unit rates in Chapter 64E-6, Florida Administrative Code, as may be amended from time to time, a public gravity sewer shall be considered available if it is located within any portion of any public right-of-way or easement abutting the property, but not on the opposite side of a roadway divided by a raised median or on the opposite side of a roadway which has four (4) lanes or more. A public force main shall not be considered available.

(ii) For properties not complying with the sewage loading provisions of Section 24-43.1(4)(b) using the sewage flows set forth in Section 24-43.1(5) or with a sewage flow greater than 1,000 gallons per day (gpd) calculated using unit rates in Chapter 64E-6, Florida Administrative Code, as may be amended from time to time, a public gravity sewer or a public force main shall be considered available if it is located within any portion of any public right-of-way or easement abutting the property.

The Florida Administrative Code, Florida Statutes and Chapter 24 of the Code allow FSEs to operate with an OSTDS if public sewer is not available. While there is a preference for FSEs to be connected to public sewers, there is no legal basis for establishing a timeframe for connection or relocation if public sewer is not “available.”

Recognizing that overloading septic tanks and drainfields with FOG could result in groundwater contamination and/or sanitary nuisance conditions, RER-DERM included provisions for issuing operating permits (GDOs) to FSEs served by OSTDSs and located in a basic wellfield protection area. This approach provides protection of groundwater in WPAs.

10. Sec.24-42.6 (2) (b) (iii): The submittal of the corrective action plan is 30 days. However, there is no deadline to obtain the approval or complete the corrective action(s) We suggest a time frame be given. After a defined period of time, the occupational license could be withdrawn.

RESPONSE: Sections 42.6(2)(a) and 42.6(2)(b) have been revised to include timeframes for implementation of corrective action plans. Refer to Lines 612 to 629 and 635 to 643 of the *Revised Ordinance*.

11. Sec.24-42.6 (4) (a): The as-built plans should be signed and sealed by a professional engineer.

RESPONSE: Section 42.6(4)(a) was revised to remove licensed plumber. As-built plans shall be signed and sealed by a professional engineer. Refer to Lines 712 to 718 and 767 to 770 of the *Revised Ordinance*.

12. Sec.24-42.6 (4) (c): The operating permit application should be submitted with the as-built plans.

RESPONSE: FOG generators and FOG control device operators that do not have a valid GDO permit and cannot demonstrate compliance based on as-built conditions, are required to submit plans to upgrade the facility pursuant to Section 41.6(3), (4), (5), and (6). Upgrades approved will be inspected by RER-DERM and therefore as-built plans will not be required. However, if the construction inspection identifies deviations from approved plans, as-built plans will be

required and reviewed by RER-DERM. Refer to Lines 825 to 837 of the *Revised Ordinance* for the Department's inspection requirements.

13. Sec.24-42.6 (8) (c) (iii) and (v): The monthly report as required in (v) should include attachments to the report of the following:

- Scheduled and unscheduled service calls to clean gease waste drains, building sanitary drains. or building sewers.
- Repairs required resulting from food or FOG accumulation or blockages.
- FOG control device cleaning, maintenance and repair.
- Waste manifest forms pursuant to Sections 24-42.6(9) and 24-46

RESPONSE: Section 42.6(8)(c)(v) reporting requirements are intended to provide information to supplement the information provided by liquid waste transporters and disposal facilities as part of the eManifest system. The list of items in Section 42.6(9)(c)(iii) are reviewed by RER-DERM inspection staff (FOG Technicians) during every routine and unscheduled inspection. Therefore, submittal of these items is not warranted.

14. Sec.24-42.6 (8) (c) (vi): Miami Dade is requiring the property owner to perform the work. However, the property owner may not be party to the operating permit. Therefore, the property owner should be party of the operating permit. When the FOG generator is not the property owner, the operating permit should have two parties, the property owner and the FOG generator. The specific requirements of each party should be spelled out. Finally, the property owner should be responsible if the FOG generator does not perform.

RESPONSE: Section 42.6(9)(a) has been revised to require the property owner to be party to the operating permit. Refer to Lines 1280 to 1287 of the *Revised Ordinance*.

15. Sec.24-42.6 (11) (c): What is the purpose and use for requiring cost of accelerated FOG maintenance? If you plan to require some kind of reimbursement to the utility, the ordinance should include that.

RESPONSE: The purpose of requiring utilities to report cost of accelerated FOG maintenance is (1) to increase awareness on the impact of FOG on the water collection, transmission, and treatment systems and (2) document and report cost as a key performance indicator.

The above responses serve to clarify the intent of the FOG Control program submitted to EPA/FDEP on June 8, 2015, to fully comply with the requirements set forth in Paragraph 19(a) of the CD. Should you have any further questions regarding this matter, please call me at (305) 372-6789.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering such information, the information submitted is, to the best of my knowledge and belief, true, accurate

and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Sincerely,

Lee N. Hefty, RER-Assitant Director
Division of Environmental Resources Management

Attachment 1A

Proposed Ordinance Submitted June 5, 2015

1 June 2, 2015

2 **Strike-thru Text** [~~text~~] are deletions and **underlined text** >>text<< is new/proposed
3 language.

4 =====

5 **Sec. 24-5. Definitions**

6

7 >>Accelerated FOG maintenance shall mean cleaning performed by utilities to prevent sanitary
8 sewer overflows caused by FOG blockages in sewer laterals, gravity mains, pump stations, and
9 air release valves.

10 Back of the House shall mean all areas where food is stored, processed, cooked, prepared, and
11 assembled and cleanup areas. It does not include offices, dry storage or front of the house
12 areas.

13 Best Management Practices shall mean a schedule of activities, prohibitions of practices,
14 maintenance procedures, and other management practices to prevent or minimize pollution.

15 Black Grease shall mean any FOG commingled with septic wastes (bathroom wastes).

16 Brown Grease shall mean FOG waste collected in, or removed from, a FOG control device.

17 Building Sewer shall mean the part of the building drainage system that extends from the end of
18 the building drain and conveys the discharge to utility or non-utility owned or operated sanitary
19 sewer system.

20 Building Sanitary Drains shall mean the pipes intended to receive sanitary wastewater and
21 effluent from FOG control devices where FOG control devices are installed or required. FOG or
22 food waste shall not be discharged into the building sanitary drains.

23 Dishmachine shall mean equipment used to sanitize and does not actually wash the items put
24 inside.

25 Dishwasher shall mean equipment that washes and sanitizes.

26 Fats, Oil and Grease (FOG) shall mean any substance such as vegetable or animal product
27 used in, or a byproduct of, the cooking or food preparation process, which turns or may turn
28 viscous or solidifies with a change in temperature or other conditions.

29 FOG Capacity Limit shall mean the combined FOG and solids depth equal to twenty-five (25)
30 percent of the design hydraulic depth in any location of a FOG control device designed pursuant
31 to Chapter 64E-6, Florida Administrative Code, or seventy-five (75) percent of the rated FOG
32 and solids capacity established by third party certification.

33 FOG Control Device shall mean equipment designed to remove, hold and prevent the passage
34 of FOG to onsite sewage treatment and disposal systems and sanitary sewer systems. FOG
35 control devices include grease traps and grease interceptors.

36 FOG Control Device Operator shall mean a person or entity which has management control for
37 FOG control devices which serve other FOG generators.

38 FOG Generator shall mean any nonresidential facility, including, but not limited to, restaurants,
39 bakeries, hotel and cafeteria kitchens, commercial kitchens, kitchens serving hospitals, nursing
40 homes, daycares, assisted living facilities and other healthcare facilities, processing plants or
41 such other nonresidential facilities that can introduce food waste or FOG into building sanitary
42 drains, building sewers, onsite sewage treatment and disposal systems, or non-utility or utility
43 sanitary sewer system. A FOG generator also includes those facilities that produce yellow
44 grease.

45 FOG Generator Certified Staff shall mean a FOG generator employee which has attended
46 training prescribed by the Director or Director's designee, and has received certification for
47 training.

48 FOG Liquid Waste Transporter Certified Staff shall mean a FOG Liquid Waste Transporter
49 employee which has attended training prescribed by the Director or Director's designee, and
50 has received certification for training..

51 FOG Operating Permit shall mean an operating permit issued to FOG generators or FOG
52 control device operators pursuant to Sections 24-18 and 24-42.6.

53 FOG Sampling Point shall mean a reasonably accessible location for sampling the effluent of a
54 FOG control device.

55 Front of the House shall mean all areas not included in the back of the house.

56 Grease Interceptor shall mean a FOG control device connected to a building grease waste
57 drain.

58 Grease Trap shall mean a FOG control device located between one or more fixtures (e.g.,
59 three-compartment sink) and a building sanitary drain or grease waste drain. A grease trap does
60 not receive waste from a building grease waste drain and can be located above or below
61 ground.

62 Grease Waste Drains shall mean the pipes intended to receive FOG and food waste. They
63 convey the discharge to solids separators and FOG control devices.

64 Interceptor Monitoring Alarm shall mean a system and its components capable of monitoring
65 floating and settled solids in a FOG control device on a regular interval. The system shall
66 trigger a visual and audible alarm at the FOG Capacity Limit.

67 Interceptor Monitoring Device shall mean a system and its components capable of monitoring
68 floating and settled solids in a FOG control device on a regular interval, triggering a visual and
69 audible alarm at the FOG Capacity Limit, and reporting data electronically to the Department at
70 a frequency and format approved by the Director or Director's designee.

71 Residential FOG Source shall mean a residential kitchen that can introduce food waste or FOG
72 into a building drain, building sewer, onsite sewage treatment and disposal system, or non-utility
73 or utility sanitary sewer system.

74 Solids Separator shall mean a separator intended to capture solids and allow grease to pass
75 through. It is installed at the source or on the grease waste drains prior to a grease trap or
76 grease interceptor.

77 Third Party Certified shall mean a certification by an independent entity that specific equipment
78 or devices have been tested and meet or exceed standards established by the certifying entity.
79 The certifying entity shall be recognized by the Director or Director's designee and can include,
80 but is not limited to, the American Society of Mechanical Engineers (ASME), Plumbing and
81 Drainage Institute (PDI) or Canadian Standards Association (CSA).

82 Wash-Down Area shall mean an area where FOG generators wash the back of the house mats
83 or equipment.

84 Yellow Grease shall mean FOG generated as a byproduct from cooking or food preparation that
85 is not mixed with water, wastewater or other waste.<<

86

87

88 **Sec. 24-18. Operating permits**

89 (A) *Permit Required.* No person shall operate, maintain or permit, cause, allow, let or suffer
90 the operation or maintenance of a public water system, public sewerage system, a location
91 where a site rehabilitation action has been completed in accordance with the provisions set forth
92 in **Section 24-44(2)(k)(ii)** or any of the following facilities, all of which will reasonably be
93 expected to be a source of air pollution, ground pollution or water pollution, without a valid
94 operating permit issued by the Director or the Director's designee or in violation of any
95 condition, limitation or restriction which is part of an operating permit:

96

97 (1) Interim package sewage treatment plants;

98

99 * * *

100

101 (18) ~~[[Any nonresidential facility, including, but not limited to, restaurants, bakeries, hotel~~
102 ~~and cafeteria kitchens, processing plants or such other nonresidential facilities~~
103 ~~discharging into a publicly or privately owned or operated sanitary sewer collection~~
104 ~~system, if oil and grease can be introduced into a sewer by such nonresidential facility~~
105 ~~in quantities which have the potential to affect or hinder the operation of sewage~~
106 ~~collecting, transmission or treatment facilities]]. >>FOG generator discharging to a~~
107 ~~utility or non-utility owned or operated sanitary sewer collection system or onsite~~
108 ~~sewage treatment and disposal system located in the basic wellfield protection area of~~
109 ~~any utility or non-utility potable water supply wells. Refer to Section 24-42.6(8) for FOG~~

122 **Sec. 24-42.3. Certification of sanitary sewer system collection, transmission and**
123 **treatment capacity.**
124

125 (1) Notwithstanding any provision of this Code, no county or municipal officer, agent,
126 employee or board shall approve, grant or issue any building permit, certificate of occupancy,
127 certificate of use (except for changes in ownership) or municipal occupational license (except for
128 changes in ownership) for any land use served or to be served by a utility or non-utility owned or
129 operated wastewater collection and transmission system until the county or municipal officer,
130 agent, employee or board has obtained the prior written unconditional approval or prior written
131 conditional approval of the Director or the Director's designee. Notwithstanding any provision of
132 this Code, no person shall construct, utilize, operate, occupy or cause, allow, let, permit or suffer
133 to be constructed, utilized, operated or occupied any land use served or to be served by a utility
134 or non-utility owned or operated wastewater collection and transmission system until the person
135 has obtained the prior written unconditional approval or the prior written conditional approval of
136 the Director or the Director's designee.

137 * * *

138 (3) No new additional sewage flows shall be authorized for any sanitary sewer basin,
139 sewage pump station, or system pursuant to Section 24-42.3 unless and until:

140 (a) The official responsible for issuing certificates of occupancy, certificates of use or
141 equivalent municipal occupational licenses provides a monthly report that identifies
142 projects that have been issued a certificate of occupancy, certificate of use or an
143 equivalent municipal occupational license that have also received a conditional or
144 unconditional written approval, and
145

146 (b) All actions or reports required by Section 24-42.2 >>and Section 24-42.6(11)<< for the
147 basin, pump station, or system have been completed according to the schedules
148 required therein.

149 * * *
150

151

152 >>**Sec. 24-42.6. Fats, Oil and Grease Control Program**

153 The intent and purpose of this Section is to safeguard public health, safety and welfare, and
154 protect the sanitary sewer collection, transmission and treatment systems by setting minimum
155 requirements and standards for the design and operation of FOG generating facilities.

156
157 (1) No person shall dispose of any FOG or food waste, or cause, let, permit, suffer or allow
158 disposal or discharge of any FOG or food waste to be disposed or discharged into any
159 stormwater drainage system, ground or groundwater, surface water, private street, public right
160 of way, or any other location not approved by the Director or Director's designee.

161
162 (2) No person shall dispose of any FOG, or cause, let, permit, suffer or allow disposal or
163 discharge of any FOG into any onsite sewage treatment and disposal system, non-utility or
164 utility sanitary sewer system in quantities or concentrations which negatively affects or hinders
165 the operation of any onsite sewage treatment and disposal system, sewage collection,
166 transmission or treatment system, or causes a sanitary nuisance.

167
168 (a) When a FOG generator is found to have violated Section 24-42.6(2), the FOG generator
169 shall immediately cease and desist from discharging FOG in such quantities or
170 concentrations. The FOG generator shall submit a corrective action plan to the
171 Department within thirty (30) days of the date the Director or the Director's designee
172 determines that the FOG generator discharged FOG in such quantities or
173 concentrations. The corrective action plan shall include equipment, process or procedure
174 modifications proposed to prevent discharging FOG in such quantities or concentrations.
175 Until the corrective action plan is approved by the Director or Director's designee and
176 implemented in accordance with the Director or Director designee's approval, the FOG
177 generator shall take all necessary actions to prevent discharge of FOG in such quantities
178 or concentrations.

179
180 (b) When a Residential FOG Source is found to have violated Section 24-42.6(2), , the
181 Residential FOG Source shall immediately cease and desist from discharging FOG in
182 such quantities or concentrations.

183

184 (i) When a Residential FOG Source is located in an apartment building or
185 condominium, the building manager, association or other responsible party shall
186 submit a corrective action plan to the Department within thirty (30) days of the date
187 the Director or the Director's designee determines that the FOG residential source
188 has violated Section 24-42.6(2).

189
190 (ii) The corrective action plan shall include equipment, process or procedure
191 modifications proposed to correct the FOG discharge.

192
193 (iii) Until the corrective action plan is approved by the Director or Director's designee and
194 implemented in accordance with the Director or Director designee's approval, the
195 building manager, association or other responsible party shall take all necessary
196 actions to prevent violation of Section 24-42.6(2).

197
198 (3) Existing FOG generators with a current FOG operating permit issued prior to (CLERK
199 TO INSERT EFFECTIVE DATE), not proposing to increase seating capacity, dining area or
200 drive-thru capacity, or other modification, any of which will increase the discharge of FOG, shall
201 comply with the following:

202
203 (a) Where there is an existing FOG control device and sampling point, the sampling point
204 shall be located after the point of no further treatment and shall be directly accessible for
205 visual inspection and sampling.

206
207 (b) Where there is no FOG control device, plans shall be submitted to the Department for
208 the installation of a FOG control device which shall be installed in accordance with plans
209 approved by the Director or Director's designee, within ninety (90) days of the date the
210 Director or the Director's designee determines that there is no FOG control device. The
211 FOG generator shall take all necessary actions to prevent discharge of FOG to the
212 building sanitary drains and to prevent causing a sanitary nuisance until a FOG control
213 device is properly installed.

214
215 (c) Where the discharge from a FOG control device exceeds sanitary sewer discharge
216 limitation and pretreatment standards in Section 24-42.4, or causes the accumulation of
217 FOG in building sanitary drains or building sewer, the FOG control device shall be

218 repaired, upgraded or replaced within ninety (90) days of the date the Director or the
219 Director's designee determines that Section 24-42.4 effluent standards have been
220 exceeded or FOG has accumulated in building sanitary drains or building sewer.

221
222 (d) Where the Director or Director's designee determines that there is no sampling point or
223 the existing sampling point is not reasonably accessible or adequate for sampling, a
224 new reasonably accessible sampling point shall be installed within thirty (30) days of the
225 determination of the Director or Director's designee.

226
227 (e) Where a FOG control device or sampling point are required to be repaired, replaced or
228 installed, plans shall be submitted to the Department for review and approval. New FOG
229 control devices shall be designed pursuant to Section 24-42.6(7).

230
231 (f) FOG generators shall comply with their current FOG generator operating permit
232 conditions until the permit expires, thereafter FOG generators shall comply with permit
233 conditions based on Section 24-42.6(8) requirements.

234
235 (4) Existing FOG generators and FOG control device operators that do not hold a valid FOG
236 operating permit issued prior to (CLERK TO INSERT EFFECTIVE DATE), that discharge to a
237 utility or non-utility owned or operated sanitary sewer system, shall comply with the following:

238
239 (a) Submit as-built plans prepared by a licensed plumber or Florida Professional Engineer
240 within sixty (60) days from the Director or the Director designee's determination that the
241 FOG generator or FOG control device operator does not have a valid FOG operating
242 permit. As-built plans shall demonstrate, where applicable:

243
244 (i) All existing back of the house fixtures discharge to existing FOG control devices
245 and not directly to the building sanitary drains or building sewers.

246
247 (ii) Existing FOG control devices comply with Section 24-42.6(7).

248
249 (iii) A sampling point is located after the point of no further treatment and is reasonably
250 accessible for visual inspection and sampling.

251

252 (iv) Existing yellow and brown grease storage areas prevent the release of FOG to
253 ground, groundwater, surface waters or storm sewers.

254
255 (v) Existing mat and equipment wash-down areas prevent the release of FOG to
256 ground, groundwater, surface waters or storm sewers and prevent inflow of
257 stormwater.

258
259 (b) Within five (5) days of the Director or the Director designee's approval of the as-built
260 plans, a FOG operating permit application shall be submitted pursuant to Sections 24-
261 18(A)(18) and 24-42.6(8).

262
263 (c) FOG generators or FOG control device operators that cannot comply with Sections 24-
264 42.6(4)(a) shall submit plans to upgrade the facility pursuant to Section 24-42.6(5) within
265 ninety (90) days of the date the Director or the Director's designee determines that the
266 FOG generator or FOG control device operator does not have a valid FOG operating
267 permit. The facility upgrade shall be completed within ninety (90) days of the date the
268 Director or the Director's designee approves the plans.

269
270 (5) Notwithstanding any provision of this Code, no county or municipal officer, agent,
271 employee or board shall approve, grant or issue any building permit, certificate of occupancy,
272 certificate of use or municipal occupational license for a FOG generator until prior written
273 approval of the Director or the Director's designee has been obtained. Furthermore, no person
274 shall construct, utilize, operate, occupy or cause, allow, let, permit or suffer to be constructed,
275 utilized, operated or occupied any FOG generator until prior written approval of the Director or
276 the Director's designee has been obtained.

277
278 (a) For new FOG generators discharging to a utility or non-utility owned or operated sanitary
279 sewer collection system or to an onsite sewage treatment and disposal system located
280 in the basic wellfield protection area of any utility potable water supply wells, the Director
281 or the Director's designee shall not issue a written approval until the Director or the
282 Director's designee finds that:

283
284 (i) Construction plans comply with Section 24-42.6(6).

285

286 (ii) FOG control devices have been inspected and found to be in compliance with
287 Section 24-42.6(7) and with construction plans pursuant to 24-42.6(5)(a)(i).
288 Compliance with approved plans shall be determined by construction inspection.
289 Persons performing construction inspections for FOG control devices shall be
290 trained to perform such inspections. Training shall be prescribed by the Director or
291 the Director's designee.

292
293 (iii) FOG operating permit applications shall be submitted pursuant to Sections 24-18
294 (A)(18) and 24-42.6 (8).

295
296 (b) For existing FOG generators discharging to a utility or non-utility owned or operated
297 sanitary sewer system or discharging to an onsite sewage treatment and disposal
298 system located in the basic wellfield protection area of any utility potable water supply
299 wells, proposing to increase seating capacity, dining area or drive-thru capacity, or other
300 modification any of which will increase the discharge of FOG, the Director or the
301 Director's designee shall not issue a written approval until the Director or the Director's
302 designee finds that the proposed increased seating capacity, dining area or drive-thru
303 capacity, or other modification any of which will increase the discharge of FOG, complies
304 with Section 24-42.6 (5)(a).

305
306 (c) On or before January 1, 2018, FOG generators discharging to a utility or non-utility
307 owned or operated sanitary sewer system or onsite sewage treatment and disposal
308 system located in the basic wellfield protection area of any utility potable water supply
309 wells that are not subject to 24-42.6(5)(a) or (b), shall comply with the following
310 requirements:

311
312 (i) All back of the house fixtures and other fixtures, including wash-down areas, which
313 can discharge food waste or FOG, shall be connected to a FOG control device that
314 complies with Section 24-42.6(7).

315
316 (ii) A sampling point shall be located after the point of no further treatment. The
317 sampling point shall be directly accessible for visual inspection and sampling.

318

319 (iii) Yellow and brown grease storage areas and wash-down areas shall be designed
320 to prevent the release of FOG or wash-water to ground, groundwater, surface
321 waters or storm sewers.

322
323 (iv) Solids separation shall be provided prior to FOG control devices that require a flow
324 control device or are not certified to handle solids.

325
326 (vi) Sanitary wastes from bathrooms and stormwater shall not discharge to grease
327 waste drains, solids separators or FOG control devices.

328
329 (vii) Submit Certification to the Department in a form prescribed by the Director or the
330 Director's designee and prepared by a Florida Professional Engineer or master
331 plumber, attesting to compliance with Sections 24-42.6(5)(c)(i) through (vi) above.
332 Furthermore, confirmation of compliance with Section 24-42.6(7) shall be signed
333 and sealed by a Florida Professional Engineer.

334
335 (viii) Where the existing FOG control device was approved pursuant to Section 24-
336 42.6(7), certification of Section 24-42.6(5)(c)(i) shall not be required.

337
338 (6) Plans. Where required in Section 24-42.6, plans shall include the following minimum
339 information:

340
341 (a) Signature and seal of a Florida Professional Engineer.

342
343 (b) All existing and proposed back of the house and front of the house areas and drive-thru
344 lanes are shown and labeled.

345
346 (c) All existing and proposed drainage pipes, fixtures, solids separators, FOG control
347 devices and sampling points are shown and labeled. All drainage pipes that receive or
348 can receive waste from back of the house fixtures, and other fixtures that can discharge
349 food waste or FOG, shall be labeled grease waste drains or GW. Back of the house
350 fixtures include floor drains, floor sinks, trough drains, mop sinks, three-compartment
351 sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, self-
352 cleaning kitchen exhaust hoods, and any and all fixtures, appurtenances and equipment

353 that have the potential to introduce food waste or FOG into drainage pipes. Where
354 multiple users/tenant spaces connect to a common FOG control device, the plans shall
355 include all users/tenant spaces.

356

357 (d) Screens are shown and labeled in all sinks and drains.

358

359 (e) All grease waste drains are connected to a FOG control device that complies with
360 Section 24-42.6(7).

361

362 (f) FOG control device plan, profiles, sections and details are shown to scale and labeled.
363 FOG control devices shall be accessible for cleaning pursuant to Section 24-42.6(8).

364

365 (g) The point of wastewater discharge for kiosk and booths are shown and labeled. The
366 point of discharge shall be a grease waste drain or FOG control device sized for the
367 quantity of waste generated. All waste containers shall be shown on plans.

368

369 (h) FOG control device sizing calculations and assumptions, including peak flow rate,
370 temperature, FOG and solids loading rates, and frequency of FOG and solids removal
371 are shown and labeled. Where the FOG control device will serve multiple users/tenants,
372 each user/tenant shall be identified and their flows and loading rates shall also be
373 included on the plans. Loading rates shall include waste from food preparation and
374 cleaning associated with eat-in, take-out and drive-thru meals. FOG loading shall include
375 all FOG sources, including kitchen exhaust hoods. For self-cleaning kitchen exhaust
376 hoods, the manufacturer's specifications for peak discharge shall be included.

377

378 (i) FOG control device model numbers and third party certifications are shown and labeled.

379

380 (j) State Health Office's designated approval/tank numbers for grease interceptors
381 designed in accordance with 64E-6, Florida Administrative Code, are shown and
382 labeled.

383

384 (k) For concrete precast FOG control devices, the precast concrete plant name and precast
385 concrete plant certifying agency accepted by the Florida Department of Transportation
386 are shown and labeled accordingly. Site cast FOG control devices are not permitted.

- (l) Dishmachines are not required to be connected to a FOG control device where washing and rinsing are performed in a two (2) or three (3) compartment sink and the dishmachine connects to grease waste drain prior to a sampling point. Dishwashers with dedicated soiled-dish table or pre-rinse station, where all food solids and liquids are removed, are not required to be connected to a FOG control device when connected to a grease waste drain prior to a sampling point. All other dishwashers shall be connected to a FOG control device sized to account for emulsified grease.

- (m) At least one (1) sampling point located after the point of no further treatment shown and labeled. The sampling point shall be directly accessible for visual inspection and sampling.

- (n) Isometric diagrams showing and labeling all existing and proposed plumbing pipes, fixtures, solids separators, FOG control devices and sampling points. Grease waste drains shall be labeled grease waste drain or GW.

- (o) Locations and details for all stored waste, including yellow and brown grease, are shown and labeled. Storage areas shall be designed to prevent the release of FOG to ground, groundwater, surface waters or storm sewers. Storage containers shall be identified by waste type and capacity in gallons and sized to prevent overfilling. All storage containers shall have a lid that prevents rainwater inflow and that can be locked to prevent vandalism.

- (p) Locations and details for all wash-down areas are shown and labeled. All wash-down areas shall be designed to prevent the release of wash-water and FOG to ground, groundwater, surface waters, storm sewer or any other location not approved by the Director or Director's designee. Where mat and equipment wash-down is to be performed in a mop sink, the mop sink shall be sized and labeled.

- (q) Solids separation is provided prior to existing or proposed FOG control devices that require a flow control device or that are not certified to handle solids.

420 (r) Access is provided for cleaning of food solids and congealed grease in grease waste
421 drains where the horizontal run from the source of food waste and FOG is greater than
422 twenty-five (25) feet from the solids separator or FOG control device. Access points shall
423 not be greater than twenty-five (25) feet, measured center-to-center. Location of access
424 points and details for access point shall be provided in drawings. Where the horizontal
425 run from the source of food waste and FOG is greater than one hundred (100) feet,
426 plans shall include provisions for preventing clogging by congealed FOG. Where the
427 FOG control device is located at a remote location, it shall be equipped with a functional
428 Interceptor Monitoring Alarm or Device. Remote locations include a different floor or
429 horizontal distance exceeding one hundred (100) feet from the back of the house area.

430
431 (s) Sanitary wastes from bathrooms and stormwater are not discharged into grease waste
432 drains, solids separators or FOG control devices.

433
434 (7) FOG Control Device Sizing. Where required in Section 24-42.6, FOG control devices
435 shall be sized for all intended users, facilities and tenants using one of the following criteria and
436 approved by the Director or Director's designee:

437
438 (a) Calculations prepared by a Florida Professional Engineer demonstrate that the FOG
439 effluent concentration is equal to or less than the oil and grease sanitary sewer
440 discharge limitation and pretreatment standard referenced in Section 24-42.4.
441 Calculations shall include peak flow rate; temperature and temperature driven flow
442 patterns; rising and settling velocities; short-circuiting induced by inlet, baffle and outlet
443 effects and velocity distribution; FOG and solids loading rate; and frequency of FOG and
444 solids removal, or

445
446 (b) Calculations prepared by a Florida Professional Engineer that include projected peak
447 flow rate; temperature; FOG and solids loading rates; proposed frequency of FOG and
448 solids removal; and third party certification of maximum FOG containment capacity and
449 effluent concentration. The certified effluent concentration shall be equal to or less than
450 the oil and grease sanitary sewer discharge limitation and pretreatment standard
451 referenced in Section 24-42.4; or

452

453 (c) Calculations prepared by a Florida Professional Engineer that include projected peak
454 flow rate, five (5)-minute hydraulic detention time, temperature, FOG and solids loading
455 rates, proposed frequency of FOG and solids removal, and third party certification of
456 FOG removal efficiency and containment capacity; or

457
458 (d) Chapter 64E-6, Florida Administrative Code, provided that the total wet volume, minus
459 the maximum volume of waste stored between cleaning cycles, is the greater of the
460 following:

461
462 (i) Seven hundred and fifty (750) gallons; or

463
464 (ii) Volume calculated based on Chapter 64E-6; or

465
466 (iii) Volume calculated by multiplying the projected peak flow, in gallons per minute
467 (gpm), by thirty (30) minutes retention time. Peak flow shall not be less than the
468 flow rate calculated by dividing the number of drainage fixture units (DFUs) by the
469 appropriate factor below.

470

<u>Nominal pipe size in</u>	<u>DFU/gpm</u>
<u>inches</u>	
<u>3</u>	<u>0.8</u>
<u>4</u>	<u>1.7</u>
<u>5</u>	<u>2.1</u>
<u>6</u>	<u>2.3</u>
<u>8</u>	<u>2.4</u>

471

472 As an alternative to calculating the maximum volume of waste stored between
473 cleaning cycles, required in Section 24-42.6(7)(d) above, the greatest wet volume
474 calculated shall be multiplied by the following factors:

475

<u>Cleaning Cycle</u>	<u>Factor</u>
<u>Every 30 days</u>	<u>1.0</u>
<u>Every 60 days</u>	<u>1.15</u>

476

477

478

479
480

Every 90 days

DRAFT

481 (8) Operating Permits for FOG Generators and FOG Control Device Operators. No person
482 shall operate, cause, let, permit, suffer or allow the operation of a FOG generating facility or
483 FOG control devices serving FOG generators without a valid FOG operating permit issued by
484 the Director or the Director's designee or in violation of any condition, limitation or restriction
485 which is part of a FOG operating permit. FOG operating permits are valid for up to one year,
486 expire December 31 of each year, and shall be renewed annually by January 1 of each calendar
487 year.

488

489 (a) Applications for new FOG generators and new FOG control device operators and
490 renewals of same shall be in a form prescribed by the Director or Director's designee.
491 When the FOG operating permit applicant is a tenant, the application shall be completed
492 and signed by the tenant(s) and property owner(s). The owner's section of the
493 application shall include a statement acknowledging that the property owner(s) is
494 responsible for the proper closure of a FOG generator pursuant to Section 24-
495 42.6(8)(c)(vi).

496

497 (b) Renewal applications shall include a certification form, which is prescribed by the
498 Director or the Director's designee. Said form shall be prepared by a Florida
499 Professional Engineer or licensed plumber, attesting that the existing FOG control
500 devices are functioning as designed and are in good working order. Where required in
501 this Section, the renewal shall also include training certificates for staff trained pursuant
502 to Section 24-42.6(8)(c)(iv).

503

504 (c) Operating permits for new FOG generators and new FOG control device operators, and
505 renewal of same, discharging to a utility or non-utility owned or operated sanitary sewer
506 system or an onsite sewage treatment and disposal system located in the basic wellfield
507 protection area of any utility potable water supply wells shall include the following:

508

509 (i) Best management practices. The Director or Director's designee shall maintain a
510 list of approved best management practices and update the list annually or as
511 required.

512

513 (ii) Maintenance. All FOG control devices and equipment shall be serviced to function
514 properly and continuously to prevent the discharge of FOG into building sanitary

515 drains, building sewers, utility or non-utility owned or operated sanitary sewer
516 systems, and onsite sewage treatment and disposal systems. Where cleaning of
517 FOG control devices is required in Section 24-42.6, cleaning shall include the
518 complete removal of the full contents of the FOG control device, including settled
519 solids, wastewater and floating materials. Side walls, baffle walls, cross-pipes, and
520 inlet and outlet pipes shall be pressure washed or scraped to remove all attached
521 materials. Decanting, skimming, or backflushing is prohibited. Emulsifiers, grease
522 cutters or other chemicals or detergents which could cause FOG to pass through
523 the system to the building sanitary drains or building sewers are prohibited and
524 shall not be used. At a minimum, the following maintenance shall be performed:

525
526 1. *Grease Waste Drains, Building Sanitary Drains and Building Sewers.* When
527 jetting, rodding or other cleaning activities are required, FOG shall not be
528 flushed, discharged, conveyed or allowed to pass through to utility or non-utility
529 owned or operated sanitary sewer systems or onsite sewage treatment and
530 disposal systems. All FOG shall be collected and transported by a liquid waste
531 transporter, permitted by the Department, to an approved disposal facility.

532
533 2. *Kitchen Exhaust Hoods.* All waste generated by manual hood cleaning shall
534 not be flushed, discharged, conveyed or allowed to pass through to utility or
535 non-utility owned or operated sanitary sewer systems or onsite sewage
536 treatment and disposal systems. All wastes shall be collected and transported
537 by a liquid waste transporter permitted by the Department to an approved
538 disposal facility. Where a hood is designed to be self-cleaning, the FOG control
539 device shall be designed for the maximum cold water and hot water flow rates.
540 Where a surfactant/detergent is used, the FOG control device shall be sized to
541 provide sufficient detention time to allow FOG waste separation so that the
542 effluent does not exceed the standards set forth in Section 24-42.4.

543
544 3. *Yellow and Brown Grease Storage Areas.* Yellow and brown grease storage
545 areas shall be maintained free of debris and storage containers shall not be
546 overfilled. Storage containers shall be visually inspected daily and emptied
547 before they reach ninety (90) percent capacity. Spills shall be contained and
548 cleaned using absorbent materials. Wet cleanup methods shall not be used.

549 Storage container lids shall be maintained to prevent rainwater inflow and
550 locked to prevent vandalism.

551
552 4. *Mat and Equipment Wash-Down Areas.* Mat and equipment wash-down areas
553 shall be maintained free of debris and wash-water shall not be released to
554 ground, groundwater, surface waters, storm sewer or any other location not
555 approved by the Director or Director's designee. Wash-down areas shall not
556 allow stormwater or rainwater to enter the building sanitary drains, building
557 sewers, utility or non-utility owned or operated sanitary sewer systems, or
558 onsite sewage treatment and disposal systems.

559
560 5. *Solids Separators.* Where installation of a solids separator is required or
561 approved pursuant to Section 24-42.6(5), solids separators shall be serviced to
562 function as designed and shall not be missing or have defective elements or
563 components that reduce its ability to separate solids. All solids separators shall
564 be visually inspected daily to prevent excessive accumulation and discharge of
565 food solids to FOG control devices, building sanitary drains, building sewers,
566 utility or non-utility owned or operated sanitary sewer systems, or onsite
567 sewage treatment and disposal systems. Solids shall be properly discarded as
568 solid waste or removed by a liquid waste transporter permitted by the
569 Department.

6. Grease Traps. Cleaning of grease traps shall be performed as follows:

a. Automatic grease traps shall be cleaned by a liquid waste transporter, permitted by the Department. Automatic grease traps shall be cleaned monthly or more frequently so that the FOG capacity limit or effluent standards in Section 24-42.4 are not exceeded. The contents of the strainer/screen and automatic storage receptacles shall be emptied by the FOG generator on a daily basis and transferred to waste containers intended and approved for such use to prevent overfilling or spills. If at any time the automatic elements or components do not function as intended and designed, the malfunctioning automatic grease trap shall be operated and reported as a manual grease trap and cleaned by a liquid waste transporter, permitted by the Department, on a daily basis until the system is repaired. In no instance shall the automatic grease trap operate as a manual grease trap for more than thirty (30) days or cause a sanitary nuisance at any time. In the event of a sanitary nuisance, such conditions shall be abated within twenty-four (24) hours pursuant to Section 24-28. The automatic grease trap shall be repaired within thirty (30) days of malfunctioning. If the automatic grease trap is not capable of repair, it shall be replaced within ninety (90) days of malfunctioning. Plans for replacement shall be reviewed and approved by the Director or Director's designee pursuant to Section 24-42.6(7).

b. Manual grease traps shall be cleaned monthly by a liquid waste transporter permitted by the Department or more frequently when necessary to avoid exceeding the FOG capacity limit or effluent standards in Section 24-42.4. The FOG generator shall remove floating materials and settled solids on a daily basis and transfer the waste to containers intended and approved for such use to prevent overfilling or spills.

Exception: A FOG generator that does not have fryers, is not required by the Florida Building Code Mechanical (latest addition) to have a Type I kitchen exhaust hood, the peak flow rate to the grease trap does not

605 exceed twenty (20) gallons per minute, and cleans the grease trap daily is
606 not required to have a liquid waste transporter clean the grease trap
607 monthly if the FOG generator does not discharge FOG or food waste in
608 quantities or concentrations which negatively affects or hinders the
609 operation of any onsite sewage treatment and disposal system, sewage
610 collection, transmission or treatment system, or causes a sanitary nuisance.

611
612

613 7. Grease Interceptors. Cleaning of grease interceptors shall be performed as
614 follows:

615

616 a. Grease interceptors shall be shall be cleaned every sixty (60) days by a
617 liquid waste transporter permitted by the Department or more frequently
618 when necessary to avoid exceeding the FOG capacity limit or effluent
619 standards in Section 24-42.4.

620

621 b. Grease interceptors equipped with a functional Interceptor Monitoring
622 Device shall be cleaned every one hundred eighty (180) days by a liquid
623 waste transporter permitted by the Department or more frequently when
624 necessary to avoid exceeding the FOG capacity limit or effluent standards
625 in Section 24-42.4.

626

627 c. Grouped grease interceptors, in parallel or series, shall all be cleaned every
628 sixty (60) days by a liquid waste transporter permitted by the Department or
629 more frequently when necessary to avoid exceeding the FOG capacity limit
630 or effluent standards in Section 24-42.4. Where functional Interceptor
631 Monitoring Devices are used, all grease interceptors shall be cleaned every
632 one hundred eighty (180) days by a liquid waste transporter permitted by
633 the Department or more frequently when necessary to avoid exceeding the
634 FOG capacity limit or effluent standards in Section 24-42.4.

635

636 (iii) Record Keeping. Each FOG generator and FOG control device operator shall
637 maintain records of maintenance and repair activities, service calls and staff
638 training. All records shall be retained onsite for a period of not less than three years

639 and made available onsite to Department staff upon request. Offsite records shall
640 not be an acceptable substitute for onsite records required herein. At a minimum,
641 each FOG generator and FOG control device operator shall maintain the following
642 records using forms prescribed by the Director or Director's designee.

643
644 1. Scheduled and unscheduled service calls to clean grease waste drains,
645 building sanitary drains, or building sewers.

646
647 2. Repairs required resulting from food or FOG accumulation or blockages.

648

649 3. Kitchen exhaust hood cleaning.

650

651 4. FOG control device cleaning, maintenance and repair.

652

653 5. Waste manifest forms pursuant to Sections 24-42.6(9) and 24-46.

654

655 6. Staff training records pursuant to Section 24-42.6(8)(c)(iv).

656

657 (iv) Training Requirements. Each FOG generator and FOG control device operators
658 shall maintain trained staff to ensure compliance with the requirements of Section
659 24-42.6(8). The content and form of training shall be prescribed by the Director or
660 Director's designee. Training shall include orientation of new employees and
661 quarterly training of existing employees. On or before January 1, 2019, each FOG
662 generator and FOG control device operator shall have one (1) trained person on
663 staff which has working knowledge of the following where applicable:

664

665 1. Kitchen exhaust hoods,

666

667 2. Solids separators.

668

669 3. FOG control devices.

670

671 4. Best management practices.

672

673 5. Yellow and brown grease storage.

674

675 6. Mat and equipment wash-down areas.

676

677 7. Record keeping and reporting.

678

679 (v) Reporting. Each FOG generator and FOG control device operator shall submit
680 monthly reports to the Department using forms prescribed by the Director or
681 Director's designee. Where made available by the Department, reporting shall be
682 completed using a secure online system or by an equivalent system developed by
683 the Department. Monthly reports shall include total volume of each waste stream
684 disposed, transported or collected, the date and the name of liquid waste
685 transporter.

686

687 (vi) Closure Requirements. No more than thirty (30) days after a FOG generator
688 closes, the property owner shall notify the Department to perform a closure
689 inspection. On or before the closure inspection, the property owner shall have all
690 yellow and brown grease containers and bins emptied, storage areas cleaned and
691 FOG control devices cleaned. Decanting, skimming, or backflushing is prohibited.
692 Emulsifiers, grease cutters or other chemicals and detergents which could cause
693 FOG to pass through the system to the drain lines are prohibited and shall not be
694 used. All waste shall be disposed at a permitted facility, using an approved liquid
695 waste transporter with manifests submitted to Department.

696

697 (d) Existing FOG generators with a current FOG operating permit, issued prior to (CLERK
698 TO INSERT EFFECTIVE DATE), proposing to increase seating capacity, dining area or
699 drive-thru capacity, or other modification, any of which will increase the discharge of
700 FOG, shall comply with Sections 24-42.6(5)(a) and 24-42.6(8)(c).

701

702 (e) FOG generators discharging to an onsite sewage treatment and disposal system located
703 in the basic wellfield protection area of any utility potable water supply wells, proposing
704 to increase seating capacity, dining area or drive-thru capacity, or other modification, any
705 of which will increase the discharge of FOG, shall comply with Sections 24-42.6(5)(a)
706 and 24-42.6(8)(c).

707
708 (f) FOG generators discharging to an onsite sewage treatment and disposal system located
709 in the basic wellfield protection area of any utility potable water supply wells, not
710 proposing to increase seating capacity, dining area or drive-thru capacity, or other
711 modification, any of which will increase the discharge of FOG, shall apply for an
712 operating permit by January 1, 2018.

713
714 (g) Any FOG operating permit approved and issued by the Department may be revoked for
715 failure to comply with permit conditions or conditions established in Section 24-42.6.
716 Cause for revoking an operating permit may include, but not be limited to, the following:

717
718 (i) Falsifying information on any record or document required by the county; or

719
720 (ii) Failure to have a FOG control device cleaned properly or in a timely manner as
721 described in Section 24-42.6(8); or

722
723 (iii) Having a FOG control device cleaned by a person not permitted by the Department
724 to perform such cleaning; or

725
726 (iv) Utilizing a liquid waste transporter not permitted by the Department; or

727
728 (v) Failure to comply with any permit condition; or

729
730 (vi) Violation of any federal, state, or local regulation governing the handling of FOG
731 wastes; or

732
733 (vii) Failure to pay invoices, fees, fines, judgments or liens owed to the county.

734
735 The revocation of an operating permit shall be in addition to any penalties assessed for
736 violation of this Chapter, or provided elsewhere in the Code of Miami-Dade County.

737
738 (9) FOG Liquid Waste Transporters. Notwithstanding any provision of this Code, no person
739 shall collect, pump, transport, or cause, let, permit, suffer or allow any FOG, yellow grease,

740 brown grease or black grease to be collected, pumped or transported without a valid operating
741 permit issued by the Department pursuant to Sections 24-18, 24-42.6(8) and 24-46. In addition
742 to the requirements enumerated in Section 24-46, FOG liquid waste transporters shall comply
743 with the following:

744
745 (a) All waste transported shall be manifested using forms prescribed by the Director or
746 Director's designee. Where made available by the Department, reporting shall be
747 completed using a secure online system or by an equivalent system developed by the
748 Department.

749
750 (b) FOG, yellow grease and brown grease shall only be stored or disposed at private or
751 public facilities approved by the Department.

752
753 (c) FOG control device cleaning shall include completely removing the full contents of the
754 FOG control device, including settled solids, wastewater and floating materials, pressure
755 washing or scraping side walls, baffle walls, cross-pipes, and inlet and outlet pipes to
756 remove all attached materials. Decanting, skimming, or backflushing is prohibited.
757 Emulsifiers, grease cutters or other chemicals and detergents which could cause FOG to
758 pass through the system to the building sanitary drains or building sewers are prohibited
759 and shall not be used.

760
761 (d) Effective January 2, 2017, liquid waste transporter staff shall be trained to ensure
762 compliance with the requirements of Section 24-42.6(8)(c). The content and form of
763 training shall be prescribed by the Director or Director's designee. At a minimum, one
764 trained staff member shall be present while grease traps or grease interceptors are
765 being cleaned. Staff performing assessments of the condition of any system or part
766 thereof (condition assessments) stipulated in Section 24-42.6(9) shall be trained in
767 accordance with this Section.

768
769 (e) Effective January 2, 2017, septage or other waste shall not be commingled with yellow
770 or brown grease.

771

772 (f) Effective January 2, 2017, where made available by the Department, waste manifesting
773 shall be completed using a secure online system or by equivalent system developed by
774 the Department.

775
776 (g) Effective January 2, 2017, liquid waste transporters shall perform FOG control device
777 condition assessments when cleaning is required pursuant to Section 24-42.6(8)(c). The
778 condition assessment shall be performed and reported using forms prescribed by the
779 Director or Director's designee, including online forms where made available by the
780 Department. At a minimum, the condition assessment shall document the following:

781
782 (i) The water level and thickness of floating FOG and settled solids prior to cleaning.

783
784 1. Where FOG control devices are installed below ground and the water level prior
785 to cleaning is below the invert of the outlet pipe, or groundwater infiltration is
786 observed during or after cleaning, the condition assessment shall document
787 leaks.

788
789 2. Where FOG control devices are installed above ground and leaks are observed,
790 the condition assessment shall document leaks.

791
792 3. All leaks shall be reported to the Department within twenty-four (24) hours of
793 being detected or observed and the FOG control device repaired within forty-
794 eight (48) hours. Until the FOG control device is repaired, the FOG control device
795 shall not receive any flow or be bypassed.

796
797 4. Should a leak cause a sanitary nuisance, the sanitary nuisance shall be
798 removed, abated or corrected within twenty-four (24) hours or such other
799 reasonable time as the Director or the Director's designee may determine.

800
801 (ii) Integrity of solids separators and FOG control devices, including the inlet and outlet
802 appurtenances; interior, bottom, top, side walls, baffle walls, and cross-pipes;
803 manhole rings, extenders and covers; sampling points and cleanouts; interceptor
804 monitoring alarms and devices; and other elements and equipment approved by the
805 Department.

1. Where a solids separator or FOG control device is observed to be malfunctioning so that solids or FOG are being discharged to the building sanitary drains or building sewers, the Department shall be notified within twenty-four (24) hours of discovery of the unpermitted discharge and the malfunctioning device shall be repaired within forty-eight (48) hours.

2. In no instance shall the unpermitted discharge be permitted to continue or result in a building sanitary drain or building sanitary drain back-up or a sanitary nuisance.

(iii) All repairs performed by the liquid waste transporter.

(iv) The condition of yellow and brown grease containers and bins.

(10) FOG Disposal Facilities. All facilities accepting, storing, transferring or treating FOG, yellow grease or brown grease shall obtain an operating permit pursuant to Section 24-18(A)(23) and comply with the following:

(a) Maintain trained staff to assure compliance with the requirements of Section 24-42.6. The content and form of training shall be prescribed by the Director or Director's designee. Training shall be completed prior to permit renewal starting January 1, 2019. At a minimum, one (1) trained staff member shall be present during maintenance and repair of the system and/or system components.

(b) Submit monthly reports to the Department using forms prescribed by the Director or Director's designee. Where made available by the Department, reporting shall be completed using a secure online system or by an equivalent system developed by the Department. Monthly reports shall include total volume of each waste stream accepted, collected, stored, treated, disposed, or transported and include waste manifests for all waste transported. Waste manifests shall track waste from the point of origin to the final disposal facility.

839 (11) Utilities. Utilities shall submit a monthly report to the Department that includes the
840 following minimum information:

841
842 (a) A list with dates and locations where accelerated FOG maintenance was performed to
843 prevent a sanitary sewer overflow. Locations shall also be identified in a geographical
844 information system (GIS) format based on the utilities atlas pursuant to Section 24-42.2.

845
846 (b) A description of accelerated FOG maintenance performed, including quantities of FOG
847 removed, recovered, collected or treated to prevent a sanitary sewer overflow. The
848 information shall be provided in text and GIS form.

849 (c) Cost of accelerated FOG maintenance, including labor, equipment and materials. Labor
850 shall include field and office staff.<<

Re: Unauthorized discharges to the sanitary sewer system, Private Sanitary Sewer Operating Permit violations and violation of Environmental Quality Control Board Order No. 99-13 at, near, or in the vicinity of Trump National Doral Miami resort, 4400 NW 87 Avenue, Doral, Miami-Dade County, Florida (DERM PSO-850, AW-174, GDO-247).

Dear Mr. Rubert:

Inspections of the above-referenced facility, conducted by Department of Regulatory and Economic Resources, Division of Environmental Resources Management's (DERM) representatives during May and July 2016, have revealed numerous environmental concerns which require your immediate attention. Miami-Dade County is under a Federal Court Order to reduce the amounts of fats, oils and grease (FOG) in our public sanitary sewer system, and any non-residential facility that handles, prepares or processes food and has the potential to discharge FOG to the sewer system is required to secure a FOG Discharge Control operating permit. This permit, which provides for County inspections of FOG control facilities and requires the routine maintenance and record-keeping for all FOG control equipment, helps to eliminate blocked wastewater flows and costly and unsanitary clogged sanitary sewer pipes in the County's sanitary sewer system.

On May 9th and 10th and July 11, 2016, DERM inspections identified eight restaurant and kitchen facilities serving the subject premises. However, a review of DERM records revealed that six of the eight kitchen and restaurant facilities do not have the required DERM FOG Discharge Control Permit. While DERM inspections documented various pretreatment devices and methods for FOG control across the premises, kitchen fixtures located in the Pritikin Longevity Center were confirmed to be bypassing the in-ground FOG pretreatment "grease tanks" and discharging directly to sewers in violation of Miami-Dade County Code. Furthermore, these DERM inspections revealed that several of the on-site FOG pretreatment devices were inaccessible for inspection and that maintenance and disposal records for many of the FOG control devices were not available as required. The inspections also documented that the FOG pretreatment in-ground grease trap utilized by three facilities (Champions Bar and Grill, BLT Prime and Ivanka Kitchen and Ballroom) was inadequately treating the wastewater from the multiple combined operations. Samples collected by DERM representatives on July 11, 2016 revealed levels of FOG in the effluent to sewers which greatly exceeded Miami-Dade County Sewer Pretreatment Standards.

The subject premises are also served by eight private sanitary sewer pump stations. Private pump stations are permitted, monitored and inspected throughout Miami-Dade County in order to help ensure the continued operation of the entire County sewer system. On July 14, 2016, DERM conducted inspections of the eight private pump stations on-site and documented numerous operating permit violations, including inoperable stations, stations containing unacceptable levels of FOG, stations which

Delivering Excellence Every Day

Trump Doral
August 24, 2016

were allowing stormwater to infiltrate the sewers and stations with unauthorized, missing and/or defective equipment. A subsequent review of DERM records revealed that one of the eight pump stations is not permitted, and that the required monthly Elapsed Time (ET) readings, which are station-specific reports collected and submitted to DERM each month, have not been submitted for all stations as required. Additionally, a *Sewer System Evaluation Survey (SSES)*, which is vital for identifying and if needed rehabilitating any deficiencies in the entire on-site private sewer system, was due to be submitted to DERM in 2012. Miami-Dade County Code requires this survey to be performed every ten years, however to date the survey has not been submitted to DERM as required.

On May 10th, 2016 DERM inspections also documented that an unpermitted lift station was located in the facility's loading dock area. According to the facility's Chief Engineer, this lift station was designed and constructed to pump stormwater from a loading dock area into an adjacent private sanitary sewer station. The inspection also documented garbage collection and compaction containers in the loading dock area, with leachate from these containers leaking into the loading dock stormwater drain. Miami-Dade County Code prohibits both the discharge of stormwater into a sewer designed to carry sanitary waste and the discharge of industrial waste into a sewer designed to carry stormwater.

Lastly, a review of DERM records reveals that an on-site golf course lawn equipment maintenance area is subject to an Environmental Quality Control Board (EQCB) Order (No. 99-13), which grants a variance from the sanitary sewer connection requirements of Chapter 24 of the Miami-Dade County Code. The variance, which allows for the non-residential use of the maintenance area while served by a septic tank system, requires compliance with multiple Board Order conditions including the requirement to submit a covenant to DERM. A review of DERM records reveals that a covenant was never submitted as required, and therefore the Board Order is deemed null and void and the Miami-Dade County Code variance afforded therein is no longer in effect.

Please be advised that the above constitutes violations of Chapter 24 of the Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-18(A)(18), of said Chapter, inasmuch as no person shall operate, maintain or permit, cause, allow, let or suffer the operation or maintenance of any nonresidential facility which can introduce oil and grease into a sewer in quantities which have the potential to affect or hinder the operation of sewage collecting, transmission or treatment facilities, without a valid operating permit issued by the Director or the Director's designee;

Section 24-29, of said Chapter, inasmuch as it shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director of the Department of Environmental Resources Management or his designee, or any conditions, limitation or restriction which is part of an operating permit;

Section 24-42.2(3), of said Chapter, inasmuch as each utility or non-utility owned or operated sanitary sewer collection system shall be evaluated in order to identify and reduce infiltration and inflow into the sanitary sewer collection system. The utility or non-utility shall implement a sewer system evaluation survey (SSES) and submit a report

Trump Doral
August 24, 2016

summarizing the findings of the SSES to DERM for review and Approval. SSES reports are due on or before each and every ten (10) year anniversary of November 12, 2002;

Section 24-42.4(2)(a)(i), of Chapter 24, inasmuch as it shall be unlawful for any person to throw, drain, run or otherwise discharge into a sewer designed to carry storm water, or to cause, permit, allow or suffer to be thrown, run, drained, allowed to seep, or otherwise discharged into such sewer domestic sewage, industrial waste, liquid waste or other waste.

Section 24-42.4(2)(b), of said Chapter, inasmuch as it shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit allow or suffer to be thrown, run, drained, allowed to seep, or otherwise discharged into such sewer any storm water.

Section 24-42.4(2)(d)(vi), of said Chapter, inasmuch as it shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit allow or suffer to be thrown, run, drained, allowed to seep, or otherwise discharged into such sewer oil and grease in excess of 100 mg/l; and

Sections 24-43.1(4), of Chapter 24, inasmuch as no person shall construct, utilize, operate, occupy, or cause, allow, let, permit or suffer to be constructed, utilized, operated or occupied, any nonresidential land use served or to be served by any source of public water and a septic tank without obtaining the prior written approval of the Director or the Director's designee.

Therefore, pursuant to the authority granted to me under Chapter 24 of the Code of Miami-Dade County, you are hereby ordered to:

1. **Within thirty (30) days** of receipt of this Notice, reinstate the variance afforded to the maintenance area in EQCB Board Order 99-13 by executing and recording the attached "COVENANT RUNNING WITH THE LAND IN FAVOR OF MIAMI-DADE COUNTY" in its entirety with the Miami-Dade County Clerk of Courts. Submit a stamped copy of the recorded Covenant to: DERM, Code Coordination and Public Hearings, 701 NW 1st Court, 4th Floor, Miami, FL 33136.

FOR STORMWATER FACILITIES

2. Upon receipt of this Notice, immediately Cease and Desist from discharging stormwater, including but not limited to the stormwater collected from the facility's loading dock and garbage collection/compaction area, into the private sanitary sewer system. Please refer to the attached "Exhibit A" for the Loading Dock location.
3. **Within sixty (60) days** of receipt of this Notice, submit to DERM for review and approval process changes for leachate control in the loading dock and garbage collection/compaction area which shall bring your facility into compliance with the provisions of this Chapter.

Trump Doral
August 24, 2016

4. **Within sixty (60) days** of receipt of this Notice, submit to DERM for review and approval formal plans for changes to the stormwater management system in the Loading Dock area which shall bring your facility into compliance with the provisions of this Chapter. The formal plans must be signed and sealed by a Professional Engineer certified in the State of Florida, and must be submitted with the appropriate review fee to: Miami-Dade County DERM West Dade Plan Review Office, at 11805 SW 26 Street, Miami, Florida.

FOR FOG FACILITIES

5. Upon receipt of this Notice, immediately implement a 30-day maintenance and disposal routine, which incorporates the removal of all accumulated waste, including FOG, wastewater and settled solids, for all FOG treatment devices on-site.
6. Upon receipt of this Notice, immediately implement and maintain a FOG Maintenance Log (attached) for each of the eight kitchen/restaurant facilities serving the premises.
7. **Within thirty (30) days** of receipt of this Notice, submit a completed "*Fat, Oil & Grease Discharge Control-Operating Permit*" application (attached) for each of the following six facilities: *Champions Bar and Grill, Palm Grill, Marketplace Café, Ivanka Kitchen & Ballroom, Trump Café* and *Donald J. Trump Ballroom and Kitchen*.
8. **Within sixty (60) days** of receipt of this Notice, provide influent and effluent inspection access points and effluent sampling points for all FOG treatment systems and devices on-site, including but not limited to the in-ground tanks (IGTs) and hydromechanical units serving the *Champions Bar and Grill*, the hydromechanical unit serving the *Marketplace Café*, the IGTs serving the *Pritikin Longevity Center* and the automatic grease recovery unit serving the *Trump Cafe*. Please refer to the attached "Exhibit A" for approximate FOG pretreatment device locations.
9. **Within ninety (90) days** of receipt of this Notice, submit to DERM formal plans identifying all FOG treatment systems and devices on the premises. The plans shall include, at a minimum, the requirements enumerated in "Exhibit B," and shall be signed and sealed by a Florida Professional Engineer and submitted to: DERM, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, FL 33136.

FOR PRIVATE SANITARY SEWER FACILITIES

10. **Within fifteen (15) days** of receipt of this Notice, replace missing and/or inoperable pumps in all pump stations, including but not limited to pump station B. Please refer to the attached "Exhibit A" for pump station locations.
11. **Within fifteen (15) days** of receipt of this Notice, properly secure with a suitable locking mechanism the wet wells, valve box covers and control panels on all pump stations, including but not limited to stations B, C, D, E, G and H.

Trump Doral
August 24, 2016

12. **Within fifteen (15) days** of receipt of this Notice, remove any and all debris in pump station wet wells, including but not limited to wet wells in stations D and G, and maintain all wet wells free from debris with regular service intervals.
13. **Within thirty (30) days** of receipt of this Notice, submit all past-due monthly ET meter readings for all private sanitary sewer pump stations on-site, including but not limited to stations B, G and H, in accordance with Specific Condition No. 2 of your annual operating permit (attached). Please refer to "Exhibit C" for specific reporting months required for delinquent pump stations.
14. **Within thirty (30) days** of receipt of this Notice, provide a proper cover for the open and unsafe wet well in pump station E.
15. **Within sixty (60) days** of receipt of this Notice, install the required signage on all pump stations, including but not limited to stations A, F and H, in accordance with Specific Condition No. 7 of your annual operating permit (attached).
16. **Within ninety (90) days** of receipt of this Notice, submit to DERM for review and approval an updated Operation & Maintenance (O&M) Manual for the entire Private Sanitary Sewer collection system serving the subject premises. Said O&M Manual shall be prepared in accordance with Specific Condition No. 4 of your annual operating permit, and shall include pump characteristics for each pump utilized within the system.
17. **Within ninety (90) days** of receipt of this Notice, install a standard wet well cover in pump station A which will prohibit rainwater from entering the sanitary sewer system.
18. **Within ninety (90) days** of receipt of this Notice, provide proper ventilation for wet wells in pump stations F, G and H.
19. **Within ninety (90) days** of receipt of this Notice, install emergency electrical connections and emergency pump connections on all pump stations, including but not limited to stations A, B, C, D, E, F, G and H.
20. **Within ninety (90) days** of receipt of this Notice, submit to DERM for review and approval, a Sewer System Evaluation Survey (SSES) that meets the standards set forth in Chapter 24 of the Code of Miami-Dade County. The SSES shall be signed and sealed by a Florida Professional Engineer, and shall be submitted to: DERM, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, FL 33136. A report cover which includes the reference "PSO-850," along with a review fee of one hundred and twenty dollars (\$120.00) shall be included with the submittal.

Please be advised failure to comply with the above may result in this case being referred to the Office of the County Attorney for further enforcement action, or you may be issued a Uniform Civil Violation

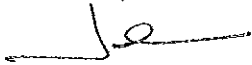

Trump Doral
August 24, 2016

Notice (UCVN) pursuant to Chapter 8CC, Miami-Dade County Code, which carries a mandatory civil penalty and a requirement to correct the violation.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

Please contact the undersigned at (305) 372-6516 or via email at Anderj@miamidade.gov if you have any questions of if you would like to schedule a meeting to discuss these matters further.

Sincerely,

John D. Andersen
Code Enforcement Officer

FOG PRETREATMENT SYSTEMS PLAN REQUIREMENTS

Plans signed and sealed by a Florida Professional Engineer shall include, at a minimum, all requirements enumerated below:

1. Complete plumbing drawings, plan and isometric, for the entire facility. Drains/pipes shall be labelled Sanitary or GW (Grease Waste). All lines that receive or can receive waste from fixtures that can discharge food waste or Fats, Oils and Grease (FOG) shall be labeled grease waste GW to distinguish from sanitary waste.
2. Complete building sewer plans, showing all connections from the facility to the public sanitary sewer system.
3. All plumbing fixtures, solids separators, grease interceptors/grease traps and sampling points.
4. Calculations for the existing FOG Control Devices (e.g., grease interceptors). Calculations shall include peak flow rates, FOG and solids loading rates, and pump-out (cleaning) frequency and demonstrate that the final effluent will comply with Section 24-42.4 (e.g., 100 mg/L Oil & Grease). FOG loading shall include all FOG sources, including FOG generated by preparing meals and cleaning associated with eat-in and take-out meals. FOG generated by cleaning shall include exhaust hood cleaning.
5. The FOG Control Devices shall be located to allow uninterrupted maintenance and inspection; i.e., the system shall be accessible all times and not require intervention to access, clean and inspect.
6. All drainage fixtures located in food and beverage preparation areas shall be connected to the proposed FOG Control Device. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods.
7. Sampling points located after the point of no further treatment. The sampling points shall be directly accessible for visual inspection and sampling. Sampling points shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle.
8. Solids separation prior to existing or proposed FOG control devices that require a flow control device or are not certified to handle solids.

LAND IN FAVOR OF
MIAMI-DADE COUNTY

The undersigned, Trump Endeavor 12 LLC; being the present owner of the following described real property (hereinafter called "the property"):

See Exhibit "A"

Located at approximately N.W. 104^h Avenue and N.W. 48^h Street, Miami-Dade County, Florida, pursuant to a variance from the requirements of Section 24-43.1(4) granted by the Miami-Dade County Environmental Quality Control Board, hereby submits this executed covenant running with the land in favor of Miami-Dade County:

The undersigned agrees and covenants to the following:

1. This portion of the property shall only be used as a vehicle equipment maintenance facility ancillary to a golf course. No paint and body work, steam cleaning, engine or transmission overhauls shall be allowed until such time as the property is connected to an operable public water main and an operable public sanitary sewer, unless a separate variance is granted by the Environmental Quality Control Board, pursuant to Chapter 24 of the Code of Miami-Dade County, Florida.
2. The only liquid waste other than domestic sewage, which shall be generated, disposed of, discharged or stored on the property shall be that liquid waste generated from vehicle equipment maintenance ancillary to a golf course.
3. Prior to the entry into a landlord-tenant relationship with respect to the Property, the undersigned agree(s) to notify in writing all proposed tenants of the Property of the existence and contents of this Covenant.
4. The undersigned agree(s) and covenant(s) that this Covenant and the provisions contained herein may be enforced by the Director of Environmental Resources Management by preliminary, permanent, prohibitory, and mandatory injunctions as well as otherwise provided for by law or ordinance.
5. This agreement and Covenant shall be recorded in the Public Records of Miami-Dade County, Florida and the provisions hereof shall constitute a Covenant Running with the Land and shall remain in full force and effect and be binding upon the undersigned, their heirs, legal representatives, estates, successors, grantees and assigns.
6. This agreement and Covenant shall upon request by the undersigned be released by the Director of Environmental Resources Management or his designee when the Property has been connected to an operable public water main and an operable public sanitary sewer.

7. This Covenant is to run with the land and shall be binding on all parties and all persons claiming under it for a period of thirty (30) years from the date this Covenant is recorded after which time it shall be extended automatically for successive periods of ten years each, unless an instrument signed by the, then, owner(s) of the Property has been recorded agreeing to change the Covenant in whole, or in part, provided that the Covenant has first been modified or released by Miami-Dade County as specified herein.

IN WITNESS WHEREOF, the undersigned have caused this Covenant to be executed this _____ day of _____, 2016.

Miami, Florida 33136

BEFORE THE MIAMI-DADE COUNTY ENVIRONMENTAL QUALITY CONTROL BOARD

AW - 174

IN RE: Board Order No. 99-13
Doral Park Joint Venture

THIS MATTER came before the Board upon a request by Petitioner, Doral Park Joint Venture for a variance from the requirements of Sections 24-13(4) and 24-13(7) of the Code of Miami-Dade County, Florida.

Section 24-13(4) of the Code prohibits the approval of any building permit, certificate of use and occupancy, municipal occupational license, platting action or zoning action for any non-residential land use served or to be served by any source of potable water supply and a septic tank without obtaining the prior written approval of the Director of DERM.

Section 24-13(7) of the aforementioned Code requires connection to a public sanitary sewer system whenever sanitary sewers are available and operative in a public right-of-way abutting the property.

The Board finds that Petitioner's property is served by an abutting public water main. The Board also finds that the closest public sanitary sewer main is a 24-inch force main located along NW 107th Avenue.

The Board finds that current vehicle maintenance activities that are grandfathered on the subject property, include repairs to tractors, mowers, sprayers and service vehicles.

OFF. REC. 1871484802

the waste discharge. The Board also finds that despite the increase in waste flow, the total flow to be generated by this facility is not sufficient to make it technically feasible for Petitioner to connect to the existing sanitary sewer abutting force main.

Finally, the Board finds that the requested variance will not be detrimental to the public health, welfare and safety, will not create a nuisance and will not materially increase the level of pollution in this County.

ACCORDINGLY, IT IS

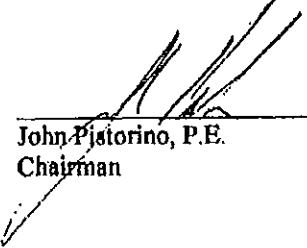

ORDERED AND ADJUDGED that based upon the evidence and testimony presented and the foregoing findings, Petitioner's requested variance be and the same is hereby granted, subject to the following conditions:

1. The landowner shall execute a covenant running with the land in favor of Miami-Dade County restricting the use of the facility to a vehicle equipment maintenance facility ancillary to a golf course.
2. Paint and body work, steam cleaning, engine or transmission overhauls shall not be performed at this facility.
3. Prior to the start of operations at this facility, DERM approved secondary containment shall be installed in areas designated for the storage of hazardous materials and liquid wastes other than domestic sewage.
4. All liquid waste generating vehicle maintenance activities shall be performed inside maintenance bays where approved spill prevention measures have been implemented.
5. Within six (6) months of the start of operations at this facility, Petitioner shall submit a plan for the installation of a monitoring well in the vicinity of the septic tank drainfield. Within sixty (60) days of approval of said plan, the monitoring well shall be installed. Said monitoring well shall be maintained in an operable condition at all times.
6. Petitioner shall obtain groundwater samples from the above referenced monitoring well within sixty (60) days of installation and one per year thereafter. The samples shall be analyzed by an independent, certified laboratory for the following parameters: Oil and Grease, Volatile Aromatic Organic Compounds, Volatile Halogenated Organic Compounds and Total Metals including lead, copper, arsenic and manganese. The samples shall be analyzed using EPA approved methodologies.
7. An Annual Operating Permit shall be obtained from the DERM.
8. The facility shall operate in accordance with the applicable portions of the DERM's Best Management Practices for Mechanical Repair Facilities as amended from time to time.
9. Prior to the start of operations at this facility, a plan shall be submitted to DERM detailing the manner in which the floor inside the maintenance building will be cleaned.

REG: 18714PG4803

10. If the operations at this facility include agrochemical mixing and loading, DERM approval shall be required prior to the implementation of said mixing and loading practices.

Done and Ordered this 8th day of April 1999 in Miami-Dade County, Florida.

John Pistorino, P.E.
Chairman

FILING AND ACKNOWLEDGEMENT

Filed on this 8th day of April, 1999 with the Secretary of the Board as Clerk of the Environmental Quality Control Board, receipt of which is hereby acknowledged and the seal of the Board affixed below.

Fats, Oil & Grease Discharge Control - Operating Permit Application

INSTRUCTIONS: Provide the appropriate information for all fields denoted as required in each section of the form. Incomplete applications will NOT be accepted by the department until all required information is provided. Refer to the permit application guidelines sheet for processing locations, fees, and other relevant information pertinent to the completion of this form.

A. Application Type (select one)

- New Business/Operator
- Transfer of Ownership or Name Change of Existing Permitted Facility
- Modification of Existing Permitted Facility (includes modifications to FOG control devices, modifications to facility size/area and changes of use)

B. Applicant Information

¹Applicant (corporation, LLC, LLP, sole proprietor) : _____

Applicant Mailing Address : _____

²Authorized Representative Name : _____ Title : _____

Email : _____ Phone No. : _____

**Denotes Required Field

- 1) If applicant is a company, corporation, partnership or similar, the name specified shall match the name of the corporate entity that is registered with the State of Florida Division of Corporations. A fictitious name specified on the form shall be preceded by the name of the entity or individual (if sole proprietor) that owns said fictitious name. For example, "ABC, Inc. d/b/a XYZ Store", where "ABC, Inc." is the name of the registered entity that owns the registered fictitious name "XYZ Store". Please refer to www.sunbiz.org for the listing of corporate entities and fictitious names registered with the State of Florida Division of Corporations
- 2) A separate letter of authorization shall be attached to the application form if the individual specified is not a registered officer of the corporate entity applying for the permit. This requirement is not applicable if applicant is a sole proprietor provided that the sole proprietor is the individual signing the form. Note that names of contractors, expediting services providers, or any other individual providing similar services that is not involved in the management or operation of the facility shall not be listed as an authorized representative.

C. Facility Information

Facility Address (Street, City, Zip, Unit) : _____

Facility Phone No. : _____ Facility Email: _____ Property Folio No. : _____

Days and Hours of Operation : _____

**Denotes Required Field

D. Facility Use Information

Select/Describe Use that best describes the Facility**

E. Fats, Oils & Grease Control Device Information

List all FOG control devices serving the facility**

No.	Make & Model	Material (Metal, Plastic, Concrete, other)	Capacity (gpm or gallons)	Location (Indoor or outdoor)

**Denotes Required Field; an operating permit will not be issued until the facility has a department approved control device.

F. CERTIFICATION BY APPLICANT

****COMPLETION OF THIS SECTION IS REQUIRED****

The undersigned authorized representative of (name of applicant) _____ is fully aware that the statements made in this application for an operating permit are true, correct and complete. The undersigned understands that discharges of Fats, Oils and Grease to the public sanitary sewer that exceed the standards set forth in Chapter 24 of the Code of Miami-Dade County (Code) or in quantities that may affect or hinder the operation of the sewage collection, transmission or treatment facilities is a violation of Chapter 24 of the Code. The undersigned certifies that he/she is fully aware that the submittal of a permit application does not guarantee issuance of a Grease Discharge Control operating permit until it is determined that the permit application is complete and a Fats, Oils & Grease Control Device(s) is(are) approved by the department for the facility. It is further acknowledged that a permit, if granted by the Department, is not transferable and that notification shall be provided to the Department upon sale, change of ownership or relocation of the permitted facility.

Name of Authorized Representative* _____ Signature of Authorized Representative* _____ Date _____
Subscribed & sworn to and subscribed before me this _____ day of _____ 20_____
Personally known _____, or produced identification _____, DL #: _____
Notary Signature: _____ Notary Commission Expires _____

Notary Seal

*A notarized letter of authorization shall be attached if the name of the individual does not correspond to a registered officer of the corporate entity applying for the permit, as indicated in section B. This letter is not required for sole proprietors provided that the "Applicant" and "Authorized Representative" specified on the form match and that the application is signed by the same individual. Names of contractors, expediting services providers, or any other individual providing similar services that is not involved in the management or operation of the facility shall not be listed as an authorized representative.

G. CERTIFICATION BY PROPERTY OWNER

****THIS SECTION IS NOT APPLICABLE IF APPLICANT IS SAME AS PROPERTY OWNER****

The undersigned authorized representative of (legal property owner name) _____ is fully aware that the discharges of Fats, Oils and Grease to the public sanitary sewer in quantities that exceed the standards set forth in Chapter 24 of the Code of Miami-Dade County (the Code) or in quantities that may affect or hinder the operation of the sewage collection, transmission or treatment facilities is a violation of Chapter 24 of the Code. The undersigned certifies that the operation and maintenance (cleaning) of the Fats, Oils and Grease Control Device(s) serving the facility is (select one of the options below):

- The responsibility of the Legal Property Owner.
- The responsibility of the Applicant listed in Sections B and F of this form.

Furthermore, the undersigned is fully aware that the legal property owner is responsible for the operation & maintenance of the Fats, oils, and Grease Control Device(s) if the referenced Applicant fails to properly maintain said device(s).

Name of Authorized Representative* _____ Signature of Authorized Representative* _____ Date _____
Subscribed & sworn to and subscribed before me this _____ day of _____ 20_____
Personally known _____, or produced identification _____, DL #: _____
Notary Signature: _____ Notary Commission Expires _____

Notary Seal

*A notarized letter of authorization shall be attached if the name of the individual does not correspond to a registered officer of the corporate entity having legal ownership of the property. This letter is not required for sole proprietors provided that the Authorized Representative specified in this section of the form is that of the legal property owner.

H. PERMIT APPLICATION SUBMITTAL CHECKLIST

- All required fields of permit application form are completed.
- Zoning Certificate of Use/Occupational License Application Form.
- Applicant has read the instructions provided in the permit guidelines sheet.
- Permit Fee (see guidelines sheet and fee schedule).
- FOG control device information is specified.
- Form is signed/certified by a duly authorized representative of Applicant.
- Notarized letter of authorization by Applicant is enclosed (as applicable).
- Form is signed/certified by a duly authorized representative of Property Owner (not required if applicant and property owner are the same).
- Notarized letter of authorization by Property Owner is enclosed (as applicable).

Fats, Oil & Grease Discharge Control Program - Permit Application Completion/Submital Guidelines

A. Regulatory Requirement

Pursuant to the provisions of Section 24-18 of the Code of Miami-Dade County (the Code), an operating permit is required for any non-residential facility with the potential to introduce oil and grease into the public sanitary sewer system in quantities that have the potential to affect or hinder the operation of sewage collection, transmission or treatment facilities. The intent of the Fats, Oil and Grease Discharge Control program is to regulate facilities with the potential to introduce oil and grease, commonly referred to as "Fats, Oil and Grease" or "FOG," to the public sanitary sewer systems of Miami-Dade County. Facilities with said potential are required to obtain an operating permit issued pursuant to the provisions of Chapter 24 of the Code.

B. Permit Application Form - Important Terms to Know

The terms listed below are referenced in the permit application and are hereby defined to assist the reader in understanding the scope of the various sections of the form and to ensure that the required information is specified accurately.

Fats, Oil and Grease (FOG): common industry/regulatory term that is synonymous to the term "oil & grease".

FOG Control Device: pertains to any equipment designed to remove, hold and prevent passage of FOG to the public sanitary sewer system; this includes grease traps and grease interceptors.

FOG Generator: pertains to any non-residential facility that can introduce FOG to the public sanitary sewer system.

Applicant: is the person or entity intended to be permitted by the department that shall be responsible for complying with the conditions of a FOG discharge control operating permit. This includes sole proprietors and entities registered with the State of Florida Division of Corporations such as companies, corporations, partnerships, etc.

Facility: refers to the establishment (place of business) where a FOG generating activity is conducted; see "FOG Generator" definition above.

Property Owner: refers to the legal owner of the facility (premises) where the FOG generating activity is conducted.

Authorized Representative: is a registered corporate officer (e.g., managing member, president, vice-president, etc.) of an entity that is duly registered with the State of Florida Division of Corporations (e.g., corporation, etc.), or a sole proprietor. If the individual listed on the "Authorized Representative" fields of the permit application does not meet the aforementioned criteria, a notarized letter of authorization issued by a registered corporate officer or sole proprietor (as applicable) shall be attached to the form.

C. Permit Application Form - When is the submital of a permit application required?

The submital of a permit application is required for:

- Any new business/operator (FOG generator) intending to operate within Miami-Dade County.
- Transfers of ownership or name changes of an existing permitted entity (i.e., permit holder).
- Updates to permit or facility information, including (but not limited to) modifications to FOG Control Devices, modifications to facility size/area and changes of use.

D. Permit Application Completion and Submital Instructions

General Information

All sections of the "Fats, Oil and Grease Discharge Control Program Permit Application" form shall be properly completed and certified by all parties responsible for the operation of the regulated facility/establishment, management of the FOG control device(s), and having legal ownership of the facility/establishment. An operating permit shall **NOT** be issued until the department has determined that the application is complete and a FOG control device is approved for the facility.

Zoning Licensing Requirements

The FOG Discharge Control Operating Permit Application form shall be submitted in person to one of the locations listed below. If your facility is located within a municipality, the application form shall be accompanied by a completed Certificate of Use form (a/k/a as "Local Business Tax Receipt" or "Occupational License") from the municipal zoning authority having jurisdiction over the property. If your facility is located within unincorporated Miami-Dade County, note that the submital of a Zoning Certificate of Use application will be required at the time of submital of the permit application form. In order to process the permit application, please ensure that the information captured on the permit application form matches the information referenced on the zoning application form (either municipal or unincorporated).

Processing Location	Address	Serves Facilities Located Within:
RER/DERM - Overtown Transit Village	701 NW 1st Court, 2nd Floor, Miami	Municipalities Only

Permit Fees

The list of fees pertinent to the issuance of Fats, Oil and Grease Discharge Control operating permits is found under the "operating permit fees" section of the most current version of the department's Fee Schedule. The fee schedule is available online at: <http://www.miamidade.gov/permits/library/fees/schedule-environmental.pdf>

Miami-Dade Department of Regulatory and Economic Resources - Division of Environmental Resources Management (DERM)

MAINTENANCE LOG FOR ALL TYPES OF GREASE TRAPS/INTERCEPTORS AT DERM-PERMITTED FACILITIES

- This Maintenance Log is to be used at all facilities with GDO Permits and staff/operator/owner/permittee is responsible for completing.
- This Maintenance Log must capture every Fats, Oils, Grease (FOG) removal and/or maintenance action (e.g., replacement of broken/missing baffle, pump out, etc.) performed on the grease trap/interceptor by staff/operator/owner/permittee or approved liquid waster hauler. The Maintenance Log will be checked by DERM staff during inspections (see DERM GDO permit condition #6). Permittee must follow the maintenance schedule provided by grease trap/interceptor manufacturer/installer.
- This Maintenance Log must be placed near your trap/interceptor and must be visible so staff/operators/owners or liquid waste haulers can record maintenance actions and so that it is easily accessible by DERM staff during inspections.
- Make photo copies of the blank Maintenance Log sheets if you need more blank rows or go to <http://www.miamidade.gov/environment/fats-oils-grease.asp> to download a blank version of this Log.
- If you use a DERM-permitted hauler to remove grease, you must keep all pump-out/maintenance receipts available at the facility available for inspection for a minimum of 3 years in addition to keeping this Log.

FACILITY NAME: _____ DERM GDO PERMIT NUMBER: _____

PERMITTED FACILITY ADDRESS:					
DATE	TYPE OF MAINTENANCE PERFORMED	VOLUME OF WASTE REMOVED – GALLONS	GREASE DISPOSAL LOCATION	NAME OF APPROVED HAULER/TRANSPORTER	OTHER COMMENTS
	(e.g., pump-out, manual FOG removal, repair – provide details)	(if manually removing FOG, estimate vol. If not, hauler will provide)	(if manually removing FOG, provide disposal location (trash). If not, ask hauler to provide disposal location)	(Provide name of hauler. If removing FOG manually, column not applicable)

**PRIVATE SANITARY SEWERS OPERATING PERMIT
ANNUAL OPERATING PERMIT**

DESCRIPTION OF FACILITY/EQUIPMENT

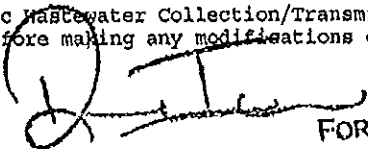

This document, issued under the provisions of Chapter 24, Miami-Dade County Code (Dade County Pollution Control Ordinance), shall be valid from 01-OCT-2015 through 30-SEP-2016. The above named permittee is hereby authorized to operate the pollution control facility at the above location which consists of the following:

- PUMP STATION(S):
- Number of Stations:7
 - Number of Pumps:14
 - Pump Type:Submersible
 - Alarm System:AUDIO/VISUAL
 - Number of Sewer MH:9
- COLLECTION SYSTEM:
- 10 Inch Diameter Pipe: 125.00 ft.
 - 4 Inch Diameter Pipe: 1,271.00 ft.
 - 6 Inch Diameter Pipe: 614.00 ft.
 - 8 Inch Diameter Pipe: 947.00 ft.

This facility is subject to conditions listed below and in the following pages (if any) of this permit.

SPECIFIC CONDITIONS

1. The collection/transmission facility shall be operated continuously in such a manner that maximum level of efficiency is maintained at all times and in full compliance with Rule 62-604, Florida Administrative Code.
2. All privately-owned or operated sanitary sewer collection systems which have sanitary sewer pumping stations, shall provide each pump with a fully operational and working non-resettable elapsed time (ET) meter as required by Section 24-42.2(2) (a) of the Miami-Dade County Code. Monthly totalized ET meter readings of the total number of hours for each pump shall be recorded and reported as required by Section 24-42.2(1) (f) (i) and entered by the permittee via an Internet specifically created for this purpose. As of Oct 1, 2012, this facility is required to start entering the ET readings utilizing the new Web application. The Web address to start entering the ET readings and/or to obtain the Web application guidelines is: https://www.miamidade.gov/xer/psu_psu_et_filings/
3. The Permittee shall obtain a Domestic Wastewater Collection/Transmission System Construction permit and notify this Department before making any modifications of the sanitary sewer

FOR

Lee N. Hefty, Assistant Director
Department of Regulatory and Economic Resources,
Environmental Resources Management

collection system that may change the capacity of the system.

4. The Permittee shall provide an Operations and Maintenance Manual for this collection/transmission facility. A copy of the approved manual shall be maintained at the facility site. The manual shall be updated annually whenever the system is modified or enlarged, or as required by new regulatory actions pursuant to Chapter 24-42.2(5)(b) of the Code. The facility shall be maintained in accordance with the practices described in the approved Operations and Maintenance Manual. Logbooks required by the manual shall be maintained at the facility in a location protected from the weather.
5. The Permittee shall submit an annual report to the Director or his designee which sets forth a map and a list of all sewer service areas and sewer subsystems, including the total length (in feet) of gravity sewer lines according to pipe diameter and type of material, and number of manholes in each service area. This information shall be submitted only if there have been changes in the service area.
6. The Permittee shall provide a Sanitary Sewer Evaluation Survey (SSES) for this collection/transmission facility. Such evaluation activities shall be conducted in a manner so that the total length of the gravity sewer lines and associated manholes in the sanitary sewer collection system is evaluated once every ten year period, pursuant to Chapter 24-42.2 (1)(a) of the Miami-Dade County Code. You may contact the PSO Program at (305)372-6600 in order to obtain a copy of the SSES Guidelines.
7. The Permittee shall create, post, maintain, update and secure the EMERGENCY CONTACT SIGN. You shall include in the Emergency Contact Sign, the PSO Permit number, your Emergency Maintenance Contact Person and DERM's 24 hour complaint desk telephone number (305-372-6955) wherever possible, the sign shall be posted on a flat surface and visible at and around the pump station. In any case, the sign shall be within twenty (20) feet of the wet well of the station, three(3) feet to six (6) feet above ground level and clear of immediate obstructions. The Permittee shall update the contact number displayed on the sign, as required, with a durable marker.
8. No additional sanitary sewer connection(s) shall be made to the existing private sanitary sewer collection system from other facilities or properties without a review and prior written approval by the DERM.

GENERAL CONDITIONS

9. The applicant, by acceptance of this document, agrees to operate and maintain the subject operation so as to comply with the requirements of Chapter 24 of the Code of Miami-Dade County.
10. If for any reason, the applicant does not comply with or will be unable to comply with any condition or limitation specified on this document the applicant shall immediately notify and provide the department with the following information: (a) a description of and cause of non-compliance; and (b) the period of non-compliance including exact dates and times; or, if not corrected, the anticipated time the non-compliance is expected to continue, and steps taken to reduce, eliminate, and prevent recurrence of the non-compliance. The applicant shall be responsible for any and all damages which may result and may be subject to enforcement action by the department for penalties or revocation of this document.
11. As provided in Section 24-15 of the Code of Miami-Dade County, the prior written approval of the Department shall be obtained for any alteration to this facility.
12. The issuance of this document does not convey any vested rights or any exclusive privileges. Nor does it authorize any injury to public or private property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations. Nor does it relieve the applicant from liability for harm or injury to human health or welfare or property.
13. This document is required to be posted in a conspicuous location at the facility site during the entire period of operation.
14. This document is not transferable. Upon sale or legal transfer of the property or facility covered by this document, the applicant shall notify the department within thirty(30) days. The new owner must apply for a permit within thirty (30) days. The applicant shall be liable for any non-compliance of the source until the transferee applies for and receives a transfer of this document.
15. The applicant, by acceptance of this document, specifically agrees to allow access to the named source at reasonable times by department personnel presenting credentials for the purposes of inspection and testing to determine compliance with this document and department rules.
16. This document does not indicate a waiver of or approval of any other department permit that may be required for other aspects of this facility.
17. This document does not constitute an approval by the Department or certification that the

Re: Unauthorized discharge to the sanitary sewer system from Wendy's Restaurant #1711 located at, near or in the vicinity of 200 SW 8 Street, Miami, Florida (folio # 01-0205-080-1010). DERM file no. GDO-154.

Dear Mr. Brolick and Mr. Cachoua:

NOTICE OF VIOLATION
AND
ORDERS FOR CORRECTIVE ACTION

On July 13, 2015 a representative of the Miami-Dade County Department of Regulatory and Economic Resources, Division of Environmental Resources Management (DERM), responded to a complaint from the Miami-Dade Water and Sewer Department that a sanitary sewer manhole adjacent to the above-referenced facility was overflowing. Said inspection revealed the on-site grease recovery unit was not functioning properly resulting in the unauthorized discharge of grease to the sanitary sewer system servicing the subject property. Said discharge caused an obstruction to the sanitary sewer system resulting in a backup to the system and triggering a sewage overflow. A crew from the Miami-Dade Water and Sewer Department was dispatched to the scene to clean-out the sewer line and disinfect the impacted areas.

Be advised that discharging, or allowing the discharge of any Fats, Oils or Grease into a sanitary sewer system constitutes violations the facility's Grease Discharge Operating Permit (GDO-154) and of Chapter 24, Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-29, of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director of DERM or his designee, or any condition, limitation or restriction which is part of an operating permit."

Section 24-42.4(2)(d)(iii), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any pollutant in amounts which alone or in combination with other discharges will cause obstruction to the flow in the publicly owned treatment works."

Delivering Excellence Every Day

Section 24-42.4(2)(d)(vi), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits."

Pursuant to the provisions of Section 24-31(6) of Chapter 24, Miami-Dade County Code, whenever a violation of this chapter occurs or exists, or has occurred or existed, any person, individually or otherwise, who has legal, beneficial, or equitable interest in the real property upon which such violation occurs or exists, or has occurred or existed, shall be jointly and severally liable for said violation regardless of fault and regardless of knowledge of the violation.

Based on the above and pursuant to the authority granted to me under Chapter 24, Miami-Dade County Environmental Protection Ordinance, I am hereby ordering you to:

1. Upon receipt of this NOTICE, "CEASE and DESIST" from allowing any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.
2. Within sixty days (60) of receipt of this NOTICE, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for changes in equipment and/or processes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said plans shall include at a minimum the following:
 - a. All existing plumbing lines, drainage fixtures, solids separators, grease interceptors / grease traps and sampling points. All lines that receive or can receive waste from fixtures that can discharge food waste or Fats, Oil and Grease (FOG) shall be labeled grease waste (GW) to distinguish it from sanitary waste.
 - b. A FOG control device sized based on calculations that include peak flow rates, FOG and solids loading rate, and a pump-out frequency. FOG loading shall include contribution from eat-in, take-out and drive-thru operations and all fixture sources, including exhaust hoods. For self-cleaning exhaust hoods, the manufacturer's specifications for peak discharge shall be included.
 - c. All drainage fixtures located in food and beverage preparation areas shall be routed through a grease interceptor. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods.
 - d. Sampling point located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling. Sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle. An alternative to a manufactured sampling point (device) is a double sanitary cross with a PVC-CAP on the bottom of the vertical axis to create the sampling sump and a cleanout cap on top. Minimum diameter for the vertical axis is 4-inches; minimum depth of the sump is 6 inches.
 - e. Isometric diagram(s) with existing and proposed plumbing lines, fixtures, solids separators, FOG control devices and sampling points. Grease waste lines shall be labeled GW.
 - f. Solids separation prior to existing or proposed FOG control devices that require a flow control device or are not certified to handle solids.

3. Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
4. Within one hundred eighty (180) days of receipt of this Notice, complete the required improvements.

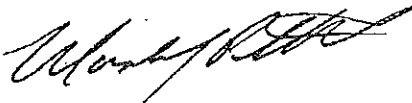

For appropriate handling, include the subject permit number (GDO-154) referencing this facility on all submittals filed with this Department and direct said submittals to DERM, attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, Florida 33136-3912

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, MIAMI DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the above, please contact Carlos Hernandez, P.E., Chief of the Wastewater Permitting Section of this office at 305-372-6714 or via email at Hernac@miamidade.gov.

Sincerely,

Mark J. Pettit

Re: Unlawful discharges to the public sanitary sewer system and operating permit violations at the Pollo Tropical Restaurant facility (GDO-218) located at, near, or in the vicinity of 16495 NW 67 Ave, Miami Lakes, Miami-Dade County, Florida (Folio 32-2013-004-2410).

Dear Messrs. Rozansky & Taft and Ms. Wyllie:

NOTICE OF VIOLATION AND ORDERS FOR CORRECTIVE ACTION

Inspections of the above-referenced facility, conducted by Department of Regulatory and Economic Resources, Division of Environmental Resources Management's (DERM) representatives between 2010 to present, have documented chronic operating permit violations relating to the grease trap interceptor (GTI) serving the facility. The facility's Miami-Dade County Fats, Oils and Grease Discharge Control Annual Operating Permit requires that the GTI be routinely serviced, that all maintenance records be kept on site and provided to DERM upon request, and that the GTI treatment system not allow fats, oils and grease (FOG) to bypass the GTI or contribute to sanitary sewer line blockages. DERM inspections on March 18, 2010, February 3, 2012, May 13, 2014, October 16, 2014, April 3, 2015, April 15, 2016 and May 16, 2016 have consistently documented both FOG in the sewer discharge point of the GTI and a lack of service records demonstrating the required maintenance for the treatment system.

Additionally, records obtained from Miami-Dade County Water and Sewer Department (WASD) indicate that WASD has been required to routinely respond to chronic sewer line blockages and sewer manhole overflows in the public sanitary sewer system immediately downstream of the subject facility. A review of WASD records reveals that since 2012, twenty-four responses were required to address sewer line malfunctions due to FOG obstruction in the sewer line.

Delivering Excellence Every Day

Pollo Tropical
GDO-218

Furthermore, DERM has determined that the GTI serving the subject property is inadequately-sized for the on-site restaurant processes. Samples of the GTI effluent collected by DERM on April 15, 2016 revealed the presence of oil and grease in levels 39 times higher than allowable limits established in Miami-Dade County Sewer Pretreatment Standards. On May 16, 2016 DERM resampled the GTI effluent five days after a service of the treatment system, and again documented oil and grease in levels exceeding allowable standards. The presence of oil and grease in the effluent immediately after maintenance of the on-site treatment system verifies that the existing GTI cannot adequately treat the wastewater flows from the restaurant, thereby allowing FOG to bypass the GTI and enter the public sanitary sewer system.

Be advised that the unauthorized discharges to the public sanitary sewer system and the repeated violations of the operating permit constitutes violations of Chapter 24 of the Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-29, of said Chapter, inasmuch as it shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director of the Department of Environmental Resources Management or his designee, or any conditions, limitation or restriction which is part of an operating permit; and

Section 24-42.4(2)(d)(vi), of said Ordinance, inasmuch as it shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer any effluent in excess of the limits set forth in the Sanitary Sewer Discharge Limitations and Pretreatment Standards.

Based on the above and pursuant to the authority granted to me under Chapter 24 of the Code of Miami-Dade County, you are hereby ordered to:

1. Upon receipt of this NOTICE, immediately **CEASE and DESIST** from allowing any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.
2. **Within forty-five (45) days** of receipt of this NOTICE, submit to DERM for review formal plans, signed and sealed by a Florida Professional Engineer, for changes in equipment and/or processes which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said plans shall include, at a minimum, all requirements enumerated in the following ATTACHMENT to this NOTICE.
3. **Within one hundred twenty (120) days** of receipt of this NOTICE, complete all required improvements to the on-site FOG treatment system.

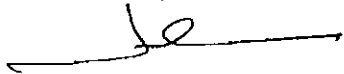

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN ASSESSMENT OF CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, OF CHAPTER 24 OF THE CODE OF MIAMI-DADE COUNTY, FLORIDA, THE MIAMI-DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

Pollo Tropical

PLAN REQUIREMENTS

Grease Trap Interceptor

Plans signed and sealed by a Florida Professional Engineer shall include, at a minimum, all requirements enumerated below:

1. Complete plumbing drawings, plan and isometric, for the entire facility. Drains/pipes shall be labelled Sanitary or GW (Grease Waste). All lines that receive or can receive waste from fixtures that can discharge food waste or Fats, Oils and Grease (FOG) shall be labeled grease waste GW to distinguish from sanitary waste.
2. Complete building sewer plans, showing all connections from the facility to the public sanitary sewer system.
3. All plumbing fixtures, solids separators, grease interceptors/grease traps and sampling points.
4. Calculations for the proposed FOG Control Device (e.g., grease interceptors). Calculations shall include peak flow rates, FOG and solids loading rates, and pump-out (cleaning) frequency and demonstrate that the final effluent will comply with Section 24-42.4 (e.g., 100 mg/L Oil & Grease). FOG loading shall include all FOG sources, including FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. FOG generated by cleaning shall include exhaust hood cleaning.
5. The FOG Control Device shall be located to allow uninterrupted maintenance and inspection; i.e., the system shall be accessible all times and not require intervention to access, clean and inspect.
6. All drainage fixtures located in food and beverage preparation areas shall be connected to the proposed FOG Control Device. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods.
7. Sampling point located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling. Sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle.
8. Solids separation prior to existing or proposed FOG control devices that require a flow control device or are not certified to handle solids.

ENFORCEMENT NOTICE

October 6, 2011

Tony Suarez, President
 4546 Properties, Inc.
 4530 NW 7 Ave.
 Miami, Fl. 33127

CERTIFIED MAIL NO. 7009 0080 0000 1045 0648
 RETURNED RECEIPT REQUESTED

Re: The Esther's Catering Services facility (DERM GDO-577/COM-57393) located at, near or in the vicinity of 4530-4540 NW 7 Avenue, Miami, Miami-Dade County, Florida (Folios 01-3123-022-0170 & 01-3123-022-0180).

Dear Mr. Suarez:

NOTICE OF VIOLATION AND ORDERS FOR CORRECTIVE ACTION

This notice is being reissued to correct the mailing label on the Department's September 22, 2011 correspondence. On April 25, 2011 and August 26, 2011, representatives of this Department inspected the above-referenced facility and documented oily wastewater in the effluent pipe of the on-site grease trap. Samples collected of this effluent confirmed the presence of Oil and Grease in levels greatly exceeding the Miami-Dade County sewer pretreatment standards. Furthermore, a review of Department records has revealed that since 2004, routine inspections of the subject site have documented a pattern of improper discharges to the sanitary sewer system from the facility's frequently surcharged and malfunctioning grease trap. These documented discharges have resulted in the issuance of multiple field violation notices by this Department.

Additionally, a review of Miami-Dade Water and Sewer Department (WASD) records for the above-referenced location revealed that WASD has repeatedly responded to surcharged and blocked sewer lines serving the subject facility. The frequent sanitary sewer system obstruction by fat, oil and grease from said facility operations has required the repetitive maintenance of the sanitary sewer line by WASD.

Be advised that the above constitutes violations of Chapter 24, Miami-Dade County Environmental Protection Ordinance, to wit:

Section 24-29, of said Ordinance, inasmuch as it shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director of the Department of Environmental Resources Management or his designee, or any conditions, limitation or restriction which is part of an operating permit; and

Section 24-42.4(2)(d)(iii), of said Ordinance, inasmuch as it shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or cause, permit, allow or suffer to be thrown, run drained, allowed to seep, or otherwise discharged into such sewer any pollutant in amounts which alone or in combination with other discharges will cause obstruction to the flow in the POTW; and

Section 24-42.4(2)(d)(vi), of said Ordinance, inasmuch as it shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or cause, permit, allow or suffer to be thrown, run drained, allowed to seep, or otherwise discharged into such sewer Oil and Grease in excess of 100.0 mg/l.

Delivering Excellence Every Day

Based on the above and pursuant to the authority granted to me under Chapter 24, the Miami-Dade County Environmental Protection Ordinance, I am hereby ordering you to:

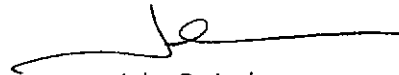

- 1) Immediately upon receipt of the Notice, **CEASE AND DESIST** from any unauthorized discharges to the public sanitary sewer system at the subject location.

- 2) **Within thirty (30) days** of receipt of this Notice, submit to the *Plan Review & Development Approvals Division* of this Department formal plans for changes in equipment and processes which shall correct the subject violations and bring your facility into compliance with the provisions of Chapter 24. Said plans are to be accompanied by a timetable for implementation of the corrective measures, and shall include but not be limited to, the development and implementation of appropriate Best Management Practices for the facility and address all processes related to the storage, treatment and disposal of fat, oil and grease at the subject location.

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN ASSESSMENT OF CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, OF CHAPTER 24 OF THE CODE OF MIAMI-DADE COUNTY, FLORIDA, THE MIAMI-DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

If you have any questions concerning the above, please contact the undersigned Code Enforcement Officer for this case at (305) 372-6516 or via email at anderj@miamidade.gov.

Sincerely,

John D. Andersen

Re: Unauthorized discharge to the sanitary sewer system from Mc Donald's Restaurant #7409 located at, near or in the vicinity of 5700 NW 79 Avenue, Doral, Florida (folio # 35-3022-000-0210). DERM file no. GDO-580.

Dear Mr. Menendez and Mr. Easterbrook:

NOTICE OF VIOLATION
AND
ORDERS FOR CORRECTIVE ACTION

On June 23, 2016 and July 25, 2016 a representative of the Miami-Dade County Department of Regulatory and Economic Resources, Division of Environmental Resources Management (DERM), inspected the above-referenced facility and collected samples from the final discharge point of the on-site grease recovery unit. Sample results revealed that the on-site grease recovery unit is not functioning properly and/or sized correctly for the facility resulting in the unauthorized discharge of grease to the sanitary sewer system servicing the subject property.

Be advised that discharging, or allowing the discharge of any industrial wastes into a sanitary sewer system constitutes violations the facility's Grease Discharge Operating Permit (GDO-580) and of Chapter 24, Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-29, of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director or the Director's designee."

Section 24-42.4(2)(d)(iii), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any pollutant in amounts which alone or in combination with other discharges will cause obstruction to the flow in the publicly owned treatment works."

Section 24-42.4(2)(d)(vi), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits."

Pursuant to the provisions of Section 24-31(6) of Chapter 24, Miami-Dade County Code, whenever a violation of this chapter occurs or exists, or has occurred or existed, any person, individually or otherwise, who has legal, beneficial, or equitable interest in the real property upon which such violation occurs or exists, or has occurred or existed, shall be jointly and severally liable for said violation regardless of fault and regardless of knowledge of the violation.

Delivering Excellence Every Day

Based on the above and pursuant to the authority granted to me under Chapter 24, Miami-Dade County Environmental Protection Ordinance, I am hereby ordering you to:

1. Upon receipt of this NOTICE, "CEASE and DESIST" from allowing any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.
2. Within forty-five days (45) of receipt of this NOTICE, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for plumbing, equipment and/or processes changes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said submittal shall include, at a minimum, the following.
 - A. Existing facility plan showing all food and beverage preparation areas (back of house areas) and kitchen equipment/appliances.
 - B. Existing facility sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing drains/lines, plumbing fixtures, solids separators, Fats, Oils and Grease (FOG) Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - C. Existing building sewer plan showing all connections from the facility to the public sanitary sewer system.
 - D. An evaluation of the existing FOG Control Device (e.g., grease interceptor) capacity. The evaluation shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4 (e.g., 100 mg/L Oil & Grease).
 - E. If the evaluation demonstrates that the existing FOG Control Device (e.g., grease interceptor) does not provide sufficient capacity, submit "proposed" sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing and proposed drains/lines, plumbing fixtures, solids separators, FOG Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing and proposed drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing and proposed drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - iv. Sizing calculations for the proposed FOG Control Device (e.g., grease interceptor). The calculations shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4 (e.g., 100 mg/L Oil & Grease).
 - v. The FOG Control Device (e.g., grease interceptor) shall be located to allow uninterrupted maintenance and inspection; i.e., the system shall be accessible all times and not require intervention to access, clean and inspect.
 - vi. Sampling point located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling. Sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle.
 - vii. All drainage fixtures located in food and beverage preparation areas (back of house areas) shall be connected to a FOG Control Device. Drainage fixtures include, but are not limited to: floor

drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods.

3. Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
4. Within one hundred twenty (120) days of receipt of this Notice, complete the required improvements.

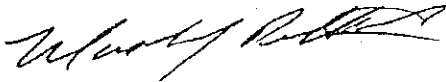

For appropriate handling, include the subject permit number (GDO-580) referencing this facility on all submittals filed with this Department and direct said submittals to DERM, attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, Florida 33136-3912

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, MIAMI DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the above, please contact Carlos Hernandez, P.E., Chief of the Wastewater Permitting Section of this office at 305-372-6714 or via email at Hernac@miamidade.gov.

Sincerely,

Mark J. Pettit

Re: Grease Discharge Violations at, near or in the vicinity of 1058 Collins Avenue, Miami Beach, Miami-Dade County, Florida (Folio # 02-3234-008-1210)(PERA GDO-1097).

Dear Mr. Gonzalez:

NOTICE OF VIOLATION AND ORDERS FOR CORRECTIVE ACTION

On August 4, 2011 and January 30, 2012, representatives of this Department conducted inspections of the above-referenced property and performed dye testing of the wastewater system. The results confirmed that at least one grease recovery unit in use at this facility and other drainage structures in food preparation areas are not connected to the existing in-ground grease trap. The in-ground grease trap is intended as a pretreatment system to restrict direct oil and grease discharge to the sanitary sewer system. At present, this pretreatment system is being by-passed. In addition, an effluent sampling point from the in-ground grease trap was not available.

Be advised that the above constitutes violations of Chapter 24, of the Code of Miami-Dade County, specifically:

Section 24-18, of said Ordinance, inasmuch as no person shall operate, maintain or permit, cause, allow, let or suffer the operation or maintenance of any industrial waste facility in violation of any condition, limitation or restriction which is part of an operating permit;

Section 24-29, of said Ordinance, inasmuch as it shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director of the Department of Environmental Resources Management or his designee, or any condition, limitation or restriction, which is part of an operating permit; and

Section 24-42.5, of said Ordinance, inasmuch as it shall be unlawful to by-pass the facility or any portion thereof and to discharge untreated or inadequately treated wastes to the waters the facility was designed to protect.

Based on the above, and pursuant to the authority granted to me under Chapter 24, of the Code of Miami-Dade County, you are hereby ordered to:

- 1. Upon receipt of this NOTICE, Cease and Desist from discharging untreated wastewater from food preparation areas into the sanitary sewer system in violation of Chapter 24, at the subject location.

Delivering Excellence Every Day

2. Within **thirty (30) days** of receipt of this NOTICE, submit to this office for review, formal plans for changes in equipment and/or processes and engineering drawings which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said plans shall include connection of all appropriate fixtures and equipment to the in-ground grease trap pretreatment system. Appropriate fixtures and equipment include those that receive drainage from grease-laden waste located in food preparation areas. Drawings shall also include an approvable sampling point for the effluent from the in-ground grease trap just prior to sanitary sewers.
3. Pursuant to PERA's review and response to the plan submittal in item #2 above, implement necessary corrective actions to ensure food preparation wastewater pretreatment prior to sanitary sewer discharge.

Be advised that failure to comply with the above may result, at a minimum, in civil penalties and the payment of all department costs incurred in the investigation and settlement of this case, or in issuance of a Uniform Civil Violation Notice (UCVN) pursuant to the provisions of 8CC of the Code of Miami-Dade County which carries a mandatory civil penalty and requirement to correct the violation. In addition, failure to comply may result in your case being prepared for formal enforcement action in a court of competent jurisdiction pursuant to the enforcement and penalty provisions of Section 24-29, Code of Miami-Dade County.

If you have any questions concerning the above, please contact me at 305-372-6514 or email brownb@miamidade.gov.

Sincerely,

Barbara Brown

Re: Unauthorized discharge to the sanitary sewer system from Starbucks Coffee Shop #13824 located at, near or in the vicinity of 2937 Biscayne Boulevard, Miami, Florida (folio # 01-3230-013-1020). DERM file no. GDO-1879.

Dear Mr. Johnson and Mr. Karam:

**NOTICE OF VIOLATION
AND
ORDERS FOR CORRECTIVE ACTION**

A representative of the Miami-Dade County Department of Regulatory and Economic Resources, Division of Environmental Resources Management (DERM), recently inspected the above-referenced facility and documented that the drainage fixtures associated with the food and beverage preparation areas are not connected to the on-site grease recovery unit resulting in the unauthorized discharge of grease to the sanitary sewer system servicing the subject property. Furthermore, dye testing confirmed that the facility's bathroom drainage fixtures are connected to the grease recovery unit indicating a problem with the building's sanitary drainage system.

Be advised that discharging, or allowing the discharge of any industrial wastes into a sanitary sewer system constitutes violations the facility's Grease Discharge Operating Permit (GDO-1879) and of Chapter 24, Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-29, of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director or the Director's designee or any condition, limitation or restriction which is part of an operating permit."

Section 24-42.4(2)(d)(iii), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any pollutant in amounts which alone or in combination with other discharges will cause obstruction to the flow in the publicly owned treatment works."

Section 24-42.4(2)(d)(vi), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits."

Delivering Excellence Every Day

Pursuant to the provisions of Section 24-31(6) of Chapter 24, Miami-Dade County Code, whenever a violation of this chapter occurs or exists, or has occurred or existed, any person, individually or otherwise, who has legal, beneficial, or equitable interest in the real property upon which such violation occurs or exists, or has occurred or existed, shall be jointly and severally liable for said violation regardless of fault and regardless of knowledge of the violation.

Based on the above and pursuant to the authority granted to me under Chapter 24, Miami-Dade County Environmental Protection Ordinance, I am hereby ordering you to:

1. Upon receipt of this NOTICE, "**CEASE and DESIST**" from allowing any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.
2. Within forty-five days (45) of receipt of this NOTICE, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for plumbing, equipment and/or processes changes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said submittal shall include, at a minimum, the following.
 - A. Existing facility plan showing all food and beverage preparation areas (back of house areas) and kitchen equipment/appliances.
 - B. Existing facility sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing drains/lines, plumbing fixtures, solids separators, Fats, Oils and Grease (FOG) Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - C. Existing building sewer plan showing all connections from the facility to the public sanitary sewer system.
 - D. An evaluation of the existing FOG Control Device (e.g., grease interceptor) capacity. The evaluation shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4 (e.g., 100 mg/L Oil & Grease).
 - E. If the evaluation demonstrates that the existing FOG Control Device (e.g., grease interceptor) does not provide sufficient capacity, submit "proposed" sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing and proposed drains/lines, plumbing fixtures, solids separators, FOG Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing and proposed drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing and proposed drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - iv. Sizing calculations for the proposed FOG Control Device (e.g., grease interceptor). The calculations shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4 (e.g., 100 mg/L Oil & Grease).
 - v. The FOG Control Device (e.g., grease interceptor) shall be located to allow uninterrupted maintenance and inspection; i.e., the system shall be accessible all times and not require intervention to access, clean and inspect.

- vi. Sampling point located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling. Sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle.
 - vii. All drainage fixtures located in food and beverage preparation areas (back of house areas) shall be connected to a FOG Control Device. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods.
3. Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
 4. Within one hundred twenty (120) days of receipt of this Notice, complete the required improvements.

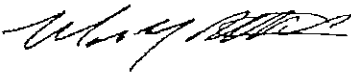

For appropriate handling, include the subject permit number (GDO-1879) referencing this facility on all submittals filed with this Department and direct said submittals to DERM, attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, Florida 33136-3912

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, MIAMI DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the above, please contact Carlos Hernandez, P.E., Chief of the Wastewater Permitting Section of this office at 305-372-6714 or via email at Hernac@miamidadegov.

Sincerely,

Mark J. Pettit

LAZARO SANCHEZ, JR; DIRECTOR
CASABLANCA SEAFOOD BAR & GRILL, INC.
400 NW NORTH RIVER DR.
MIAMI, FL 33128

Re: Casablanca Seafood Bar & Grill, Inc located at, near, or in the vicinity of 400 NW North River Dr., Miami, Miami-Dade County, Florida (Folio No. 01-0107-010-1190) (GDO-2261).

Dear Mr. Sanchez:

**NOTICE OF VIOLATION AND ORDERS
FOR CORRECTIVE ACTION**

On April 8, 2016 and on November 14, 2016, inspections performed by Department of Regulatory and Economic Resources Division of Environmental Resources Management (DERM) staff found the current in-ground fat, oil and grease (FOG) control pretreatment device does not meet the minimum requirements for the subject facility. During the inspections samples taken from the effluent of the facility's current FOG control device revealed levels above the standard for oil and grease (O&G) discharges to the public sanitary sewer system (specifically, the sample results were 250.8 mg/L and 477.4 mg/L respectively, while the O&G sanitary sewer standard is 100 mg/L) which is also a violation of the facility's DERM Fat, Oil and Grease Discharge Control Annual Operating Permit (GDO Permit #2261).

Be advised that discharging, or allowing discharges in excess of the sanitary sewer standards constitutes violations of the facility's Fats, Oils and Grease Discharge Control Annual Operating Permit (GDO #2261) and of Chapter 24, Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-29, of Chapter 24, inasmuch as it shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any

Delivering Excellence Every Day

lawful order of the Director of the Department of the Environmental Resources Management (DERM) or his designee, or any condition, limitation or restriction which is part of an operating permit.

Section 24-42.4.(2)(d)(vi) of Chapter 24, inasmuch as it shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained, allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits.

Based on the above and pursuant to the authority granted to me under Chapter 24, Miami-Dade County Environmental Protection Ordinance, I am hereby ordering you to:

- 1) Upon receipt of this NOTICE, immediately CEASE and DESIST from any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.
- 2) Within sixty (60) days of receipt of this Notice, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for changes in equipment and/or processes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said plans shall include at a minimum the following:
 - a) All existing plumbing lines, drainage fixtures, solids separators, grease interceptors/ grease traps and sampling points. All lines that receive or can receive waste from fixtures that can discharge food waste or Fats, Oil and Grease (FOG) shall be labeled grease waste (GW) to distinguish it from sanitary waste.
 - b) A FOG control device sized bases on calculations that include peak flow rates, FOG and solids loading rate, and a maximum pump out frequency of sixty (60) days. FOG loading shall include all FOG sources, including exhaust hoods. For self-cleaning exhaust hoods, the manufacturer's specifications for peak discharge shall be included.
 - c) All drainage fixtures located in food and beverage preparation areas shall be routed through a grease interceptor. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods
 - d) Sampling point located after the point of no further treatment. The sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle. An alternative to a manufactured sampling point (device) is a double sanitary cross with a PVC-CAP on the bottom of the vertical axis to create the sampling sump and a clean-out cap on top. Minimum diameter for the vertical axis is 4-inches; minimum depth of the sump is 6 inches.
 - e) Isometric diagram(s) with existing and proposed plumbing lines, fixtures, solids separators, FOG control devices and sampling points. Grease waste lines shall be labeled GW.
 - f) Solids separation prior to existing or proposed FOG control devices that require a flow control device or are not certified to handle solids.

- 3) Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
- 4) Within one hundred and eighty (180) days of receipt of this Notice, complete the required improvements.

For appropriate handling, include the subject permit number (GDO-2261) referencing this facility on all submittals filled with this Department and direct said submittals to DERM, attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, FL 33136-3912.

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN ASSESSMENT OF CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, OF CHAPTER 24 OF THE CODE OF MIAMI-DADE COUNTY, FLORIDA, THE MIAMI-DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the above, please contact the undersigned at 305-372-6546 or via email at StreetE@miamidade.gov.

Sincerely,

Eric T. Streett

Dear Mr. Garcia:

**NOTICE OF VIOLATION AND ORDERS
FOR CORRECTIVE ACTION**

On March 9, 2016, May 24, 2016, July 15, 2016 and on November 14, 2016, inspections performed by Department of Regulatory and Economic Resources Division of Environmental Resources Management (DERM) staff found the current in-ground fat, oil and grease (FOG) control pretreatment device does not meet the minimum requirements for the subject facility. During the inspections samples taken from the effluent of the facility's current FOG control device revealed levels above the standard for oil and grease (O&G) discharges to the public sanitary sewer system (specifically, the sample results were 162.6 mg/L, 221.9 mg/L, 224 mg/L and 679.7 mg/L respectively, while the O&G sanitary sewer standard is 100 mg/L) which is also a violation of the facility's DERM Fat, Oil and Grease Discharge Control Annual Operating Permit (GDO Permit #2339).

Be advised that discharging, or allowing discharges in excess of the sanitary sewer standards constitutes violations of the facility's Fats, Oils and Grease Discharge Control Annual Operating Permit (GDO #2339) and of Chapter 24, Miami-Dade County Environmental Protection Ordinance, specifically:

Delivering Excellence Every Day

Section 24-29, of Chapter 24, inasmuch as it shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director of the Department of the Environmental Resources Management (DERM) or his designee, or any condition, limitation or restriction which is part of an operating permit.

Section 24-42.4.(2)(d)(vi) of Chapter 24, inasmuch as it shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained, allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits.

Based on the above and pursuant to the authority granted to me under Chapter 24, Miami-Dade County Environmental Protection Ordinance, I am hereby ordering you to:

- 1) Upon receipt of this NOTICE, immediately CEASE and DESIST from any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.
- 2) Within sixty (60) days of receipt of this Notice, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for changes in equipment and/or processes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said plans shall include at a minimum the following:
 - a) All existing plumbing lines, drainage fixtures, solids separators, grease interceptors/ grease traps and sampling points. All lines that receive or can receive waste from fixtures that can discharge food waste or Fats, Oil and Grease (FOG) shall be labeled grease waste (GW) to distinguish it from sanitary waste.
 - b) A FOG control device sized bases on calculations that include peak flow rates, FOG and solids loading rate, and a maximum pump out frequency of sixty (60) days. FOG loading shall include all FOG sources, including exhaust hoods. For self-cleaning exhaust hoods, the manufacturer's specifications for peak discharge shall be included.
 - c) All drainage fixtures located in food and beverage preparation areas shall be routed through a grease interceptor. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods
 - d) Sampling point located after the point of no further treatment. The sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle. An alternative to a manufactured sampling point (device) is a double sanitary cross with a PVC-CAP on the bottom of the vertical axis to create the sampling sump and a clean-out cap on top. Minimum diameter for the vertical axis is 4-inches; minimum depth of the sump is 6 inches.
 - e) Isometric diagram(s) with existing and proposed plumbing lines, fixtures, solids separators, FOG control devices and sampling points. Grease waste lines shall be labeled GW.

- f) Solids separation prior to existing or proposed FOG control devices that require a flow control device or are not certified to handle solids.
- 3) Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
- 4) Within one hundred and eighty (180) days of receipt of this Notice, complete the required improvements.

For appropriate handling, include the subject permit number (GDO-2339) referencing this facility on all submittals filed with this Department and direct said submittals to DERM, attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, FL 33136-3912.

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN ASSESSMENT OF CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, OF CHAPTER 24 OF THE CODE OF MIAMI-DADE COUNTY, FLORIDA, THE MIAMI-DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the above, please contact the undersigned at 305-372-6546 or via email at StreeE@miamidade.gov.

Sincerely,

Eric T. Streett

Re: Unauthorized discharge to the sanitary sewer system from Di Papa's Restaurant located at, near or in the vicinity of 9871-9877 N Kendall Drive, Miami, Florida (folio # 030-4032-009-0100). DERM file no. GDO-2378.

Dear Messrs. Louro, Levy and Hayun:

NOTICE OF VIOLATION
AND
ORDERS FOR CORRECTIVE ACTION

Inspections of the subject property by representatives of this department on July 21, 2016 and August 26, 2016 revealed discharges of oil and grease of 3110 mg/l and 2030 mg/l respectively, above the sanitary sewer discharge limit of 100 mg/l, in violation of condition no. 9 of your Fats, Oil and Grease Discharge Control Annual Operating Permit (GDO-2378) and in violation of Chapter 24, Miami-Dade County Code.

Be advised that the above constitutes violations of Chapter 24, Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-29, of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director of DERM or his designee, or any condition, limitation or restriction which is part of an operating permit.

Section 24-42.4(2)(d)(vi), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits."

Based on the above and pursuant to the authority granted to me under Chapter 24, Miami-Dade County Environmental Protection Ordinance, you are hereby ordered to:

1. Upon receipt of this NOTICE, "CEASE and DESIST" from allowing any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.

Delivering Excellence Every Day

2. Within forty-five days (45) of receipt of this NOTICE, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for plumbing, equipment and/or processes changes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said submittal shall include, at a minimum, the following.
 - A. Existing facility plan showing all food and beverage preparation areas (back of house areas) and kitchen equipment/appliances.
 - B. Existing facility sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing drains/lines, plumbing fixtures, solids separators, Fats, Oils and Grease (FOG) Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - C. Existing building sewer plan showing all connections from the facility to the public sanitary sewer system.
 - D. An evaluation of the existing FOG Control Device (e.g., grease interceptor) capacity. The evaluation shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4 (e.g., 100 mg/L Oil & Grease).
 - E. If the evaluation demonstrates that the existing FOG Control Device (e.g., grease interceptor) does not provide sufficient capacity, submit "proposed" sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing and proposed drains/lines, plumbing fixtures, solids separators, FOG Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing and proposed drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing and proposed drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - iv. Sizing calculations for the proposed FOG Control Device (e.g., grease interceptor). The calculations shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4 (e.g., 100 mg/L Oil & Grease).

- v. The FOG Control Device (e.g., grease interceptor) shall be located to allow uninterrupted maintenance and inspection; i.e., the system shall be accessible all times and not require intervention to access, clean and inspect.
 - vi. Sampling point located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling. Sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle.
 - vii. All drainage fixtures located in food and beverage preparation areas (back of house areas) shall be connected to a FOG Control Device. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods.
3. Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
 4. Within one hundred twenty (120) days of receipt of this Notice, complete the required improvements.

For appropriate handling, include the subject permit number (GDO-2378) referencing this facility on all submittals filed with this Department and direct said submittals to DERM, attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, Florida 33136-3912

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, MIAMI DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the above, please contact Carlos Hernandez, P.E., Chief of the Wastewater Permitting Section of this office at 305-372-6714 or via email at Hernac@miamidade.gov.

Sincerely,

Francisco Verrire

Re: Buffet Miami, LLC DBA Royal Buffet & Grill, formerly Guo Food Service LLC DBA China Buffet located at, near, or in the vicinity of 11379 SW 40 St., Miami-Dade County, Florida (Folio No. 30-4018-094-0010) (GDO-3376).

Dear Messrs. Lukes, Xiao and Guo:

**NOTICE OF VIOLATION AND ORDERS
FOR CORRECTIVE ACTION**

Inspections conducted by staff of the Department of Regulatory and Economic Resources, Division of Environmental Resources Management (DERM) during the period May 12 through June 14, 2016 revealed the on-site restaurant was being operated with violations including, a breached and leaking in-ground fat, oil and grease (FOG) control devices (i.e grease trap).. There were also no records available on site for the servicing of the FOG control devices and an outdoor mop sink was observed in the open, allowing for rain water collection and subsequent discharges to the public sanitary sewers. Field Notices of Violation were issued on May 12, 2016 to Guo Food Services, LLC DBA China Buffet and on May 24, 2016, to GRI-EQY (Concord) LLC. Due to continued non-compliance, Uniform Civil Violation Notices (UCVN) #B100660 and UCVN #B100661 were issued to GUO Food Service LLC DBA China Buffet and GRI EQY, LLC c/o EQY Portfolio Investor (GRI) Inc. respectively. On August 18, 2016 a Notice of Intended Court Action (NOICA) was issued to both GRI-EQY (Concord) LLC c/o EQY Portfolio Investor (GRI) Inc. and Guo Food Service, LLC that were posted at the subject site on August 19, 2016.

Working on it every day

Be advised, these findings constitute violation of the facility's Fats, Oils and Grease Discharge Control Annual Operating Permit (GDO #3376) and/or Chapter 24, Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-18, of Chapter 24, inasmuch as no person shall operate or permit, cause or allow the operation of any facility which will reasonable be expected to be a source of air pollution, ground pollution or water pollution, without a valid operating permit;

Section 24-21, of Chapter 24, inasmuch as the owner or operator of any facility installed or operating under the provisions of this chapter shall cause to be maintained and kept such records of the operation data and control tests as may be required by the Director to indicate the operating efficiency of such facility, and to show whether or not such facility is causing pollution as herein defined, and to furnish all such information and data concerning the operation of the facility as the Director may require from time to time.

Section 24-29, of Chapter 24, inasmuch as it shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director of the Department of the Environmental Resources Management (DERM) or his designee, or any condition, limitation or restriction which is part of an operating permit.

Section 24-42 (1), of Chapter 24, inasmuch as it shall be unlawful for any person to throw, drain, run or otherwise discharge into any of the waters of this County, or to cause, permit or suffer to be thrown, run, drained, allowed to seep, or otherwise discharged into such water any organic or inorganic matter which shall: (a) Breach the values set forth in Section 24-42(2); (b) Cause water pollution as herein defined; or (c) Cause a nuisance or sanitary nuisance as herein defined.

Section 24-42.4(2)(b), of Chapter 24, inasmuch as it shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained, allowed to seep, or otherwise discharged into such sewer any storm water.

Based on the above and pursuant to the authority granted to me under Chapter 24, Miami-Dade County Environmental Protection Ordinance, I am hereby ordering you to:

- 1) Immediately upon receipt of this NOTICE, cease and desist from all activities which allows the discharge of storm water into the sanitary sewer system.
- 2) Within seven (7) days of receipt of this NOTICE, provide to this Department the last three (3) service/pump out receipts for the facility's FOG control system.
- 3) Within seven (7) days of receipt of this NOTICE, complete temporary emergency repairs to all three (3) breached in-ground tanks (IGT's) that are part of the facility's FOG control system. The temporary repairs shall eliminate all discharges to ground or groundwater. If emergency repairs cannot be made or do not eliminate all discharges to ground and/or groundwater, the facility shall cease and desist from all discharges to the breached IGTs within seven (7) days from receipt of this NOTICE.
- 4) Within eight (8) days of receipt of this NOTICE, contact this Department to perform a fieldinspection of the tanks to confirm that emergency temporary repairs have been completed. All IGTs shall be clean and empty during the field inspection. If emergency

repairs are not completed or do not eliminate all discharges to ground and/or groundwater, the facility shall immediately cease and desist from all discharges to the breached IGTs..

- 5) Within thirty (30) days of receipt of this NOTICE, submit proof that improvements have been made to the external sink area to prevent storm water from entering the sanitary sewer system or that the external sink has been removed and/or the line leading to sanitary sewers has been sealed.
- 6) Within thirty (30) days of receipt of this Notice, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for the replacement of the FOG control system at the subject facility, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said plans shall include at a minimum the following:
 - a) All existing plumbing lines, drainage fixtures, solids separators, grease interceptors/ grease traps and sampling points. All lines that receive or can receive waste from fixtures that can discharge food waste or Fats, Oil and Grease (FOG) shall be labeled grease waste (GW) to distinguish it from sanitary waste.
 - b) A FOG control device (i.e., grease interceptor(s)) sized based on calculations that include peak flow rates, FOG and solids loading rates, and a maximum pump out frequency of sixty (60) days. FOG loading shall include all FOG sources, including food preparation and cleaning associated with eat-in and take-out meal. For self-cleaning exhaust hoods, the manufacturer's specifications for peak discharge shall be included in the sizing of the grease interceptors.
 - c) All drainage fixtures located in food and beverage preparation areas shall be routed through a grease interceptor. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods
 - d) Sampling point located after the point of no further treatment. The sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle.
 - e) Isometric diagram(s) with existing and proposed plumbing lines, fixtures, solids separators, FOG control devices and sampling points. Grease waste lines shall be labeled GW.
 - f) Solids separation prior to existing or proposed grease interceptors that require a flow control device or are not certified to handle solids.
- 7) Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements/replacements.
- 8) Within ninety (90) days of receipt of this Notice, complete the required improvements.

For appropriate handling, include the subject permit number (GDO-3376) referencing this facility on all submittals filled with this Department and direct said submittals to DERM, attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, FL 33136-3912.

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN ASSESSMENT OF CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION,

FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, OF CHAPTER 24 OF THE CODE OF MIAMI-DADE COUNTY, FLORIDA, THE MIAMI-DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the above, please contact the undersigned at 305-372-6546 or via email at StreeE@miamidade.gov.

STORMWATER FIELD NOTICE OF VIOLATION AND ORDER TO CEASE AND DESIST

NAME: Mr. YANG GUO (GDO-3376) Date: May 12, 2016

ADDRESS: 11379 SW 40 ST Miami, FL 33165

PREMISES: GUO FOOD SERVICES, LLC DBA CHINA BUFFET, Miami-Dade County, Florida

YOU ARE HEREBY NOTIFIED that an inspection on 5/12/2016 of the premises listed above revealed the following conditions:

- 1. Immediately upon receipt of this Notice, CEASE and DESIST from all activities which allows the discharge of storm water into sanitary sewer system.
2. Within 24 hours of receipt of this Notice, implement the necessary corrective actions to ensure that no rain water enters the sewer system.
3. Within 24 hours of receipt of this Notice, submit the necessary receipts or photos showing violation has been corrected.

in violation of the referenced Sections of Chapter 24, of the Miami-Dade County Code.

- Section 24-42.4(2)(b), which states in pertinent part, 'It shall be unlawful for any person to throw, drain run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run drained, allowed to seep, or otherwise discharged into such sewer any storm water.'
Section 24-42.4(2)(a)(i), which states in pertinent part, 'It shall be unlawful for any person to throw, drain run or otherwise discharge into a sewer designed to carry storm water, or to cause, permit, allow or suffer to be thrown, run, drained, allowed to seep, or otherwise discharged into such sewer: Domestic sewage, industrial waste, liquid waste or other waste.'

Therefore, pursuant to Chapter 24, of the Code of Miami-Dade County, you are hereby ordered to:

- 1. Upon receipt of this Order, immediately CEASE AND DESIST the above-specified violation(s);
AND
2. Within 1 days of receipt of this NOTICE, submit in writing to the Pollution Regulation Division, information regarding the action(s) undertaken to correct the above stated condition(s).

Failure to comply with the above may result in either the issuance of a Uniform Civil Violation Notice (UCVN), pursuant to Chapter 8-CC of Miami-Dade County Code, requiring corrective action(s) and payment of a civil penalty and/or the initiation of formal enforcement action by DERM, subjecting you to the enforcement and penalty provisions of Sections 24-29 and 24-30, Miami-Dade County Code.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

GREASE DISCHARGE OPERATING PERMIT FIELD NOTICE OF VIOLATION

VG 5

Date: May 24, 2016 GDO#: 3376 Facility Contact: Mr. DAVID LUKES

Facility Name: GRI-EQY (CONCORD) LLC

Facility Address: 1600 NE MIAMI GARDENS DRIVE NORTH MIAMI BEACH, FL 33179 (Property Owner) Le

Permit (check): IGT AGT MGRU AGRU NGT

YOU ARE HEREBY NOTIFIED that an inspection on 5/12/2016 of the premises listed above revealed the following conditions in violations of Sections 24-15.3 and/or 24-18 of Chapter 24, of the Miami-Dade County Code.

- Accumulated wastes in grease pretreatment system utilized by this facility must be removed (record in Maintenance Log, provide receipts).
- Grease pretreatment system has the following structural/mechanical deficiencies:

Be advised that the grease pretreatment system is breached. All three tanks must be temporarily repaired within 7 days (receipts must be submitted for review.) Tanks must be replaced with 90 days. NOTE: Replacement requires approval from DERM and building department.

- Grease pretreatment system is not maintained according to approved plans, and/or drawings, and/or manufacturer's specifications.

- Grease pretreatment system maintenance records and maintenance log not kept on site/not maintained for 3 years/insufficient information recorded on Log.

- Access to the facility is required/Access to grease pretreatment system is required.

- Grease pretreatment sampling point is not accessible/improperly constructed.

- Other violations or additional comments (If citing other violations, describe violation and corrective actions):

Violation regarding facility located at 11379 SW 40 ST Miami, FL 33165 DBA China Buffet C/o Mr. Yang Guo. Folio # 30-4018-094-0010 Uniform Civil Violation # B100660 Issued on 5/24/2016.

Corrective actions to address violations noted below may require approval from appropriate Building Department and DERM

- No grease pretreatment system available.
- Grease pretreatment system does not have a sampling point.
- Fixtures having the potential to introduce grease into sewers are not connected to a grease pretreatment system.

Be advised that you are required to correct the above violation(s) within 90 days/hours of receipt of this NOTICE. Failure to correct the violation(s) noted above within the above-referenced time period may result in enforcement action pursuant Section 24-29, Miami-Dade County Code. Documentation (e.g. photographs, waste disposal manifests, invoices for work performed, etc.) which demonstrates the above-noted have been corrected, may be submitted by facsimile to Attn: Navila Bernal at (305) 372-6545, or mailed to the address indicated above, or scanned and emailed to: Navila.Bernal@miamidade.gov within the above-referenced time period in order to avoid additional penalties.

Failure to comply with the above may result in either the issuance of a Uniform Civil Notice (UCVN), pursuant to Chapter 8-CC of the Miami-Dade County Code, requiring corrective action(s) and payment of a civil penalty and/or the initiation of formal enforcement action by, DERM, subjecting you to the enforcement and penalty provisions of Sections 24-29 and 24-30, Miami-Dade County Code.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

PLEASE GOVERN YOURSELF ACCORDINGLY

Re: Uniform Civil Violation Notice (UCVN) No. B100661 issued for a violation at the property located at, near or in the vicinity of 11379 SW 40 St, Miami-Dade County, Florida, identified by Folio # 30-4018-094-0010.

NOTICE OF INTENDED COURT ACTION

Dear Mr. Lukes:

A review of Department records revealed that you have failed to complete the necessary requirements to achieve compliance with the above referenced UCVN issued on June 14, 2016 (copy enclosed).

In order to redress the violation, the Department will at this time provide you with the opportunity to enter into an administrative Consent Agreement within 15 (fifteen) days of receipt of this NOTICE. Said agreement shall provide, at a minimum, for correction of the violation and payment of accrued penalties and administrative costs.

This NOTICE constitutes your final opportunity to resolve this case. If you fail to enter into a Consent Agreement, or if the violation is not corrected within the time period specified above, your case may be prepared and forwarded for further enforcement action in a court of competent jurisdiction without further notice.

Sincerely,

[Handwritten signature]

DERM File No. GDO-3414

Re: Unauthorized discharge to the sanitary sewer system from Dolores, But You Can Call Me Lolita Restaurant located at, near or in the vicinity of 1000 S. Miami Avenue, Miami, Miami-Dade County, Florida (folio #01-0207-040-1010)

Dear Messrs. Galan & Harris:

**NOTICE OF VIOLATION AND
ORDERS FOR CORRECTIVE ACTION**

On July 13, 2016, a representative of the Miami-Dade County Department of Regulatory and Economic Resources, Division of Environmental Resources Management (DERM) conducted an inspection at the above-referenced facility. Based on sample results, this inspection revealed that the grease interceptor for the in-ground grease trap (IGT) is not functioning properly. Sample results (1,820 mg/l) showed an exceedance of local limits for oil and grease discharges to sanitary sewer. DERM conducted a follow-up inspection on September 2, 2016, less than thirty days from the last pump-out of the IGT. Sample results (906 mg/l) from this inspection revealed a repeated violation of sanitary sewer standards for oils and grease. Pursuant to Section 24-42.4, Code of Miami-Dade County, effluent from the grease interceptor shall not exceed the sanitary sewer standard for oil and grease (EPA Method 1664) of 100 mg/l.

Be advised that discharging, or allowing the discharge of any industrial wastes into a sanitary sewer system constitutes violations of the facility's Grease Discharge Operating Permit (GDO-3414) and of Chapter 24, Code of Miami-Dade County, specifically:

Section 24-29, Code of Miami-Dade County, which states in pertinent part: "It shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director or the Director's designee, or any condition, limitation or restriction which is part of an operating permit."

Section 24-42.4(2)(d)(III), Code of Miami-Dade County, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer ... any pollutant in amounts which alone or in combination with other discharges will cause obstruction to the flow in the publicly owned treatment works."

Section 24-42.4(2)(d)(VI), Code of Miami-Dade County, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits."

Delivering Excellence Every Day

Pursuant to the provisions of Section 24-31(6) of Chapter 24, Miami-Dade County Code, whenever a violation of this chapter occurs or exists, or has occurred or existed, any person, individually or otherwise, who has legal, beneficial, or equitable interest in the real property upon which such violation occurs or exists, or has occurred or existed, shall be jointly and severally liable for said violation regardless of fault and regardless of knowledge of the violation.

Based on the above and pursuant to the authority granted to me under Chapter 24, Code of Miami-Dade County, I am hereby ordering you to:

1. Upon receipt of this Notice, "CEASE and DESIST" from allowing any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.
2. Within forty-five days (45) of receipt of this Notice, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for plumbing, equipment and/or processes changes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said submittal shall include, at a minimum, the following:
 - A. Existing facility plan showing all food and beverage preparation areas (back of house areas) and kitchen equipment/appliances.
 - B. Existing facility sanitary drainage (plumbing) drawings with plan and isometric views, that include:
 - i. Existing drains/lines, plumbing fixtures, solids separators, Fats, Oils and Grease ("FOG") Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled "Existing Sanitary".
 - iii. All existing drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled "Existing GW" (Grease Waste).
 - C. Existing building sewer plan showing all connections from the facility to the public sanitary sewer system.
 - D. An evaluation of the existing FOG Control Device (e.g., grease interceptor) capacity. The evaluation shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4, Code of Miami-Dade County sewer standards for Oil and Grease EPA Method 1664 (i.e. 100 mg/L).
 - E. If the evaluation demonstrates that the existing FOG Control Device (e.g., grease interceptor) does not provide sufficient capacity, submit "proposed" sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing and proposed drains/lines, plumbing fixtures, solids separators, FOG Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing and proposed drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing and proposed drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - iv. Sizing calculations for the proposed FOG Control Device (e.g., grease interceptor). The calculations shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4, Code of Miami-Dade County sewer standards for Oil and Grease EPA Method 1664 (i.e. 100 mg/L).

- v. The FOG Control Device (e.g., grease interceptor) shall be located to allow uninterrupted maintenance and inspection and shall be accessible at all times and not require intervention to access, clean and inspect the system.
 - vi. Sampling point located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling. Sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle.
 - vii. All drainage fixtures located in food and beverage preparation areas (back of house areas) shall be connected to a FOG Control Device. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods.
3. Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
 4. Within one hundred twenty (120) days of receipt of this Notice, complete the required improvements.

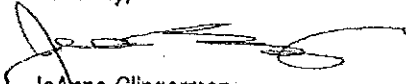

For appropriate handling, include the subject permit number (GDO-3414) referencing this facility on all submittals filed with this Department and direct said submittals to DERM, Attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, Florida 33136-3912.

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, CODE OF MIAMI-DADE COUNTY.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the technical requirements contained in the orders of this Notice, please contact Carlos Hernandez, P.E., Chief of the Wastewater Permitting Section of this office at 305-372-6714 or via email at Hernac@miamidade.gov. If you have any questions regarding the enforcement action, please contact the undersigned at (305) 372-6917 or by email at clingj@miamidade.gov. For further information on DERM's FOG program, please go to the following link: <http://www.miamidade.gov/permits/grease-discharge.asp>.

Certified Mail No. 7009 0080 0000 1050 5942
 Return Receipt Requested

Re: Required repair and maintenance of grease interceptors and associated appurtenances for Miami-Dade County Public Schools.

Dear Mr. Krtausch:

Representatives of the Department of Regulatory and Economic Resources, Division of Environmental Resources Management (DERM) conducted inspections relative to grease discharge annual operating permits held for select Miami-Dade County Public Schools. Results of these inspections revealed various issues that adversely impact the successful operation of grease pretreatment systems that discharge to sanitary sewers at the sites listed below:

#	SCHOOL	GDO #	ADDRESS	DOCUMENTED ISSUE	CAT
1	Hialeah Gardens Ele	3455	9702 NW 130 St	Compromised tanks 2 & 3	1
2	Miami Lakes Technical Cntr	3595	5780 NW 158 St	No outlet tee - Bakery system	1
3	Miami Springs Middle	3629	150 S Royal Poinciana Blvd	Compromised tank structure	1
4	Madison Middle	3652	3400 NW 87 St	Compromised outlet tee	1
5	Hadley PLC "A"	3745	8400 NW 7 St	Compromised tank	1
6	Dunbar Elementary	3774	505 NW 20 St	Compromised interceptor	1
7	Fulford Elementary	3452	16140 NE 18 Ave	Use of metal lid not MH cover	2
8	Doctor Krop Senior High	3562	1410 NE 215 St	Two ill-fitting clean-out caps	2
9	County Club Middle	9349	18305 NW 75 Pl	Uncovered outdoor mop basin	2
10	Lake Stevens Middle	3490	18484 NW 48 Pl	Grease in effluent	3
11	Scott Lake Elementary	3596	1160 NW 175 St	Grease in effluent	3
12	Flagami Elementary	3729	920 SW 76 Ave	Grease in effluent	3
13	Frederick Douglass Elem	3768	314 NW 12 St	Grease in effluent	3
14	Jane S. Roberts Elementary	3857	14850 Cottonwood Circle	Grease in effluent	3
15	Westland Hialeah Senior	10086	4000 W 18 Ave	Grease in adjacent storm drain	3

It is anticipated that resolution of these issues will require the repair or replacement of in-ground grease interceptor structures (Category 1), modification of external structures (Category 2) and routine pump out of grease wastes (Category 3). Field notices previously issued for problems with these systems during the years 2011, 2012 and 2013 are attached.

Be advised that the above constitutes violations of Chapter 24 of the Code of Miami-Dade County, specifically:

Delivering Excellence Every Day

Section 24-18, of said ordinance, inasmuch as no person shall operate or permit, cause or allow the operation of any facility which will reasonably be expected to be a source of air pollution, ground pollution or water pollution, in violation of any condition, limitation or restriction which is part of an operating permit; and

Section 24-27, of said Ordinance, which states in pertinent part: "No person shall cause, or allow to be caused, any nuisance or sanitary nuisance as defined in Sections 24-5 and/or 24-28 herein"; and

Section 24-28, of said Ordinance, inasmuch as it shall be unlawful for any person to cause, maintain or allow to be caused or maintained any sanitary nuisance as defined in Section 24-5 herein; and

Section 24-29, of said Ordinance, inasmuch as it shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director or the Director's designee, or any condition, limitation or restriction, which is part of an operating permit; and

Section 24-42.4(2)(a), of said Ordinance, inasmuch as it shall be unlawful for any person to throw, drain, run or to cause, permit or suffer to be thrown, run, drained or allowed to seep or otherwise discharge domestic sewage, industrial waste, liquid waste or other waste into a sewer designed to carry storm water; and

Section 24-42.4(2)(b), of said Ordinance, inasmuch as it shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained, allowed to seep, or otherwise discharged into such sewer any storm water.

Based on the above, and pursuant to the authority granted to me under Chapter 24 of the Code of Miami-Dade County and in order to comply with your Miami-Dade County permits and the June 6, 2013 Federal Clean Water Act Consent Decree, you are hereby ordered to:

1. Within **ten (10) days** of receipt of this notice, submit to this office for review, a timeline for the required repairs and/or maintenance of grease interceptor systems for each school listed above.
2. Upon approval of the above-mentioned timeline by this Department, submit appropriate engineering plans for approval, and complete maintenance, repair or replacement of the pretreatment systems in a timely fashion. Engineering plans signed and sealed by a Professional Engineer are required for structural repairs or replacement.
3. Within **thirty (30) days** of completing the required actions for the fifteen (15) schools listed above, provide written notification, documentation and disposal receipts for actions taken to comply with this Notice.

Any person aggrieved by any action or decision of the DERM Director, may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

March 31, 2014

If you have any questions concerning the above, please contact me at 305-372-6514 or email brownb@miamidade.gov. Thank you for your attention to this matter.

Sincerely,

A handwritten signature in cursive script that reads "Barbara Brown".

GREASE DISCHARGE OPERATING PERMIT FIELD NOTICE OF VIOLATION

Inspection Date: 10/22/13 GDO# 3455
Facility Name: Hialeah Gardens Elementary
Facility Contact: Rachel Autler
Address: 9702 NW 130 St Hialeah Gardens, Fl 33018
Permit (check): IGT AGT MGRU AGRU NGT

You are hereby NOTIFIED that an inspection of the above PREMISES revealed violations of the conditions of your operating permit GDO# 3455 and/or requires specific documentation noted below:

- Grease pretreatment device is not in operational status.
- Contents of automatic/manual grease recovery unit require removal.
- Contents of grease interceptor require removal by a PERA Permitted Liquid Waste Transporter. A receipt for proper disposal shall be submitted to this Department.
- Outlet tee in grease interceptor requires repair.
- Breached wall or bottom of grease interceptor requires repair.
- Access to grease pretreatment device is required.
- Access to the facility is required.
- *Official documentation or approved plans from the appropriate building department indicating that the facility has been approved with no grease pretreatment must be submitted to this Department. (For NGT)

Other A receipt indicating that the grease interceptor was repaired. (see notice of violation issued 2/20/13)

Be advised that you are required to correct the above violation(s) within 7 days/hours of receipt of this NOTICE. Failure to correct the violation(s) noted above within the above-referenced time period shall result in enforcement action under Section 24-29, of the code of Miami-Dade County. Documentation (e.g. photographs, waste disposal manifests, invoices for work performed, etc.) which demonstrates the above-noted violation(s) have been corrected must be submitted by facsimile to Attn: Vivian Mendez EE & C Section at (305) 372-6410 (or mailed to the address indicated above) within the above-referenced time period in order to void additional penalties. 6545

Failure to comply with the above may result in either the issuance of a Uniform Civil Notice (UCVN), pursuant to Chapter 8CC of Miami-Dade County, requiring corrective action(s) and payment of a civil penalty of the initiation of formal enforcement action by this Department, subjecting you to the enforcement and penalty provisions of Sections 24-29 and 24-30. of the Code of Miami-Dade County.

POLLUTION PREVENTION FIELD NOTICE

GENERAL CONDITIONS

Mr. Jaime Torrens
Miami-Dade County Public Schools
1450 NE 24 Ave Suite 923
Miami, FL 33132

DATE: 3/23/12
PERMIT #: SDS-3595
FILE #: ---

RE: Grease traps at Miami Lakes Educational Center
5780 NW 158 St Miami FL, 33014

Dear Mr. Torrens:

As the owner or operator of the above-referenced facility, this NOTICE is to advise you that an inspection of the subject facility on March 23, 2012 found the following condition(s) which require(s) your immediate attention:

- ① The grease trap (five tanks in series) located behind the school cafeteria needs to be pumped out.
- ② Grease trap behind the school bakery does not have an outlet "T" installed. Discharges of grease from this grease trap (two tanks in parallel) into the sewer system must cease immediately. The grease trap must be pumped out and the inlet pipe must be installed.

7010 1870 0000 2683 3167

Please note that in order to avoid further enforcement action, you are required to submit in writing to the appropriate Section indicated below, within (30) days of receipt of this NOTICE, information regarding the action(s) undertaken to correct the above-stated condition(s). Be advised that failure to comply with any of the aforementioned requirement(s) and/or to correct these condition(s) may result in the Department Issuing a Uniform Civil Violation Notice which carries a mandatory civil penalty and a requirement to correct the violation.

FAX number: 305-372-6476

If the facility requires a DERM Operating Permit and additional inspections must be conducted due to continuing code violations beyond the time frame allotted, the above-referenced facility may be required to pay an additional fee at the time of permit renewal.

If you have any questions, please contact the appropriate Section as marked below:

RE: Outdoor Map Sinks

Dear Mr. Tuff:

As the owner or operator of the above-referenced facility, this NOTICE is to advise you that an inspection of the subject facility on July 9, 2013 found the following condition(s) which require(s) your immediate attention:

Rainwater cannot enter the sanitary sewer system. Please correct this violation with regard to your outdoor map sinks.
Call me when this is corrected so we can schedule a time for me to visit and photo-document the correction.

Please note that in order to avoid further enforcement action, you are required to submit in writing to the appropriate Section indicated below, within 30 days of receipt of this NOTICE, information regarding the action(s) undertaken to correct the above-stated condition(s). Be advised that failure to comply with any of the aforementioned requirement(s) and/or to correct these condition(s) may result in the Department issuing a Uniform Civil Violation Notice which carries a mandatory civil penalty and a requirement to correct the violation.

If the facility requires a PERA Operating Permit and additional inspections must be conducted due to continuing code violations beyond the time frame allotted, the above-referenced facility may be required to pay an additional fee at the time of permit renewal.

If you have any questions, please contact the appropriate Section as marked below:

Other: must submit receipt of cleaning via fax or email.

Be advised that you are required to correct the above violation(s) within 21 days/hours of receipt of this NOTICE. Failure to correct the violation(s) noted above within the above-referenced time period shall result in enforcement action under Section 24-29, Miami-Dade County Code.

Failure to comply with the above may result in either the issuance of a Uniform Civil Notice (UCVN), pursuant to Chapter 8CC of the Miami-Dade County Code, requiring corrective action(s) and payment of a civil penalty of the initiation of formal enforcement action by, DERM, subjecting you to the enforcement and penalty provisions of Sections 24-29 and 24-30, Miami-Dade County Code.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

RE: Storm drain in back of cafeteria near grease traps

Dear Michael Krtausch :

As the owner or operator of the above-referenced facility, this NOTICE is to advise you that an inspection of the subject facility on December 13, 2013 found the following condition(s) which require(s) your immediate attention:

Due to photographic evidence of the presence of garbage and an oily sheen within the storm drain in back of your cafeteria (close to the grease traps), please pump out the contents of this storm drain and fax or email me a copy of this the receipt for this service. As per Chapter 24 of the Miami Dade County Code, only rainwater is allowed to enter the stormwater system.

Please note that in order to avoid further enforcement action, you are required to submit in writing to the appropriate Section indicated below, within (7 days) of receipt of this NOTICE, information regarding the action(s) undertaken to correct the above-stated condition(s). Be advised that failure to comply with any of the aforementioned requirement(s) and/or to correct these condition(s) may result in the DERM issuing a Uniform Civil Violation Notice which carries a mandatory civil penalty and a requirement to correct the violation.

7005116000026032469

If the facility requires a DERM Operating Permit and additional inspections must be conducted due to continuing code violations beyond the time frame allotted, the above-mentioned referenced facility may be required to pay an additional fee at the time of permit renewal.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

Re: Le Minotenn, LLC DBA Il Bolognese located at, near, or in the vicinity of 626 Lincoln Rd.,
Miami Beach, Miami-Dade County, Florida (Folio No. 02-3234-003-0060) (GDO-4230).

Dear Messrs. Schlessler and Frittella:

**NOTICE OF VIOLATION AND ORDERS
FOR CORRECTIVE ACTION**

On May 19, 2016, an inspection performed by Department of Regulatory and Economic Resources Division of Environmental Resources Management (DERM) staff found the current in-ground fat, oil and grease (FOG) control pretreatment device does not meet the minimum requirements for the subject facility. During the inspection a sample taken from the effluent of the facility's current FOG control device revealed levels above the standard for oil and grease (O&G) discharges to the public sanitary sewer system (specifically, the sample result was 796.8 mg/L while the O&G sanitary sewer standard is 100 mg/L) which is also a violation of the facility's DERM Fat, Oil and Grease Discharge Control Annual Operating Permit (GDO Permit #4230).

Be advised that discharging, or allowing discharges in excess of the sanitary sewer standards constitutes violations of the facility's Fats, Oils and Grease Discharge Control Annual Operating Permit (GDO #4230) and of Chapter 24, Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-29, of Chapter 24, inasmuch as it shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director of the Department of the Environmental Resources Management (DERM) or his designee, or any condition, limitation or restriction which is part of an operating permit.

Section 24-42.4.(2)(d)(vi) of Chapter 24, inasmuch as it shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer

Delivering Excellence Every Day

7

to be thrown, run, drained, allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits.

Based on the above and pursuant to the authority granted to me under Chapter 24, Miami-Dade County Environmental Protection Ordinance, I am hereby ordering you to:

- 1) Upon receipt of this NOTICE, immediately CEASE and DESIST from any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.
- 2) Within sixty (60) days of receipt of this Notice, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for changes in equipment and/or processes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said plans shall include at a minimum the following:
 - a) All existing plumbing lines, drainage fixtures, solids separators, grease interceptors/ grease traps and sampling points. All lines that receive or can receive waste from fixtures that can discharge food waste or Fats, Oil and Grease (FOG) shall be labeled grease waste (GW) to distinguish it from sanitary waste.
 - b) A FOG control device sized based on calculations that include peak flow rates, FOG and solids loading rate, and a maximum pump out frequency of sixty (60) days. FOG loading shall include all FOG sources, including exhaust hoods. For self-cleaning exhaust hoods, the manufacturer's specifications for peak discharge shall be included.
 - c) All drainage fixtures located in food and beverage preparation areas shall be routed through a grease interceptor. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods
 - d) Sampling point located after the point of no further treatment. The sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle. An alternative to a manufactured sampling point (device) is a double sanitary cross with a PVC-CAP on the bottom of the vertical axis to create the sampling sump and a clean-out cap on top. Minimum diameter for the vertical axis is 4-inches; minimum depth of the sump is 6 inches.
 - e) Isometric diagram(s) with existing and proposed plumbing lines, fixtures, solids separators, FOG control devices and sampling points. Grease waste lines shall be labeled GW.
 - f) Solids separation prior to existing or proposed FOG control devices that require a flow control device or are not certified to handle solids.
- 3) Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
- 4) Within one hundred and eighty (180) days of receipt of this Notice, complete the required improvements.

For appropriate handling, include the subject permit number (GDO-4230) referencing this facility on all submittals filed with this Department and direct said submittals to DERM, attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, FL 33136-3912.

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN ASSESSMENT OF CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, OF CHAPTER 24 OF THE CODE OF MIAMI-DADE COUNTY, FLORIDA, THE MIAMI-DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the above, please contact the undersigned at 305-372-6546 or via email at StreeE@miamidade.gov.

Sincerely,

Eric T. Streett

Re: Unauthorized discharge to the sanitary sewer system from Cacique's Corner Restaurant located at, near or in the vicinity of 100 West Flagler Street, Miami, Florida (folio # 01-0113-070-1070). DERM file no. GDO-4419.

Dear Mr. Roca and Mr. Blount:

NOTICE OF VIOLATION
AND
ORDERS FOR CORRECTIVE ACTION

On March 20, 2015 a representative of the Miami-Dade County Department of Regulatory and Economic Resources, Division of Environmental Resources Management (DERM), responded to a complaint of a sewage over flow at the above-referenced facility. Said inspection revealed the on-site manual grease recovery unit (MGRU) was not functioning properly resulting in the unauthorized discharge of grease to the sanitary sewer system servicing the subject property. Said discharge caused an obstruction to the sanitary sewer system resulting in a backup to the system and triggering a sewage overflow. A crew from the Miami-Dade Water and Sewer Department was dispatched to the scene to clean-out the sewer line and disinfect the impacted areas.

Be advised that discharging, or allowing the discharge of any industrial wastes into a sanitary sewer system constitutes violations the facility's Grease Discharge Operating Permit (GDO-4419) and of Chapter 24, Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-29, of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director of DERM or his designee, or any condition, limitation or restriction which is part of an operating permit."

Section 24-42.4(2)(d)(iii), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any pollutant in amounts which alone or in combination with other discharges will cause obstruction to the flow in the publicly owned treatment works."

Delivered to Recipient Every 2

Section 24-42.4(2)(d)(vi), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits."

Pursuant to the provisions of Section 24-31(6) of Chapter 24, Miami-Dade County Code, whenever a violation of this chapter occurs or exists, or has occurred or existed, any person, individually or otherwise, who has legal, beneficial, or equitable interest in the real property upon which such violation occurs or exists, or has occurred or existed, shall be jointly and severally liable for said violation regardless of fault and regardless of knowledge of the violation.

Based on the above and pursuant to the authority granted to me under Chapter 24, Miami-Dade County Environmental Protection Ordinance, I am hereby ordering you to:

1. Upon receipt of this NOTICE, "**CEASE and DESIST**" from allowing any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.
2. Within sixty days (60) of receipt of this NOTICE, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for changes in equipment and/or processes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said plans shall include at a minimum the following:
 - a. All existing plumbing lines, drainage fixtures, solids separators, grease interceptors / grease traps and sampling points. All lines that receive or can receive waste from fixtures that can discharge food waste or Fats, Oil and Grease (FOG) shall be labeled grease waste (GW) to distinguish it from sanitary waste.
 - b. A FOG control device sized based on calculations that include peak flow rates, FOG and solids loading rate, and a maximum pump-out frequency of sixty (60) days. FOG loading shall include all FOG sources, including exhaust hoods. For self-cleaning exhaust hoods, the manufacturer's specifications for peak discharge shall be included.
 - c. All drainage fixtures located in food and beverage preparation areas shall be routed through a grease interceptor. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods.
 - d. Sampling point located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling. Sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle. An alternative to a manufactured sampling point (device) is a double sanitary cross with a PVC-CAP on the bottom of the vertical axis to create the sampling sump and a cleanout cap on top. Minimum diameter for the vertical axis is 4-inches; minimum depth of the sump is 6 inches.
 - e. Isometric diagram(s) with existing and proposed plumbing lines, fixtures, solids separators, FOG control devices and sampling points. Grease waste lines shall be labeled GW.
 - f. Solids separation prior to existing or proposed FOG control devices that require a flow control device or are not certified to handle solids.

3. Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
4. Within one hundred eighty (180) days of receipt of this Notice, complete the required improvements.

For appropriate handling, include the subject permit number (GDO-4419) referencing this facility on all submittals filed with this Department and direct said submittals to DERM, attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, Florida 33136-3912

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, MIAMI DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the above, please contact Carlos Hernandez, P.E., Chief of the Wastewater Permitting Section of this office at 305-372-6714 or via email at Hernac@miamidade.gov.

Re: Unauthorized discharge to the sanitary sewer system from Divino Ceviche Restaurant located at, near or in the vicinity of 160 Giralda Avenue, Coral Gables, Florida (folio # 03-4108-007-3340). DERM file no. GDO-6035.

Dear Mr. Encalada and Ms. Yarur:

NOTICE OF VIOLATION
AND
ORDERS FOR CORRECTIVE ACTION

Inspections of the subject property by representatives of this department on March 29, 2016 and July 13, 2016 revealed discharges of oil and grease of 288 mg/l and 1060 mg/l respectively, above the sanitary sewer discharge limit of 100 mg/l, in violation of condition no. 9 of your Fats, Oil and Grease Discharge Control Annual Operating Permit (GDO-6035) and in violation of Chapter 24, Miami-Dade County Code.

Be advised that the above constitutes violations of Chapter 24, Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-29, of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director of DERM or his designee, or any condition, limitation or restriction which is part of an operating permit.

Section 24-42.4(2)(d)(vi), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits."

Based on the above and pursuant to the authority granted to me under Chapter 24, Miami-Dade County Environmental Protection Ordinance, you are hereby ordered to:

- 1. Upon receipt of this NOTICE, "CEASE and DESIST" from allowing any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.

Handwritten signature: Carlos A. Gimenez

2. Within forty-five days (45) of receipt of this NOTICE, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for plumbing, equipment and/or processes changes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said submittal shall include, at a minimum, the following.
 - A. Existing facility plan showing all food and beverage preparation areas (back of house areas) and kitchen equipment/appliances.
 - B. Existing facility sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing drains/lines, plumbing fixtures, solids separators, Fats, Oils and Grease (FOG) Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - C. Existing building sewer plan showing all connections from the facility to the public sanitary sewer system.
 - D. An evaluation of the existing FOG Control Device (e.g., grease interceptor) capacity. The evaluation shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4 (e.g., 100 mg/L Oil & Grease).
 - E. If the evaluation demonstrates that the existing FOG Control Device (e.g., grease interceptor) does not provide sufficient capacity, submit "proposed" sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing and proposed drains/lines, plumbing fixtures, solids separators, FOG Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing and proposed drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing and proposed drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - iv. Sizing calculations for the proposed FOG Control Device (e.g., grease interceptor). The calculations shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4 (e.g., 100 mg/L Oil & Grease).

- v. The FOG Control Device (e.g., grease interceptor) shall be located to allow uninterrupted maintenance and inspection; i.e., the system shall be accessible all times and not require intervention to access, clean and inspect.
 - vi. Sampling point located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling. Sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle.
 - vii. All drainage fixtures located in food and beverage preparation areas (back of house areas) shall be connected to a FOG Control Device. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods.
3. Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
 4. Within one hundred twenty (120) days of receipt of this Notice, complete the required improvements.

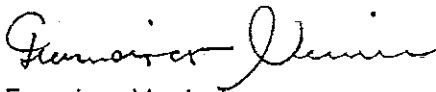

For appropriate handling, include the subject permit number (GDO-6035) referencing this facility on all submittals filed with this Department and direct said submittals to DERM, attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, Florida 33136-3912

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, MIAMI DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the above, please contact Carlos Hernandez, P.E., Chief of the Wastewater Permitting Section of this office at 305-372-6714 or via email at Hernac@miamidade.gov.

Sincerely,

Francisco Verrire

Re: Unauthorized discharge to the sanitary sewer system from Cantinetta Restaurant located at, near or in the vicinity of 607 Lincoln Road, Miami Beach, Miami-Dade Florida (folio # 02-3234-005-0030). DERM file no. GDO-4516.

Dear Mr. Frittella:

**NOTICE OF VIOLATION
AND
ORDERS FOR CORRECTIVE ACTION**

On May 19, 2016 and July 20, 2016 a representative of the Miami-Dade County Department of Regulatory and Economic Resources, Division of Environmental Resources Management (DERM), inspected the above-referenced facility and collected samples from the final discharge point of the on-site grease recovery unit. Sample results revealed that the on-site grease recovery unit is not functioning properly and/or sized correctly for the facility resulting in the unauthorized discharge of grease to the sanitary sewer system servicing the subject property. Additionally, on May 20, 2016, DERM issued an Educational Field Notice of Violation ((Edu-FNOV) requiring that the referenced facility maintain maintenance records and logs for three (3) years.

Be advised that discharging, or allowing the discharge of any industrial wastes into a sanitary sewer system and failure to maintaining required records constitute violations of the facility's Grease Discharge Operating Permit (GDO-4516) and of Chapter 24, Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-18(18), of said Ordinance, which states in pertinent part : "It shall be unlawful for any source of... potential pollution to operate in violation of any condition, limitation or restriction which is part of an operating permit...issued by the Director or the Director's designee."

Section 24-29, of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director or the Director's designee."

Section 24-42.4(2)(d)(iii), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any pollutant in amounts which alone or in combination with other discharges will cause obstruction to the flow in the publicly owned treatment works."

Section 24-42.4(2)(d)(vi), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits."

Pursuant to the provisions of Section 24-31(6) of Chapter 24, Miami-Dade County Code, whenever a violation of this chapter occurs or exists, or has occurred or existed, any person, individually or otherwise, who has legal, beneficial, or equitable interest in the real property upon which such violation occurs or exists, or has occurred or existed, shall be jointly and severally liable for said violation regardless of fault and regardless of knowledge of the violation.

Based on the above and pursuant to the authority granted to me under Chapter 24, Miami-Dade County Environmental Protection Ordinance, I am hereby ordering you to:

1. Upon receipt of this NOTICE, "**CEASE and DESIST**" from allowing any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.
2. Within forty-five days (45) of receipt of this NOTICE, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for plumbing, equipment and/or processes changes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said submittal shall include, at a minimum, the following.
 - A. Existing facility plan showing all food and beverage preparation areas (back of house areas) and kitchen equipment/appliances.
 - B. Existing facility sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing drains/lines, plumbing fixtures, solids separators, Fats, Oils and Grease (FOG) Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - C. Existing building sewer plan showing all connections from the facility to the public sanitary sewer system.
 - D. An evaluation of the existing FOG Control Device (e.g., grease interceptor) capacity. The evaluation shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4 (e.g., 100 mg/L Oil & Grease).
 - E. If the evaluation demonstrates that the existing FOG Control Device (e.g., grease interceptor) does not provide sufficient capacity, submit "proposed" sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing and proposed drains/lines, plumbing fixtures, solids separators, FOG Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing and proposed drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing and proposed drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - iv. Sizing calculations for the proposed FOG Control Device (e.g., grease interceptor). The calculations shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4 (e.g., 100 mg/L Oil & Grease).
 - v. The FOG Control Device (e.g., grease interceptor) shall be located to allow uninterrupted maintenance and inspection; i.e., the system shall be accessible all times and not require intervention to access, clean and inspect.
 - vi. Sampling point located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling. Sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle.

- vii. All drainage fixtures located in food and beverage preparation areas (back of house areas) shall be connected to a FOG Control Device. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods.
3. Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
4. Within one hundred twenty (120) days of receipt of this Notice, complete the required improvements.

For appropriate handling, include the subject permit number (GDO-4516) referencing this facility on all submittals filed with this Department and direct said submittals to DERM, attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, Florida 33136-3912

In addition to complying with the above orders, immediately initiate record keeping in accordance with GDO-4516 requirements.

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, MIAMI DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the above, please contact Carlos Hernandez, P.E., Chief of the Wastewater Permitting Section of this office at 305-372-6714 or via email at Hernac@miamidade.gov.

Sincerely,

Sharon Crabtree

DERM File No. GDO-5457

Re: Unauthorized discharge to the sanitary sewer system from Pizza Rustica Restaurant located at, near or in the vicinity of 667 Lincoln Road, Miami, Florida (folio #02-3234-219-0030)

Dear Messrs. Piroso and Sitt:

**NOTICE OF VIOLATION AND
ORDERS FOR CORRECTIVE ACTION**

On May 19, 2016, a representative of the Miami-Dade County Department of Regulatory and Economic Resources, Division of Environmental Resources Management (DERM) responded to a referral from the City of Miami Beach regarding grease blockages in the public sanitary sewer line. This inspection revealed that the onsite manual grease recovery unit (MGRU) was not functioning properly and a "Grease Discharge Operating Permit Field Notice of Violation" was issued requiring the replacement of the grease pretreatment system. On May 24, 2016, DERM conducted a follow-up inspection within five days of the MGRU being serviced and cleaned. Samples collected at the sampling point revealed violations of sanitary sewer standards pursuant to Section 24-42.4, Code of Miami-Dade County.

Be advised that discharging, or allowing the discharge of any industrial wastes into a sanitary sewer system constitutes violations of the facility's Grease Discharge Operating Permit (GDO-5457) and of Chapter 24, Code of Miami-Dade County, specifically:

Section 24-29, Code of Miami-Dade County, which states in pertinent part: "It shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director or the Director's designee, or any condition, limitation or restriction which is part of an operating permit."

Section 24-42.4(2)(d)(iii), Code of Miami-Dade County, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer ... any pollutant in amounts which alone or in combination with other discharges will cause obstruction to the flow in the publicly owned treatment works."

Section 24-42.4(2)(d)(vi), Code of Miami-Dade County, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits."

Delivering Excellence Every Day

Pursuant to the provisions of Section 24-31(6) of Chapter 24, Miami-Dade County Code, whenever a violation of this chapter occurs or exists, or has occurred or existed, any person, individually or otherwise, who has legal, beneficial, or equitable interest in the real property upon which such violation occurs or exists, or has occurred or existed, shall be jointly and severally liable for said violation regardless of fault and regardless of knowledge of the violation.

Based on the above and pursuant to the authority granted to me under Chapter 24, Code of Miami-Dade County, I am hereby ordering you to:

1. Upon receipt of this Notice, **"CEASE and DESIST"** from allowing any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.
2. Within forty-five days (45) of receipt of this Notice, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for plumbing, equipment and/or processes changes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said submittal shall include, at a minimum, the following:
 - A. Existing facility plan showing all food and beverage preparation areas (back of house areas) and kitchen equipment/appliances.
 - B. Existing facility sanitary drainage (plumbing) drawings with plan and isometric views, that include:
 - i. Existing drains/lines, plumbing fixtures, solids separators, Fats, Oils and Grease ("FOG") Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled "Existing Sanitary".
 - iii. All existing drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled "Existing GW" (Grease Waste).
 - C. Existing building sewer plan showing all connections from the facility to the public sanitary sewer system.
 - D. An evaluation of the existing FOG Control Device (e.g., grease interceptor) capacity. The evaluation shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4, Code of Miami-Dade County sewer standards for Oil and Grease EPA Method 1664 (i.e. 100 mg/L).
 - E. If the evaluation demonstrates that the existing FOG Control Device (e.g., grease interceptor) does not provide sufficient capacity, submit "proposed" sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing and proposed drains/lines, plumbing fixtures, solids separators, FOG Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing and proposed drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing and proposed drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - iv. Sizing calculations for the proposed FOG Control Device (e.g., grease interceptor). The calculations shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4, Code of Miami-Dade County sewer standards for Oil and Grease EPA Method 1664 (i.e. 100 mg/L).

- v. The FOG Control Device (e.g., grease interceptor) shall be located to allow uninterrupted maintenance and inspection and shall be accessible at all times and not require intervention to access, clean and inspect the system.
 - vi. Sampling point located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling. Sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle.
 - vii. All drainage fixtures located in food and beverage preparation areas (back of house areas) shall be connected to a FOG Control Device. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods.
3. Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
 4. Within one hundred twenty (120) days of receipt of this Notice, complete the required improvements.

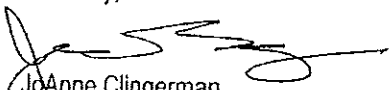

For appropriate handling, include the subject permit number (GDO-5457) referencing this facility on all submittals filed with this Department and direct said submittals to DERM, Attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, Florida 33136-3912.

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, CODE OF MIAMI-DADE COUNTY.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the technical requirements contained in the orders of this Notice, please contact Carlos Hernandez, P.E., Chief of the Wastewater Permitting Section of this office at 305-372-6714 or via email at Hernac@miamidade.gov. If you have any questions regarding the enforcement action, please contact the undersigned at (305) 372-6917 or by email at clingj@miamidade.gov. For further information on DERM's FOG program, please go to the following link: <http://www.miamidade.gov/permits/grease-discharge.asp>.

Re: Unauthorized discharge to the sanitary sewer system from Divino Ceviche Restaurant located at, near or in the vicinity of 160 Giralda Avenue, Coral Gables, Florida (folio # 03-4108-007-3340). DERM file no. GDO-6035.

Dear Mr. Encalada and Ms. Yarur:

NOTICE OF VIOLATION
AND
ORDERS FOR CORRECTIVE ACTION

Inspections of the subject property by representatives of this department on March 29, 2016 and July 13, 2016 revealed discharges of oil and grease of 288 mg/l and 1060 mg/l respectively, above the sanitary sewer discharge limit of 100 mg/l, in violation of condition no. 9 of your Fats, Oil and Grease Discharge Control Annual Operating Permit (GDO-6035) and in violation of Chapter 24, Miami-Dade County Code.

Be advised that the above constitutes violations of Chapter 24, Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-29, of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director of DERM or his designee, or any condition, limitation or restriction which is part of an operating permit.

Section 24-42.4(2)(d)(vi), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits."

Based on the above and pursuant to the authority granted to me under Chapter 24, Miami-Dade County Environmental Protection Ordinance, you are hereby ordered to:

- 1. Upon receipt of this NOTICE, "CEASE and DESIST" from allowing any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.

Handwritten signature/initials

2. Within forty-five days (45) of receipt of this NOTICE, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for plumbing, equipment and/or processes changes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said submittal shall include, at a minimum, the following.
 - A. Existing facility plan showing all food and beverage preparation areas (back of house areas) and kitchen equipment/appliances.
 - B. Existing facility sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing drains/lines, plumbing fixtures, solids separators, Fats, Oils and Grease (FOG) Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - C. Existing building sewer plan showing all connections from the facility to the public sanitary sewer system.
 - D. An evaluation of the existing FOG Control Device (e.g., grease interceptor) capacity. The evaluation shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4 (e.g., 100 mg/L Oil & Grease).
 - E. If the evaluation demonstrates that the existing FOG Control Device (e.g., grease interceptor) does not provide sufficient capacity, submit "proposed" sanitary drainage (plumbing) drawings, plan and isometric, that include:
 - i. Existing and proposed drains/lines, plumbing fixtures, solids separators, FOG Control Devices (e.g., grease interceptors) and sampling point.
 - ii. All existing and proposed drains/lines not connected to a FOG Control Device (e.g., grease interceptor) labeled Existing Sanitary.
 - iii. All existing and proposed drains/lines connected to a FOG Control Device (e.g., grease interceptor) labelled Existing GW (Grease Waste).
 - iv. Sizing calculations for the proposed FOG Control Device (e.g., grease interceptor). The calculations shall incorporate proposed equipment and/or processes changes and include peak flow rate, FOG and solids loading rate, and pump-out (cleaning) frequency (e.g., 30, 60 or 90 days). FOG loading shall include all FOG sources: FOG generated by preparing meals and cleaning associated with eat-in, take-out and drive-through meals. The capacity of FOG Control Device (e.g., grease interceptor) shall be sufficient to produce an effluent that complies with Section 24-42.4 (e.g., 100 mg/L Oil & Grease).

- v. The FOG Control Device (e.g., grease interceptor) shall be located to allow uninterrupted maintenance and inspection; i.e., the system shall be accessible all times and not require intervention to access, clean and inspect.
 - vi. Sampling point located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling. Sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle.
 - vii. All drainage fixtures located in food and beverage preparation areas (back of house areas) shall be connected to a FOG Control Device. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods.
3. Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
 4. Within one hundred twenty (120) days of receipt of this Notice, complete the required improvements.

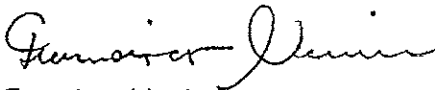

For appropriate handling, include the subject permit number (GDO-6035) referencing this facility on all submittals filed with this Department and direct said submittals to DERM, attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, Florida 33136-3912

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29, MIAMI DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the above, please contact Carlos Hernandez, P.E., Chief of the Wastewater Permitting Section of this office at 305-372-6714 or via email at Hernac@miamidade.gov.

Sincerely,

Francisco Verrire

Re: Unauthorized discharge to the sanitary sewer system from Red South Beach Hotel located at, near or in the vicinity of 3010 Collins Avenue, Miami Beach, Florida (folio # 02-3226-001-1200). DERM file no. GDO-7590.

Dear Mr. Nemni:

**NOTICE OF VIOLATION
AND
ORDERS FOR CORRECTIVE ACTION**

On September 1, 2015 a representative of the Miami-Dade County Department of Regulatory and Economic Resources, Division of Environmental Resources Management (DERM), responded to a complaint of a grease overflow from the on-site grease recovery system at the above-referenced facility. Said inspection did not reveal evidence that the on-site grease recovery system had overflowed but apparently the discharge of grease to the sidewalk and street occurred when an employee accidentally spilled used fryer oil while in the process of transferring the oil to the yellow grease container. The impacted areas were subsequently cleaned and disinfected. However, Department staff did observe that the on-site grease recovery system is a prohibited system, allowing the unauthorized discharge of grease to the sanitary sewer system servicing the subject property.

Be advised that discharging, or allowing the discharge of any industrial wastes into a sanitary sewer system constitutes violations the facility's Grease Discharge Operating Permit (GDO-7590) and of Chapter 24, Miami-Dade County Environmental Protection Ordinance, specifically:

Section 24-29, of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to violate any of the provisions of this chapter, any lawful rules and regulations promulgated under this chapter, any lawful order of the Director of DERM or his designee, or any condition, limitation or restriction which is part of an operating permit."

Section 24-42.4(2)(d)(iii), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any pollutant in amounts which alone or in combination with other discharges will cause obstruction to the flow in the publicly owned treatment works."

Section 24-42.4(2)(d)(vi), of said Ordinance, which states in pertinent part: "It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to be thrown, run, drained or allowed to seep, or otherwise discharged into such sewer any effluents in excess of local limits."

Delivering Excellence Every Day

Based on the above and pursuant to the authority granted to me under Chapter 24, Miami-Dade County Environmental Protection Ordinance, I am hereby ordering you to:

1. Upon receipt of this NOTICE, "CEASE and DESIST" from allowing any further unauthorized discharges to the publicly owned sanitary sewer system at the subject location.
2. Within sixty days (60) of receipt of this NOTICE, submit to this Department for review, formal plans signed and sealed by a Florida Professional Engineer for changes in equipment and/or processes, which shall correct the current violations and prevent future violations of the provisions of Chapter 24 at the subject facility. Said plans shall include at a minimum the following:
 - a. All existing plumbing lines, drainage fixtures, solids separators, grease interceptors / grease traps and sampling points. All lines that receive or can receive waste from fixtures that can discharge food waste or Fats, Oil and Grease (FOG) shall be labeled grease waste (GW) to distinguish it from sanitary waste.
 - b. A FOG control device sized based on calculations that include peak flow rates, FOG and solids loading rate, and a maximum pump-out frequency of sixty (60) days. FOG loading shall include all FOG sources, including exhaust hoods. For self-cleaning exhaust hoods, the manufacturer's specifications for peak discharge shall be included.
 - c. All drainage fixtures located in food and beverage preparation areas shall be routed through a grease interceptor. Drainage fixtures include, but are not limited to: floor drains, floor sinks, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, and self-cleaning exhaust hoods.
 - d. Sampling point located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling. Sampling point shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle. An alternative to a manufactured sampling point (device) is a double sanitary cross with a PVC-CAP on the bottom of the vertical axis to create the sampling sump and a cleanout cap on top. Minimum diameter for the vertical axis is 4-inches; minimum depth of the sump is 6 inches.
 - e. Isometric diagram(s) with existing and proposed plumbing lines, fixtures, solids separators, FOG control devices and sampling points. Grease waste lines shall be labeled GW.
 - f. Solids separation prior to existing or proposed FOG control devices that require a flow control device or are not certified to handle solids.
3. Upon approval by this Department, obtain the appropriate permits and commence with the implementation of the required improvements.
4. Within one hundred eighty (180) days of receipt of this Notice, complete the required improvements.

For appropriate handling, include the subject permit number (GDO-7590) referencing this facility on all submittals filed with this Department and direct said submittals to DERM, attn. Carlos Hernandez, P.E., Chief, Wastewater Permitting Section, 701 NW 1st Court, 7th Floor, Miami, Florida 33136-3912.

BE ADVISED THAT FAILURE TO COMPLY WITH THE ABOVE MAY RESULT, AT A MINIMUM, IN CIVIL PENALTIES AND THE PAYMENT OF ALL DEPARTMENTAL COSTS INCURRED IN THE INVESTIGATION AND SETTLEMENT OF THIS CASE. IN ADDITION, FAILURE TO COMPLY MAY RESULT IN YOUR CASE BEING PREPARED FOR FORMAL ENFORCEMENT ACTION IN A COURT OF COMPETENT

**JURISDICTION PURSUANT TO THE ENFORCEMENT AND PENALTY PROVISIONS OF SECTION 24-29,
MIAMI DADE COUNTY ENVIRONMENTAL PROTECTION ORDINANCE.**

Any person aggrieved by any action or decision of the DERM Director may appeal said action or decision to the Environmental Quality Control Board (EQCB) by filing a written notice of appeal along with submittal of the applicable fee, to the Code Coordination and Public Hearings Section of DERM within fifteen (15) days of the date of the action or decision by DERM.

If you have any questions concerning the above, please contact Carlos Hernandez, P.E., Chief of the Wastewater Permitting Section of this office at 305-372-6714 or via email at Hernac@miamidade.gov.

Sincerely,

Mark J. Pettit
Environmental Code Enforcement Officer II

**LIQUID WASTE TRANSPORTERS
 ANNUAL OPERATING PERMIT**

DESCRIPTION OF FACILITY/EQUIPMENT

This document, issued under the provisions of Chapter 24, Miami-Dade County Code (Dade County Environmental Protection Ordinance), shall be valid from April 01, 2016 through March 31, 2017. The above named permittee, is hereby authorized to operate as a Liquid Waste Transportation business from the above location, and with the equipment bearing the 2 identifying sticker(s) included with this permit.

This facility is subject to conditions listed below and in the following pages (if any) of this permit.

SPECIFIC CONDITIONS

1. Correctly completed monthly reporting forms and corresponding fees are required to be submitted to the Department on/or before the 20th of the following month.
2. Monthly reports shall include the LW monthly reporting form, a copy of the disposal manifest for each time waste is dumped, copies of the dump tickets from the disposal facility, and a summary sheet of the amount of waste dumped on each trip to the disposal facility, along with the appropriate monthly permit fees.
3. No waste other than residential septic tank, restaurant grease trap and RER approved industrial waste waters shall be transported under this permit.
4. No waste from an industrial facility or industrial holding tank shall be pumped out unless previous approval is obtained from this department. All approved industrial waste waters transported shall be listed separately on the Liquid Waste Transporters Monthly Report, detailing name of source, address, date, amount of waste, and location of disposal.
5. No hazardous waste shall be transported under this permit.
6. All waste transportation equipment shall be maintained in good working order at all times. Valves, hoses, tanks, etc., shall be properly maintained and shall not leak.
7. All waste material shall be deposited (dumped) at an approved disposal site. The only approved disposal sites in Miami-Dade County are: Virginia Key and Black Point sewage treatment plants.
8. No waste shall be deposited at any other site or structure in Miami-Dade County.

GENERAL CONDITIONS

9. The applicant, by acceptance of this document, agrees to operate and maintain the subject

A handwritten signature in black ink, appearing to read "Lee N. Hefty". The signature is written over a horizontal line.

Lee N. Hefty, Assistant Director **FOR**
 Department of Regulatory and Economic Resources,
 Environmental Resources Management

operation so as to comply with the requirements of Chapter 24 of the Code of Miami-Dade County.

10. If for any reason, the applicant does not comply with or will be unable to comply with any condition or limitation specified on this document the applicant shall immediately notify and provide the department with the following information: (a) a description of and cause of non-compliance; and (b) the period of non-compliance including exact dates and times; or, if not corrected, the anticipated time the non-compliance is expected to continue, and steps taken to reduce, eliminate, and prevent recurrence of the non-compliance. The applicant shall be responsible for any and all damages which may result and may be subject to enforcement action by the department for penalties or revocation of this document.
11. As provided in Section 24-15 of the Code of Miami-Dade County, the prior written approval of the Department shall be obtained for any alteration to this facility.
12. The issuance of this document does not convey any vested rights or any exclusive privileges. Nor does it authorize any injury to public or private property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations. Nor does it relieve the applicant from liability for harm or injury to human health or welfare or property.
13. This document is required to be posted in a conspicuous location at the facility site during the entire period of operation.
14. This document is not transferable. Upon sale or legal transfer of the property or facility covered by this document, the applicant shall notify the department within thirty(30) days. The new owner must apply for a permit within thirty (30) days. The applicant shall be liable for any non-compliance of the source until the transferee applies for and receives a transfer of this document.
15. The applicant, by acceptance of this document, specifically agrees to allow access to the named source at reasonable times by department personnel presenting credentials for the purposes of inspection and testing to determine compliance with this document and department rules.
16. This document does not indicate a waiver of or approval of any other department permit that may be required for other aspects of this facility.
17. This document does not constitute an approval by the Department or certification that the applicant is in compliance with applicable laws, ordinances, rules or regulations. The applicant acknowledges that separate enforcement actions may be initiated by the Department and that this document does not constitute compliance with orders issued in conjunction with enforcement actions for correction of violations.
18. Failure to comply with any condition of this document, or the requirements of Chapter 24, Code of Miami-Dade County may subject the applicant to the penalty provisions of said Chapter including civil penalties up to \$25,000 per day per offense and/or criminal penalties of \$500 per day or not less than \$1000 per day for violations of Section 24-42.4, Sanitary Sewer Discharge Limitations and Pretreatment Standards and/or sixty (60) days in jail.

Liquid Waste Transporter Electronic Manifest

1. Click on the link below

<https://www8.miamidade.gov/apps/rer/LiquidWasteTransporterElectronicManifest/Default>

The following window will open

The screenshot shows the application's home page. At the top right is the Miami-Dade County logo. Below the title are links for 'Home' and 'Help'. The main content area includes a 'Home' section with introductory text and a 'Login' section. The login section has radio buttons for 'DERM LWT Permit #' (selected) and 'LWT Company Name'. Below these are input fields for 'DERM LWT Permit #' (a dropdown menu), 'email', 'Password', and 'Waste Type' (another dropdown menu). There are 'Submit' and 'Clear' buttons, and links for 'Forgot Password?' and 'Change Password'.

2. Select your permit number from the drop down menu.

This close-up screenshot shows the 'DERM LWT Permit #' dropdown menu open. A red arrow points to the dropdown arrow icon. The menu lists several permit numbers and their corresponding company names:

- 4 - UNITED SITE SERVICES OF FLORIDA, INC.
- 5 - NECA PORTABLE TOILET
- 15 - ROSE SEPTIC TANK CO., INC.
- 18 - P & R SMITH CORP.
- 19 - CARLOS RIVERO PLUMBING & SEPTIC TANK CONTRACTOR, INC.
- 29 - BAY PLUMBING CO.
- 32 - JOE'S SEPTIC TANK
- 33 - FRIENDLY JOHN, INC.

3. If the permit number is unknown then select LWT Company Name and use the dropdown menu

Refer to your Liquid Waste Transporter Operating Permit for additional reporting requirements.

Result:	COMPLETE	Report Date:	28-APR-2017
----------------	-----------------	---------------------	--------------------

Customer Name:	Canplas Industries Ltd.
Test To:	NSF SE 15741-2016 Accelerated Grease Interceptor Protocol
Description:	Model 40100A04 Two 100 GPM Grease Interceptors Plumbed In Series
Test Type:	Test Only
Test Location:	NSF International, Ann Arbor, MI
Job Number:	J-00256010
Project Number:	W0403380
Project Manager:	Ann O'Brien

Executive Summary:	ASME A112.14.3 -2000 NSF Accelerated Protocol	PASS PASS
--------------------	--	----------------------

Thank you for having your product tested by NSF International.

Please contact your Project Manager if you have any questions or concerns pertaining to this report.

Report Authorization:

David Orton - Senior Engineer, Engineering Lab

Authority:

Paul Anderson - Director, Engineering Lab

This report shall not be reproduced, except in its entirety, without the written approval of NSF. This report does not represent NSF Certification or authorization to use the NSF Mark. Authorization to use the NSF Mark is limited to products appearing in the Company's Official NSF Listing (www.nsf.org). The results relate only to those items tested, in the condition received at the laboratory.

Executive Summary of Results

The NSF Accelerated Protocol was used in order to evaluate the capacity of two 100 GPM interceptors plumbed in series.

Capacity at 45 increments	2382 lbs
Average Efficiency at 45 increments	99%
Incremental Efficiency at 45 increments	94%

NSF Accelerated Rating Test Protocol - Purpose and summary:

The purpose of the accelerated test protocol is to evaluate the capacity of large grease interceptors above the rating requirements found in ASME A112.14.3 and PDI G101. The protocol consists of two phases. During phase 1, the minimum allowable capacity is established according to ASME A112.14.3 (2 lbs/gpm) and/or PDI G101 (2.25 lbs/gpm). Phase 1 concludes at breakthrough or 15 increments, whichever comes first. During phase 2, the increments are accelerated by adding lard directly through the lid in quantities specified by the manufacturer. Then a standard test increment is run using the test sinks and melted lard (0.2 lbs/gpm). Phase 2 concludes at breakthrough or 30 additional increments, whichever comes first.

Detailed grease quantities added during each phase

Phase 1	Pounds per increment added to sinks	20 lbs
Phase 2	Pounds per increment added to sinks	20 lbs
	Pounds per increment added through lid	50 lbs

ASME A112.14.3 Section 3.3.1 Media Analysis

COMPLETE

pH value	7.1
Lard specific gravity	0.881

MIAMI-DADE WATER AND SEWER AUTHORITY DEPARTMENT
NORTH DISTRICT WASTEWATER TREATMENT PLANT
 2575 N.E. 151 STREET, NORTH MIAMI, DADE COUNTY, FLORIDA

IN SERVICE DATE: November, 1979

BASIC DESIGN DATA
 1986

I.	Type of Treatment	Primary and Pure Oxygen Activated Sludge		
II.	Plant Capacity, mgd	80		
	Design Peaking Factor, design peak hourly flow/rated capacity	2.4		
	Historical Peaking Factor, peak hourly flow/annual average day flow	2.0		
III.	Raw Wastewater Characteristics	<u>Avg.</u>	<u>Max.</u>	<u>Min.</u>
	BOD ₅ Raw	mg/l	200	290
	BOD ₅ Recycled Sludge Waste	mg/l	30	30
	BOD ₅ Total (Entering Process)	mg/l	230	320
	Soluble BOD ₅ (41% estimated)	mg/l	90	130
	T.S.S.	mg/l	220	390
	V.S.S.	mg/l	175	300
	C.O.D.	mg/l	500	670
	H ₂ S-Raw	mg/l	10.0	15.0
	pH	---	7.0	7.7
	Temperature	°F	85	86
	Grease	mg/l	32	34
	Chlorides	mg/l	700	1500
IV.	Inlet Works			
	a. Screens			
	Number of Screens	6		
	Normal Operation	4		
	Average Flow each Screen, mgd	20		
	Screen Width, ft.	6		
	Bar Size, in.	3/8		
	Bar Screen Opening, in.	3/4		
	b. Grit Removal Facilities - Removal from Primary Sludge			
	Number of Cyclone Degritter - Classifiers	6		
	Normal Operation	4		
	Flow Capacity each Unit, mgd	0.5		
	Grit Removal Particle Size	250 mesh		
	c. Raw Sewage Flow Measurement - Primary Clarifier Influent			
	Number of Magnetic Flow Meters	4		

Total Minimum Horsepower, each Train 250

c. Oxygenation System Performance

Food to Biomass Ratio, f/m	0.4 to 0.95
Average Dissolved Oxygen, mg/l	5
Minimum Effluent Dissolved Oxygen, mg/l	4
Oxygen Utilization, % of Supply	90
Oxygen Supplied, tons/day/train	25
Oxygen Dissolution Capacity, tons/day	22.5
Recirculation Ratio, percent of ADF	30 - 50
Detention Time with 30% recirc. sludge, hrs.	1.2
Volumetric Loading, pounds of BOD per 1000 cu.ft./day	184
Oxygen to BOD Ratio, pounds applied per pound applied	1.3

d. Oxygen Generation Facilities

Number of Cryogenic Plants	2
Capacity, tons/day	50
Oxygen Purity, percent	95
Output Pressure, psig	2.5
Number of Air Compressors	3
Normal Operation	1
Number of Storage Tanks	1
Capacity of Storage Tanks, ton	300
Liquid Vaporization Capacity, tons/day	100

VII. Secondary Clarifiers - Center Drive, Multiple Pick-Up Points

a. Tanks

Number of Tanks	8
Average Flow, each Tank, mgd	10
Design Peak Flow, each Tank, mgd	24
Historical Peak Flow, each Tank, mgd	20.4
Diameter of Tank, ft.	160
Depth, ft.	12
Surface Area, each Tank, sq. ft.	20,100
Volume, cu. ft.	271,200
Volume, mg	2.02
Detention Time with 30% recirc. sludge, hrs.	4.8
Average Overflow Rate, gpd/sq. ft.	495
Design Peak Overflow Rate, gpd/sq. ft.	1,188
Historical Peak Overflow Rate gpd/sq.ft.	990
Weir Length, ft.	500
Average Weir Overflow Rate, gpd/ft.	20,000
Design Peak Weir Overflow Rate, gpd/ft.	48,000
Historial Peak Weir Overflow Rate, gpd/ft.	40,000

b. Sludge Recirculation Pumps - Variable Speed (centrifugal)

Number of Pumping Stations	2
Number of Pumps, each Station	3
Normal Operation, each Station	2
Capacity, each Pump, mgd	10
TDH, ft.	40

Number	7
Capacity, each, lbs/day	8,000

Chlorinators

Number, Total	7
Number of 8,000 lbs/day units	4
Number of 2,000 lbs/day units	3
Units - Effluent Disinfection, 8000 lbs/day	4
Units - Odor Control, 2000 lbs/day	1
Units - Non Potable Water Disinfection, 2000 lbs/day	1
Units - Standby, 2000 lbs/day	1

XI. Effluent Pumping Station - Variable Speed Centrifugal, Eddy Current Drive

Number of Pumps	4
Normal Operation	3
Capacity, each Pump, mgd	75
TDH, ft.	47
HP, each Pump	900
Firm Capacity of Station, mgd	225

XII. Outfall Dispersal System

Diameter, in.	90
Total Length, ft.	22,550
Distance Off Shore, ft.	11,000
Dispersal Depth, Invert, ft.	108
Diffuser - Right Angle to Outfall - Center Feed	
Length, ft.	370
Number of Outlets	12
Distance between Outlets, ft.	40
Size of Outlets, in.	24

XIII. Electric Generators - Stand-by Operation

Diesel Engine Generators	
Number of Generators	4
Normal Operation	3
Capacity, each Generator, KW	2,750

XIV. Odor Control

Hydrogen Sulfide Scrubbers	
Pretreatment Building, Number of Scrubbers	2
Primary Tanks - Domes, Number of Scrubbers	4
Primary Tanks - Effluent Troughs, Number of Scrubbers	1
Secondary Clarifiers - Domes and Troughs, Number of Scrubbers	8

XV. Process Water System

Service (Non-Potable) Pumps - Variable Speed (centrifugal)

Number of Pumps	2
Normal Operation	1
Capacity, each Pump, gpm	6,000
TDH, ft.	160
HP, each Pump	350

MIAMI-DADE WATER AND SEWER AUTHORITY DEPARTMENT

CENTRAL DISTRICT WASTEWATER TREATMENT PLANT, PLANT NO. 1
VIRGINIA KEY, MIAMI, DADE COUNTY, FLORIDA

IN SERVICE DATE: October, 1956

BASIC DESIGN DATA
1986

I. Type of Treatment:	High Rate Activated Sludge		
II. Plant Capacity, mgd, annual average	48		
Design Peaking Factor, design peak hourly flow/rated capacity	1.5		
Historical Peaking Factor, peak hourly flow/annual average day flow	1.5		
III. Raw Wastewater Characteristics	<u>Avg.</u>	<u>Max.</u>	<u>Min.</u>
BOD ₅ Raw	mg/l 190	290	50
BOD ₅ Recycled Sludge Waste	mg/l 30	30	30
BOD ₅ Total (Entering Process)	mg/l 220	320	80
Soluble BOD ₅ (41% estimated)	mg/l 90	130	35
T.S.S.	mg/l 195	390	60
V.S.S.	mg/l 175	300	55
C.O.D.	mg/l 500	670	225
H ₂ S-Raw	mg/l 10.0	15.0	7.0
H ₂ S-After Aerated Grit Chamber	mg/l 6.5	10	4.5
pH	---	7.0 7.7	6.3
Temperature	°F 85	86	78
Grease	mg/l 32	34	31
Chlorides	mg/l 1150	1600	440
IV. Inlet Works			
a. Screens	N/A		
Screening performed at Regional Pumping Stations			
b. Aerated Grit Chamber Channels			
Number of Chamber Channels	2		
Width, ft.	22.67		
Depth, ft.	13		
Length, ft.	64		
Detention Time at 76 mgd, min.	2.61		
Air, maximum cfm/lineal ft.	8.1		
Grit Removal Particle Size	250 mesh		
c. Parshall Flumes - Raw Sewage Flow Measurement			
Number of Flumes	2		
Width of Throat, ft.	5		
Head at 76 mgd, ft.	3		

Detention Time at 48 mgd, hrs.	2.44
Surface Area, each Tank, sq.ft.	14,875
Average Overflow Rate, gpd/sq.ft.	800
Design Peak Overflow Rate, gpd/sq.ft.	1,200
Historical Peak Overflow Rate, gpd/sq.ft.	1,200
Weir Length, ft.	846
Average Weir Overflow Rate, gpd/ft.	14,184
Design Peak Weir Overflow Rate, gpd/ft.	21,277
Historical Peak Weir Overflow Rate, gpd/ft.	17,730

b. Recirculation and Waste Pumps - Constant Speed (centrifugal)

Number of Pumping Stations - One each Two Tanks	2
Number of Pumps, each Station	3
Normal Operation, each Station	2
Capacity, each Pump, mgd	1.4
TDH, ft.	14
HP, each Pump	20

c. Scum Pumps - Constant Speed

Number of Pumps	2
Normal Operation	1
HP, each Pump	15

VIII. Sludge Treatment Facilities

a. Concentration Tanks

Number of Tanks	2
Average Flow, each Tank, mgd	1.4
Average Loading, each Tank, lbs/day	45,880
Capture Rate, percent	90
Diameter of Tank, ft.	55
Depth, ft.	13
Surface Area, each Tank, sq.ft.	2,376
Volume, each Tank, cu.ft.	30,800
Detention Time, hrs.	3.9
Surface Loading, gpd/sq.ft.	600
Solids Loading, ss lbs/sq.ft.	19.3

b. Concentrated Sludge Pumps - Variable Speed (plunger)

Number of Pumps	3
Normal Operation	2
Capacity, each Pump, gpm	175
TDH, ft.	60
HP, each Pump	10

c. Sludge Wastewater Pumps - Constant Speed (centrifugal)

Number of Pumps	3
Normal Operation	2
Capacity, each Pump, gpm	2,000
TDH, ft.	16
HP, each Pump	20

- XI. Effluent Pumping Station
 - Included in Central District Plant No. 2 Design Data
- XII. Outfall Dispersal System
 - Included in Central District Plant No. 2 Design Data
- XIII. Electric Generators - Stand-by Operation
 - Included in Central District Plant No. 2 Design Data
- XIV. Process Water System - Low Pressure Flushing Water System
 - Service (Non-Potable) Pumps - Constant Speed (centrifugal)

Number of Pumps	4
Normal Operation	3
Capacity, each Pump, gpm	200
TDH, ft.	66
HP, each Pump	15

MIAMI-DADE WATER AND SEWER AUTHORITY DEPARTMENT

SOUTH DISTRICT WASTEWATER TREATMENT PLANT

Screen Width, ft.	4			
Channel width, ft.	4			
Bar Size, in.	3/8			
Bar Screen Opening, in.	1			
b. Aerated Grit Chamber Channels				
Number of Chamber Channels	2			
Width, ft.	22.67			
Average Water Depth, ft.	13			
Length, ft.	64			
Detention Time at 76 mgd, min	2.61			
Air, maximum cfm/lineal ft.	8.1			
Grit Removal Particle Size	250 mesh			

Average Flow, each Tank, mgd	18.75
Design Peak Flow, each Tank, mgd	35.8
Historical Peak Flow, each Tank, mgd	31.9
Diameter of Tank, ft.	195
Depth, ft.	15
Surface Area, each Tank, sq. ft.	29,865
Volume, cu. ft.	500,000
Volume, mg	3.74
Detention Time, hrs.	4.8
Average Overflow Rate, gpd/sq. ft.	630
Design Peak Overflow Rate, gpd/sq. ft.	1,200
Historical Peak Overflow Rate, gpd/sq.ft.	1,040
Weir Length, ft.	612
Average Weir Overflow Rate, gpd/ft.	30,637
Design Peak Weir Overflow Rate, gpd/ft.	58,500
Historical Peak Weir Overflow Rate, gpd/ft.	47,180

b. Recirculation and Waste Pumps - Variable Speed (centrifugal)

Number of Pumping Stations	1
Number of Pumps, each Station	8
Normal Operation, each Station	6
Capacity, each Pump, mgd	6.25
TDH, ft.	88
HP, each Pump	150

c. Final Clarifier Dewatering - Constant Speed (centrifugal)

Number of Pumps, each Station	4
Normal Operation	2
Capacity, each Pump, gpm	2,400
TDH, ft.	55
HP, each Pump	75

d. Final Clarifier Scum Pumps - Constant Speed (centrifugal)

Number of Pumps, each Station	8
Normal Operation	4
Capacity, each Pump, gpm	330
TDH, ft.	39
HP, each Pump	7.5

VIII. Sludge Treatment Facilities

a. Concentration Tanks

Number of Tanks	2
Average Flow, each Tank, mgd	1.17
Average Loading, each Tank, lbs/day	63,677
Capture Rate, with Polymers, percent	90
Diameter of Tank, ft.	55
Depth, ft.	13
Surface Area, each Tank, sq. ft.	2,376
Volume, each Tank, cu. ft.	30,800
Detention Time, hrs.	4.7
Surface Loading, gpd/sq.ft.	161
Solids Loading - ss lbs/sq. ft.	26.8

X. Chlorination Facilities

a. Chlorine Storage

Number of One Ton Cylinders 16

b. Chlorination Equipment

Evaporators

Number 4

Capacity, each, lbs/day 8,000

Chlorinators

Number 4

Number of 8,000 lbs/day units 3

Number of 500 lbs/day units 1

XI. Effluent Pumping Station

Number of Pumps 6

Variable Speed Centrifugal - Eddy Current Drive 4

Constant Speed 2

Normal Operation 5

Capacity, each Pump, mgd 23

TDH, ft. 120

HP, each Pump 900

Firm Peak Capacity of Station, mgd 115

XII. Deep Well Disposal System

Number of Wells 9

Depth of Wells, ft. 3,200

Diameter of Wells

8 ft, in. 24

1 ft, in. 20

Capacity, each Well, mgd 9

Firm Peak Capacity of Wells, mgd 112

XIII. Electric Generators - Stand-by Operation

Diesel Engine Generators

Number of Generators 4

Normal Operation 3

Capacity, each Generator, KW 2,750

Attachment 6

38 effect and remain unchanged.

39 >>Accelerated FOG maintenance shall mean cleaning performed by utilities
40 to prevent sanitary sewer overflows caused by FOG blockages in sanitary sewer
41 systems, including but not limited to laterals, gravity mains, pump stations, and
42 air release valves.<<

43 * * *

44
45
46 >>Back of the House shall mean all areas where food is stored, processed,
47 cooked, prepared, and assembled, and cleanup areas. It does not include offices,
48 dry storage or front of the house areas.<<

49 * * *

50
51
52 >>Best Management Practices shall mean a schedule of activities,
53 prohibitions of practices, maintenance procedures, and other management
54 practices to prevent or minimize pollution.<<

55 * * *

56
57
58 >>Black Grease shall mean any FOG commingled with septic wastes
59 (bathroom wastes).<<

60 * * *

61
62
63 >>Brown Grease shall mean FOG waste collected in, or removed from, a
64 FOG control device.<<

65 * * *

66
67
68 >>Building Sewer shall mean the part of the building drainage system that
69 extends from the end of the building drain and conveys the discharge to utility or
70 non-utility owned or operated sanitary sewer system.

71
72 Building Sanitary Drains shall mean the pipes intended to receive sanitary
73 wastewater and effluent from FOG control devices where FOG control devices
74 are installed or required. FOG or food waste shall not be discharged into the
75 building sanitary drains.<<

76 * * *

77
78
79 >>Dishmachine shall mean equipment used to sanitize and does not actually
80 wash the items put inside.

81
82 Dishwasher shall mean equipment that washes and sanitizes.<<

83

* * *

>>Fats, Oils and Grease (FOG) shall mean any substance such as vegetable or animal product used in, or a byproduct of, the cooking, ~~or~~ food preparation, or cleaning process, that can cause or lead to corrosion, blockages, reduced flow, or interference with the sanitary sewer system when discharged alone or combined with other materials or waste which turns or may turn viscous or solidifies with a change in temperature or other conditions.<<

* * *

>>FOG Capacity Limit shall mean the combined FOG and solids depth equal to twenty-five (25) percent of the design hydraulic depth in any location of a FOG control device ~~designed pursuant to Chapter 64E-6, Florida Administrative Code,~~ or seventy-five (75) percent of the rated FOG and solids capacity established by third party certification.

FOG Control Device shall mean equipment designed to remove, hold and prevent the passage of FOG to onsite sewage treatment and disposal systems and sanitary sewer systems ~~FOG control devices include grease traps and grease interceptors.~~

FOG Control Device Operator shall mean a person or entity which has management control for FOG control devices which serve other FOG generators.

FOG Generator shall mean any nonresidential facility, including, but not limited to, restaurants, bakeries, hotel and cafeteria kitchens, commercial kitchens, kitchens serving hospitals, nursing homes, daycares, assisted living facilities and other healthcare facilities, food processing plants or such other nonresidential facilities that can introduce food waste or FOG into building sanitary drains, building sewers, onsite sewage treatment and disposal systems, or non-utility or utility sanitary sewer systems. A FOG generator also includes those nonresidential facilities that produce yellow grease. ~~An industrial user subject to industrial pretreatment requirements under section 24-42.4 is not included herein.~~

FOG Generator Certified Staff shall mean a FOG generator employee which has attended training prescribed by the Director or Director's designee, and has received certification for training.

FOG Liquid Waste Transporter Certified Staff shall mean a FOG Liquid Waste Transporter employee which has attended training prescribed by the Director or Director's designee, and has received certification for training.

FOG Operating Permit shall mean an operating permit issued to FOG generators or FOG control device operators pursuant to Sections 24-18 and 24-42.6.

130 FOG Sampling Point shall mean a reasonably accessible location for sampling
131 the effluent of a FOG control device.<<

132 * * *

133
134
135 >>Front of the House shall mean office space, dry storage, but shall not
136 include areas defined as all areas not included in the back of the house.<<

137 * * *

138
139
140 >>Gravity Grease Interceptor shall mean a FOG control device that primarily
141 relies on the difference in specific gravity between wastewater and FOG to affect
142 separation of FOG from wastewater.<<

143 * * *

144
145
146 >>Grease Interceptor shall mean a FOG control device,
147 connected to a building grease waste drain.

148 Grease Trap shall mean a FOG control device located between one or more
149 fixtures (e.g., three compartment sink) and a building sanitary drain or grease
150 waste drain. A grease trap does not receive waste from a building grease waste
151 drain and can be located above or below ground.

152
153 Grease Waste Drains shall mean the pipes intended to receive FOG and food
154 waste. They convey the discharge to solids separators, when installed, and FOG
155 control devices.<<

156 * * *

157
158
159 >>Hydromechanical Grease Interceptor shall mean a FOG control device that
160 is third party tested and certified, and relies on the difference in specific gravity
161 between wastewater and FOG to affect separation of FOG from wastewater, and
162 may incorporate a flow control device, air entrainment, and other means or
163 principles to improve the efficacy of separation as demonstrated by third-party
164 testing, validation and certification.<<

165 * * *

166
167
168 >>Interceptor Monitoring Alarm shall mean a system and its components
169 capable of monitoring floating and settled solids levels in a FOG control device
170 on a regular interval. The system shall trigger a visual and audible alarm at the
171 FOG Capacity Limit.

172
173 Interceptor Monitoring Device shall mean a system and its components
174 capable of monitoring floating and settled solids in a FOG control device on a
175 regular interval, triggering a visual and audible alarm at the FOG Capacity Limit,

176 and reporting data electronically to the Department at a frequency and format
177 approved by the Director or Director's designee.<<

178 * * *

181 >>Residential FOG Source shall mean a residential kitchen that can introduce
182 food waste or FOG into a building drain, building sewer, onsite sewage treatment
183 and disposal system, or non-utility or utility sanitary sewer system.<<

184 * * *

185 >>Solids Separator shall mean a separator intended to capture solids and
186 allow ~~grease~~ FOG to pass through. It is installed at the source or on the grease
187 waste drains prior to a FOG control device ~~grease trap or grease intercepter.~~<<

188 * * *

189 >>Third Party Certified shall mean a certification by an independent entity
190 that specific equipment or devices have been tested and meet or exceed standards
191 established by the certifying entity and which the certifying entity has reviewed or
192 audited the manufacturing process. The certifying entity shall be recognized by
193 the Director or Director's designee and can include, but is not limited to, the
194 National Sanitation Foundation (NSF), American Society of Mechanical
195 Engineers (ASME), Plumbing and Drainage Institute (PDI) or Canadian
196 Standards Association (CSA) or combination of these and other entities to include
197 the aforementioned requirements.<<

198 * * *

199 >>Wash-Down Area shall mean an area where FOG generators wash the back
200 of the house mats or equipment.<<

201 * * *

202 >>Yellow Grease shall mean FOG generated as a byproduct from cooking or
203 food preparation that is not mixed with water, wastewater or other waste.<<

204 * * *

205 Section 2. Section 24-8 of the Code of Miami-Dade County, Florida, is hereby

206 amended to read as follows:

207 **Sec. 24-8. Environmental Quality Control Board.**

208 A Miami-Dade County Environmental Quality Control Board is hereby
209

220 created and established, consisting of five (5) members appointed by the County
221 Commission.

222 * * *

223
224
225 (5) *Duties and powers of the Environmental Quality Control Board.* The
226 Environmental Quality Control Board shall have the following duties, functions,
227 powers and responsibilities:

228
229 (a) To hear appeals by any person aggrieved by any action or decision of
230 the Director as provided in Section 24-11.

231
232 (b) To hear and pass upon all applications for variances and extensions of
233 time in the manner provided by Sections 24-13 and 24-14, except for
234 compliance with ~~>>the regulations set forth in Section 24-25,~~
235 Adoption of rules and regulations of the State of Florida Department
236 of Environmental Protection, Florida Department of Health, or the
237 United States Environmental Protection Agency, or applicable federal
238 or state binding agreement~~<< [[Federal Pretreatment Regulations set~~
239 ~~forth in 40 CFR 403 as incorporated in this chapter]].~~

240
241 (c) To hear and pass upon all applications for extension of time for
242 compliance with the provisions of this chapter. All such applications
243 shall be filed in accordance with the provisions of this chapter and
244 shall be heard and considered by the Environmental Quality Control
245 Board at a public hearing pursuant to notice. In considering such
246 applications, the Board shall take into account such factors as
247 practicability, availability of equipment, and relative benefits to the
248 community. The Board shall not have the power and authority to grant
249 any application for extension of time to comply with the prohibitions
250 against open burning (Section 24-41.4), or the prohibitions against
251 reduction of animal matter (Section 24-41.8), or the prohibitions
252 against a nuisance (Section 24-27), or the prohibitions against the
253 discharge of cyanides or other toxic chemicals into the waters in
254 excess of the standards set forth in Section 24-42(3). Applications for
255 extension of time for compliance shall be considered on the basis of
256 public interest and not merely on economic benefit to the applicant;
257 applications shall be granted only when it is established that the
258 requested extension of time for compliance will not be detrimental to
259 the public health, welfare and safety, and will not create or permit the
260 continuation of a nuisance, or that no technically feasible,
261 economically reasonable means of compliance are readily available to
262 the applicant. The Board shall not have the power and authority to
263 grant extensions of time for compliance with the ~~>>regulations set~~
264 forth in Section 24-25, Adoption of rules and regulations of the State
265 of Florida Department of Environmental Protection, Florida

Department of Health, or the United States Environmental Protection Agency, or applicable federal or state binding agreement<<[[~~Federal Pretreatment Regulations set forth in 40 CFR 403 as incorporated in this chapter~~]]. Any person aggrieved by any decision of the Environmental Quality Control Board shall be entitled to judicial review in accordance with the Florida Rules of Appellate Procedure.

* * *

Section 3. Section 24-11 of the Code of Miami-Dade County, Florida, is hereby

amended to read as follows:

Sec. 24-11. Appeals from actions or decision of the Director of the Miami-Dade County Department of Environmental Resources Management.

Any person aggrieved by any action or decision of the Director, may appeal to the Environmental Quality Control Board by filing within fifteen (15) days after the date of the action or decision complained of, a written notice of appeal which shall set forth concisely the action or decision appealed from and the reasons or grounds for the appeal. The Environmental Quality Control Board shall set such appeal for hearing at the earliest possible date, and cause notice thereof to be served upon the appellant and the Director. The Environmental Quality Control Board shall hear and consider all facts material to the appeal, and render a decision promptly. The Environmental Quality Control Board may affirm, reverse or modify the action or decision appealed from provided that the Environmental Quality Control Board shall not take any action which conflicts with or nullifies any of the provisions of this chapter >>, or applicable federal or state law, or binding agreement between the County and any Federal or State Agency governing any applicable law<<. The decision of the Environmental Quality Control Board shall constitute final administrative review and no hearing or reconsideration shall be considered. Any person aggrieved by any decision of the Environmental Quality Control Board on an appeal shall be entitled to judicial review in accordance with the Florida Rules of Appellate Procedure. The words "action" and "decision" as used herein shall not include the filing of any action by the Director, in any court. The Board shall not have jurisdiction to reconsider the subject matter of any appeal after its final administrative determination for a period of six (6) months from the date of the Board's final action, unless the Board determines that there has been a material and substantial change in the circumstances; provided, however, any action taken or decision made by the Director at any time may be reconsidered by the Director and the Director may therefore modify any such action or decision.

* * *

310 Section 4. Section 24-15 of the Code of Miami-Dade County, Florida, is hereby
311 amended to read as follows:

312 **Sec. 24-15. Plan approval required.**

313 (1) *Intent.* It is the intent and purpose of this section to require that all new
314 facilities, equipment and processes constructed or operated after the effective date
315 of this chapter shall comply with the requirements herein contained, and that any
316 ~~[[major or substantial]]~~ enlargement, expansion or addition to existing facilities
317 also shall comply with the requirements herein contained. Any building permit
318 issued by the County or a municipality in violation of the provisions of this
319 chapter is hereby determined to be void.

320
321 (2) *Waste water facilities.* It shall be unlawful for any person to ~~[[enter~~
322 ~~into or let a contract for or to]]~~ commence the installation, extension, or operation
323 of any sewerage system ~~>>~~including collection, conveyance, transmission or
324 treatment~~<<~~ or waste treatment facility or any industrial waste disposal facility
325 without first obtaining the prior written approval of the Director or the Director's
326 designee. It shall be unlawful for any person to make any enlargement, alteration
327 or addition to any ~~>>~~sewerage system including collection, conveyance,
328 transmission or treatment or waste treatment facility or any industrial waste
329 disposal~~<<~~ facility, or commence the construction of any ~~>>~~such systems or
330 facilities~~<<~~~~[[facility]]~~, that will reasonably be expected to be a source of water
331 pollution without first obtaining the prior written approval of the Director or the
332 Director's designee. No building permit involving the generation or discharge of
333 effluents shall be issued by the County or any municipality unless the application
334 for a building permit has been approved by the Director or the Director's
335 designee.

336
337 The provisions of this section shall not apply to facilities discharging only
338 domestic wastes to a ~~>>~~utility or non-utility~~<<~~~~[[public sewer system]]~~ ~~>>~~through
339 a single lateral~~<<~~ approved by the Director or the Director's designee.
340 Notwithstanding the foregoing, the provisions of this section shall apply to
341 facilities discharging only domestic wastes to a ~~>>~~utility or non-utility~~<<~~~~[[public~~
342 ~~sewer system]]~~ ~~>>~~through a single lateral~~<<~~ approved by the Director or the
343 Director's designee if the facilities ~~<<~~have or require a FOG control device in
344 accordance with Section 24-42.6~~>>~~~~[[provide any form of pretreatment in~~
345 ~~conjunction with a grease trap]]~~.

346
347 * * *

348
349 Section 5. Section 24-15.3 of the Code of Miami-Dade County, Florida, is hereby
350 amended to read as follows:

351 **Sec. 24-15.3 Standards for preparation of plans.**

352
353 (1) Waste treatment works shall be designed in accordance with the
354 sewerage guide promulgated by the Florida State Board of Health, or similar
355 professional publication, recommended standards for sewage works and water
356 pollution control federation manuals of practice numbered eight (8) and nine (9),
357 as applicable to conditions prevailing within Miami-Dade County, and in
358 accordance with good engineering practices.

359
360 (2) Outfalls shall be extended or carried to the channel of a stream or to
361 deep water where outlet is submerged at all times. The extent and length of the
362 outfall shall conform to the requirements of the Director or the Director's
363 designee. No outfall shall be approved unless satisfactory evidence is presented to
364 establish that solids or other objectionable pollutants will not be deposited on the
365 shore, and that other forms of pollution will not be caused.

366
367 (3) ~~>>FOG control devices<< [[Grease traps]] shall be provided and~~
368 ~~installed in accordance with >>Section 24-42.6<<[[the rules and regulations~~
369 ~~promulgated under the provisions]] of this chapter. [[At a minimum, all grease~~
370 ~~traps discharging to publicly or privately owned or operated sanitary sewer~~
371 ~~collection systems shall be provided with a sampling point on the effluent~~
372 ~~discharge side of the grease trap. Wastes containing sizable quantities of grease~~
373 ~~such as those produced by restaurants shall not be deemed suitable for disposal~~
374 ~~into tile drainfields]].~~

375
376 (4) Drainage or disposal wells shall not be used for disposal of treated or
377 untreated wastes except as approved by the Director or the Director's designee.

378 * * *

379
380 Section 6. Section 24-18 of the Code of Miami-Dade County, Florida, is hereby

381 amended to read as follows:

382
383 **Sec. 24-18. Operating permits.**

384
385 (A) *Permit Required*>>.<< No person shall operate, maintain or permit,
386 cause, allow, let or suffer the operation or maintenance of a public water system,
387 public sewerage system, a location where a site rehabilitation action has been
388 completed in accordance with the provisions set forth in Section 24-44(2)(k)(ii)
389 >>.<< or any of the following facilities, all of which will reasonably be expected
390 to be a source of air pollution, ground pollution or water pollution, without a valid
391 operating permit issued by the Director or the Director's designee or in violation
392 of any condition, limitation or restriction which is part of an operating permit:

(3) No new additional sewage flows shall be authorized for any sanitary sewer basin, sewage pump station, or system pursuant to Section 24-42.3 unless and until:

- >>(a)<<[[(†)]] >>T<<[[‡]]he official responsible for issuing certificates of occupancy, certificates of use or equivalent municipal occupational licenses provides a monthly report that identifies projects that have been issued a certificate of occupancy, >>certificate of completion,<< certificate of use or an equivalent municipal occupational license that have also received a conditional or unconditional written approval, and
- >>(b)<<[[(††)]] >>A<<[[a]]ll actions or reports required by Section 24-42.2 >>and Section 24-42.6(11)<< for the basin, pump station, or system have been completed according to the schedules required therein.

* * *

Section 9. Section 24-42.4 of the Code of Miami-Dade County, Florida, is hereby

amended to read as follows:

Sec. 24-42.4. Sanitary sewer discharge limitations and pretreatment standards

(1) *Definitions.* The following definitions shall be applicable only to the provisions of Section 24-42.4:

- (a) *Pollutant* shall mean dredged spoil, solid waste, incinerator residue, filter backwash, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt, and industrial, municipal, and agricultural wastes discharged into water.

* * *

(2) *General Pretreatment Standards and Local Limits.*

* * *

- (d) It shall be unlawful for any person to throw, drain, run or otherwise discharge into a sanitary sewer, or to cause, permit, allow or suffer to >>seep, to<< be thrown, run, drained, ~~[[allowed to seep,]]~~ or otherwise discharged into such sewer any of the following substances:

- 526 (i) Any gasoline, naphtha, fuel oil or other flammable or
 527 explosive liquid, solid or gas; any pollutants which may
 528 create a fire or explosion hazard in the POTW, including
 529 waste streams with a closed cup flash point of less than one
 530 hundred forty (140) degrees Fahrenheit or sixty (60)
 531 degrees Centigrade using the test methods in 40 CFR
 532 261.21.
- 533
- 534 (ii) Any waters or wastes containing any pollutant, a toxic or
 535 poisonous substance in sufficient quantity or flow rate to
 536 injure or interfere with any sewage treatment process,
 537 constitute a hazard to humans or animals, or create any hazard
 538 in the receiving waters of the sewage treatment plant or
 539 deteriorate quality of the sewage sludge to prevent sludge use
 540 or disposal.
- 541
- 542 (iii) Any pollutant in amounts which alone or in combination
 543 with other discharges will cause obstruction to the flow in
 544 the POTW.
- 545
- 546 (iv) Any substance that will pass through the sewage treatment
 547 plant and exceed State or Federal requirements for the
 548 receiving water.
- 549
- 550 (v) Any water or waste which contains substances which may
 551 solidify and become viscous at temperatures between
 552 thirty-three (33) degrees Fahrenheit and one hundred fifty
 553 (150) degrees Fahrenheit (10—65 degrees Centigrade).
- 554
- 555 (vi) Any effluents in excess of the following local limits:
- 556

<i>Chemical, Physical or Biological Characteristic</i>	<i>Standards</i>
Biochemical oxygen demand	145 lbs/day at a concentration not to exceed 200 mg/l unless allowed by the POTW
Total suspended solids	145 lbs/day at a concentration level not to exceed 200 mg/l unless allowed by the POTW
Oil and grease EPA Method 1664 (Hexane Extractable Materials)	100.0 mg/l

>> Fats, Oils and Grease (FOG) EPA Method 1664 (Hexane Extractable Materials) for facilities strictly subject to Section 24-42.6 <<	>> 150.0 mg/l <<
Total Recoverable Petroleum Hydrocarbons EPA Method 1664 (Silica Gel Treated Hexane Extractable Materials)	50.0 mg/l
Ammonia (un-ionized)	100.0 mg/l
Temperature	150°F and shall not cause the plant influent to exceed 104°F (40°C) or inhibit biological activity
pH	5.5—11.5, and shall not cause damage to or create a hazard to structures, equipment, or personnel of the POTW
Arsenic	0.325 mg/l
Cadmium	0.187 mg/l
Chromium (Total)	7.6 mg/l
Copper	0.5 mg/l
Lead	0.7 mg/l
Mercury	0.01 mg/l
Molybdenum	0.4 mg/l
Manganese	1.9 mg/l
Nickel	0.39 mg/l
Selenium	0.65 mg/l
Silver	0.6 mg/l
Thallium	0.0005 mg/l
Zinc	6.8 mg/l
Cyanides, total	0.5 mg/l
Poly chlorinated biphenyls	0.008 mg/l
Benzene	0.2 mg/l

Carbon Tetrachloride	0.22 mg/l
1,2-c-Dichloroethylene	3.75 mg/l
Tetrachloroethylene	0.125 mg/l
Trichloroethylene	0.16 mg/l
Vinyl Chloride	0.08 mg/l

Section 10. Section 24-42.6 of the Code of Miami-Dade County, Florida, is hereby added to read as follows:

>>**Sec. 24-42.6. Fats, Oils and Grease Control Program**

The intent and purpose of this Section is to safeguard public health, safety and welfare, and protect the sanitary sewer collection, transmission and treatment systems by setting minimum requirements and standards for the design and operation of FOG generating facilities not classified by the Director or Director's designee as a Significant Industrial User pursuant to Section 24-42.4.

(1) No person shall dispose of any FOG or food waste, or cause, let, permit, suffer or allow disposal or discharge of any FOG or food waste to be disposed or discharged into any stormwater drainage system, ground or groundwater, surface water, private street, public right of way, or any other location not approved by the Director or Director's designee.

(2) When a breached FOG control device is the source of FOG or wastewater discharge as prohibited above to ground or groundwater, the FOG generator or FOG control device operator shall:

(a) Make temporary repairs within seven (7) days of the date the Director or the Director's designee determines that the FOG control device is breached.

(b) Within thirty (30) days of the date the Director or the Director's designee determines that the FOG control device is breached discharged FOG or wastewater to ground or groundwater, the FOG generator or FOG control device operator shall submit plans to the Department for review and approval for the installation of a new FOG control device that complies with design requirements in Section 24-42.6(8).

591 (c) Within ninety (90) days of the date the Director or the Director's
592 designee determines that the FOG control device is breached, the FOG
593 generator or FOG control device operator shall obtain all required
594 approvals and permits and install the Department approved FOG
595 control device.

596
597 (d) Cease the discharge of FOG and wastewater as prohibited above.
598 Failure to stop the discharge of FOG and wastewater as prohibited
599 above shall result in the Director or the Director's designee directing
600 the FOG generator or FOG control device operator to cease operating
601 or ordering the utility providing water service to the facility to cease
602 providing such service.

603
604 (3) No person shall dispose of any FOG, or cause, let, permit, suffer or
605 allow disposal or discharge of any FOG into any onsite sewage treatment and
606 disposal system, non-utility or utility sanitary sewer system in quantities ~~or~~
607 concentrations which affects negatively or hinders the operation of any onsite
608 sewage treatment and disposal system, sewage collection, transmission or
609 treatment system, exceeds the FOG sanitary sewer discharge limitation and
610 pretreatment standards in Section 24-42.4, or causes a sanitary nuisance.

611
612 (a) When a FOG generator or a FOG control device operator is found to
613 have violated Section 24-42.6(2), the FOG generator or FOG control
614 device operator shall immediately cease and desist from discharging
615 FOG in such quantities or concentrations. The FOG generator or FOG
616 control device operator shall submit a corrective action plan to the
617 Department within thirty (30) days of the date the Director or the
618 Director's designee determines that the FOG generator or FOG control
619 device operator discharged FOG in such quantities or concentrations.
620 The corrective action plan shall include equipment, process or
621 procedure modifications proposed to prevent discharging FOG in such
622 quantities or concentrations. The corrective action plan shall be
623 implemented within the timeframe provided in the Department's
624 approval of the corrective action plan. Until the corrective action plan
625 is approved by the Director or Director's designee and implemented in
626 accordance with the Director or Director designee's approval, the FOG
627 generator or FOG control device operator shall take all necessary
628 actions to prevent the discharge of FOG in such quantities or
629 concentrations and to prevent causation of a sanitary nuisance.

630
631 (b) When a Residential FOG Source is found to have violated Section 24-
632 42.6(2), the Residential FOG Source shall immediately cease and
633 desist from discharging FOG in such quantities or concentrations.

634
635 (i) When a Residential FOG Source is located in an apartment
636 building or condominium, the building manager, association,

637 property owner, or other responsible party shall submit a
638 corrective action plan to the Department within thirty (30) days
639 of the date the Director or the Director's designee determines
640 that the FOG residential source has violated Section 24-
641 42.6(2). The corrective action plan shall be implemented within
642 the timeframe provided in the Department's approval of the
643 corrective action plan.

644
645 (ii) The corrective action plan shall include equipment, process or
646 procedure modifications proposed to correct the FOG
647 discharge.

648
649 (iii) Until the corrective action plan is approved by the Director or
650 Director's designee and implemented in accordance with the
651 Director or Director designee's approval, the building manager,
652 association, property owner, or other responsible party shall
653 take all necessary actions to prevent violation of Section 24-
654 42.6(2) and to prevent causation of a sanitary nuisance.

655
656 (4) Existing FOG generators with a current FOG operating permit issued
657 prior to (CLERK TO INSERT EFFECTIVE DATE), not proposing to increase
658 seating capacity, dining area or drive-thru capacity, nor proposing to make any
659 other modification, any of which will increase the discharge of FOG, shall comply
660 with the following:

661
662 (a) Where there is an existing FOG control device and sampling point, the
663 sampling point shall be located after the point of no further treatment
664 and shall be directly accessible for visual inspection and sampling.

665
666 (b) Where there is no FOG control device, plans shall be submitted to the
667 Department for the installation of a FOG control device which shall
668 be installed in accordance with plans approved by the Director or
669 Director's designee, within ninety (90) days of the date the Director or
670 the Director's designee determines that there is no FOG control device.
671 The FOG generator shall take all necessary actions to prevent the
672 discharge of FOG to the building sanitary drains and to prevent
673 causing a sanitary nuisance until a FOG control device is properly
674 installed.

675
676 (c) Where the discharge from a FOG control device exceeds the FOG
677 sanitary sewer discharge limitation and pretreatment standards in
678 Section 24-42.4, or causes the accumulation of FOG in building
679 sanitary drains or building sewer, the FOG control device shall be
680 repaired, upgraded or replaced within ninety (90) days of the date the
681 Director or the Director's designee determines that Section 24-42.4
682 FOG sanitary sewer discharge limitation and pretreatment effluent

683 standards have been exceeded, or from the date the Director or the
684 Director's designee determines that FOG has accumulated in building
685 sanitary drains or building sewer. Repairs or upgrades shall not render
686 third party certifications or approvals null and void.

687
688 (d) Where the Director or Director's designee determines that there is no
689 sampling point or the existing sampling point is not reasonably
690 accessible or adequate for sampling, a new reasonably accessible
691 sampling point shall be installed within sixty (60) ~~thirty (30)~~ days of
692 the determination of the Director or Director's designee.

693
694 (e) Where a FOG control device or sampling point are required to be
695 repaired, replaced or installed, plans shall be submitted to the
696 Department for review and approval and all required permits shall be
697 obtained prior to repair, replacement or installation. Replacement or
698 new FOG control devices shall be designed pursuant to Section 24-
699 42.6(8). Repairs or upgrades shall not render third party certifications
700 or approvals null and void.

701
702 (f) FOG generators shall comply with their current FOG generator
703 operating permit conditions until the permit expires. Thereafter, FOG
704 generators shall comply with permit conditions based on Section 24-
705 42.6(9) requirements.

706
707 (5) Existing FOG generators and FOG control device operators that do not
708 hold a valid FOG operating permit issued prior to (CLERK TO INSERT
709 EFFECTIVE DATE), that discharge to a utility or non-utility owned or operated
710 sanitary sewer system, shall comply with the following:

711
712 (a) Submit as-built plans prepared by a ~~licensed plumber or Florida~~
713 Professional Engineer and condition assessment prepared by a licensed
714 plumber or Florida Professional Engineer within sixty (60) days from
715 the Director or the Director designee's determination that the FOG
716 generator or FOG control device operator does not have a valid FOG
717 operating permit. As-built plans and condition assessment shall
718 demonstrate the following, where applicable:

719
720 (i) That all existing back of the house fixtures discharge to
721 existing FOG control devices and not directly to the building
722 sanitary drains or building sewers.

723
724 (ii) That existing FOG control devices comply with Section 24-
725 42.6(8).

726

727 (iii) That the FOG control device is functioning in accordance with
728 the manufacture's specifications and instructions and that the
729 sampling point complies with Section 24-42.6(7).

730
731 (iv) That a sampling point is located after the point of no further
732 treatment and is reasonably accessible for visual inspection and
733 sampling.

734
735 (v) That existing yellow and brown grease storage areas prevent
736 the release of FOG to ground, groundwater, surface waters or
737 storm sewers.

738
739 (vi) That existing mat and equipment wash-down areas prevent the
740 release of FOG to ground, groundwater, surface waters or
741 storm sewers and prevent inflow of stormwater.

742
743 (b) FOG generators or FOG control device operators that cannot comply
744 with Sections 24-42.6(4)(a) shall submit plans to upgrade the facility
745 pursuant to Section 24-42.6(6)(a)(i), (ii) and (iii) within ninety (90)
746 days of the date the Director or the Director's designee determines that
747 the FOG generator or FOG control device operator does not have a
748 valid FOG operating permit. The facility upgrade shall be completed
749 within 180 ~~ninety (90)~~ days of the date the Director or the Director's
750 designee ~~determines that the FOG generator or FOG control device~~
751 ~~operator does not hold a valid FOG operating permit~~ approves the
752 plans.

753
754 (c) Within five (5) days of the Director or the Director designee's
755 approval of the as-built plans ~~or plans to upgrade the facility pursuant~~
756 to Section 24-42.6(4)(b), a FOG operating permit application shall be
757 submitted to the Department pursuant to Sections 24-18(A)(18) and
758 24-42.6(9).

759
760 (6) Existing FOG generators and FOG control device operators that do not
761 hold a valid FOG operating permit issued prior to (CLERK TO INSERT
762 EFFECTIVE DATE), that discharge to an onsite sewage treatment and disposal
763 system located in a wellfield protection area of any utility potable water supply
764 wells, shall comply with the following within one (1) year ~~180 days~~ of
765 Department notification:

766
767 (a) Submit as-built plans prepared by a ~~licensed plumber or Florida~~
768 Professional Engineer and condition assessment prepared by a licensed
769 plumber or Florida Professional Engineer. As-built plans and condition
770 assessment shall demonstrate the following, where applicable:

771

- 772 (i) That all existing back of the house fixtures discharge to
773 existing FOG control devices and not directly to the building
774 sanitary drains or building sewers.
- 775
- 776 (ii) That existing FOG control devices comply with Chapter 64E-6,
777 FAC.
- 778
- 779 (iii) That the FOG control device is functioning in accordance with
780 the manufacture's specifications and instructions and that the
781 sampling point complies with Section 24-42.6(7).
- 782
- 783 (iv) That the outlet tee of the last grease interceptor is reasonably
784 accessible for visual inspection and sampling.
- 785
- 786 (iv) That existing yellow and brown grease storage areas prevent
787 the release of FOG to ground, groundwater, surface waters or
788 storm sewers.
- 789
- 790 (vi) That existing mat and equipment wash-down areas prevent the
791 release of FOG to ground, groundwater, surface waters or
792 storm sewers and prevent inflow of stormwater.
- 793
- 794 (b) FOG generators or FOG control device operators that cannot comply
795 with Sections 24-42.6(5)(a) shall submit plans to upgrade the facility
796 pursuant to Section 24-42.6(6)(a)(i), (ii) and (iii) and implement
797 upgrades within one (1) year of Department notification (~~CLERK TO~~
798 ~~INSERT EFFECTIVE DATE~~).
- 799
- 800 (c) Within five (5) days of the Director or the Director designee's
801 approval of the as-built plans or plans to upgrade the facility pursuant
802 to Section 24-42.6(5)(b), a FOG operating permit application shall be
803 submitted to the Department pursuant to Sections 24-18(A)(18) and
804 24-42.6(9).
- 805
- 806 (7) Notwithstanding any provision of this Code, no county or municipal
807 officer, agent, employee or board shall approve, grant or issue any building
808 permit, certificate of occupancy, certificate of completion, certificate of use or
809 municipal occupational license for a FOG generator or FOG control device
810 operator until prior written approval of the Director or the Director's designee has
811 been obtained. Furthermore, no person shall construct, utilize, operate, occupy or
812 cause, allow, let, permit or suffer to be constructed, utilized, operated or occupied
813 any FOG generator or FOG control device until prior written approval of the
814 Director or the Director's designee has been obtained.
- 815
- 816 (a) For new FOG generators or FOG control operators discharging to a
817 utility or non-utility owned or operated sanitary sewer collection

818 system or to an onsite sewage treatment and disposal system located in
819 a ~~the basic~~ wellfield protection area of any utility potable water supply
820 wells, the Director or the Director's designee shall not issue a written
821 approval until the Director or the Director's designee finds that:

822
823 (i) Construction plans comply with Section 24-42.6(7).

824
825 (ii) FOG control devices have been inspected by the Department
826 and found to be in compliance with Section 24-42.6(8) and
827 with Department approved construction plans pursuant to 24-
828 42.6(6)(a)(i). Compliance with approved plans shall be
829 determined by construction inspection. ~~Persons performing~~
830 ~~construction inspections for FOG control devices shall be~~
831 ~~trained to perform such inspections. Training shall be~~
832 ~~prescribed by the Director or the Director's designee. No~~
833 ~~building/plumbing permit final inspection, certificate of~~
834 ~~occupancy or certificate of completion shall be issued prior to~~
835 ~~the Department's inspection finding that the FOG control~~
836 ~~devices have been installed in compliance with Department~~
837 ~~approved construction plans.~~

838
839 (iii) FOG operating permit applications shall be submitted pursuant
840 to Sections 24-18 (A)(18) and 24-42.6(9).

841
842 (b) For existing FOG generators discharging to a utility or non-utility
843 owned or operated sanitary sewer system or discharging to an onsite
844 sewage treatment and disposal system located in a ~~the basic~~ wellfield
845 protection area of any utility potable water supply wells, proposing to
846 increase seating capacity, dining area or drive-thru capacity, or other
847 modification any of which will increase the discharge of FOG, the
848 Director or the Director's designee shall not issue a written approval
849 until the Director or the Director's designee finds that the proposed
850 increased seating capacity, dining area or drive-thru capacity, or other
851 modification any of which will increase the discharge of FOG,
852 complies with Section 24-42.6 (6)(a)(i), (ii) and (iii).

853
854 (c) For changes in ownership or other changes that require the issuance of
855 a certificate of use, municipal occupational license, or equivalent
856 municipal approval to operate or use a business, the Director or the
857 Director's designee shall not issue a written approval until the Director
858 or the Director's designee finds that:

859
860 (i) The prior use had a valid FOG operating permit within the last
861 twelve (12) months.

862
863 (ii) There is no construction proposed or required.

(iii) There are no changes to the back of house.

(iv) No changes have been made, or are proposed, to the plumbing system, use, or facility operations that will impact the FOG control device.

(v) A FOG control device condition assessment is performed by a licensed plumber or Florida Professional Engineer and the findings, submitted to the Department in a form prescribed by the Director or the Director's designee, show that the FOG control device is functioning in accordance with the manufacturer's specifications and instructions and that the sampling point complies with Section 24-42.6(7).

(d) For changes in ownership or other changes that require the issuance of a certificate of use, municipal occupational license, or equivalent municipal approval to operate or use a business, that do not comply with 24-42.6(6)(c) shall be required to comply with Section 24-42.6(6)(a)(i), (ii) and (iii) prior to the Department approval of the change in ownership or other changes that require the issuance of a certificate of use, municipal occupational license, or equivalent municipal approval to operate or use a business.

~~On or before January 1, 2018, FOG generators discharging to a utility or non-utility owned or operated sanitary sewer system or onsite sewage treatment and disposal system located in the basic wellfield protection area of any utility potable water supply wells that are not subject to 24-42.6(5)(a) or (b), shall comply with the following requirements:~~

~~(i) All back of the house fixtures and other fixtures, including wash down areas, which can discharge food waste or FOG, shall be connected to a FOG control device that complies with Section 24-42.6(7).~~

~~(ii) A sampling point shall be located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling.~~

~~(iii) Yellow and brown grease storage areas and wash down areas shall be designed to prevent the release of FOG or wash water to ground, groundwater, surface waters or storm sewers.~~

908 ~~(iv) Solids separation shall be provided prior to FOG control~~
909 ~~devices that require a flow control device or are not certified to~~
910 ~~handle solids.~~

911
912 ~~(vi) Sanitary wastes from bathrooms and stormwater shall not~~
913 ~~discharge to grease waste drains, solids separators or FOG~~
914 ~~control devices.~~

915
916 ~~(vii) Submit Certification to the Department in a form prescribed by~~
917 ~~the Director or the Director's designee and prepared by a~~
918 ~~Florida Professional Engineer or master plumber, attesting to~~
919 ~~compliance with Sections 24 42.6(5)(c)(i) through (vi) above.~~
920 ~~Furthermore, confirmation of compliance with Section 24~~
921 ~~42.6(7) shall be signed and sealed by a Florida Professional~~
922 ~~Engineer.~~

923
924 ~~(viii) Where the existing FOG control device was approved pursuant~~
925 ~~to Section 24 42.6(7), certification of Section 24 42.6(5)(c)(i)~~
926 ~~shall not be required.~~

927
928 (8) Plans. Where required in Section 24-42.6, plans shall include the
929 following minimum information:

930
931 (a) Florida Professional Engineer signature, seal and date. ~~Signature and~~
932 ~~seal of a Florida Professional Engineer.~~

933
934 (b) All existing and proposed back of the house and front of the house
935 areas and drive-thru lanes are shown and labeled.

936
937 (c) Plan and isometric drawings showing and labeling all existing and
938 proposed drainage pipes, fixtures, sumps, pumps, ejectors, solids
939 separators, FOG control devices and sampling points are shown and
940 labeled. All drainage pipes that receive or can receive waste from back
941 of the house fixtures, and other fixtures that can discharge food waste
942 or FOG, shall be labeled grease waste drains or GW and shall include
943 slope, diameter and drainage fixture units. Back of the house fixtures
944 include floor drains, floor sinks, trough drains, mop sinks, three-
945 compartment sinks, hand sinks, pre-rinse station/sink, preparation sink,
946 pot sink, wok sink, self-cleaning kitchen exhaust hoods, and any and
947 all fixtures, appurtenances and equipment that have the potential to
948 introduce food waste or FOG into drainage pipes. Screens shall be
949 shown and labeled in all sinks and drains. Where multiple users/tenant
950 spaces connect to a common FOG control device, the plans shall
951 include all users/tenant spaces.
952

- 953 (d) Where multiple users/tenant spaces connect to a common FOG control
954 device, the plans shall include all users/tenant spaces.
955
- 956 (e) Plan and isometric drawings showing grease waste drains and sanitary
957 drains from bathrooms and other non-FOG drains connecting to
958 building drain and include slope, diameter and drainage fixture units.
959
- 960 ~~(e) Isometric diagrams showing and labeling all existing and proposed~~
961 ~~plumbing pipes, fixtures, pipe diameter and drainage fixture units,~~
962 ~~solids separators, FOG control devices and sampling points. Grease~~
963 ~~waste drains shall be labeled grease waste drain or GW.~~
964
- 965 ~~(f) Screens are shown and labeled in all sinks and drains.~~
966
- 967 (f) All grease waste drains are connected to a FOG control device that
968 complies with Section 24-42.6(8). FOG control devices shall not
969 receive flow under pressure. No pump, ejector or any equipment that
970 can mechanically emulsify FOG, or reduce the efficiency of a FOG
971 control device, shall connect directly or indirectly to a FOG control
972 device.
973
- 974 (g) FOG control devices installed below ground/grade to intersect the
975 building grease waste drain. When installation below grade is not
976 physically possible, the Director or Director's designee may approve a
977 single above grade installation if the FOG control device required
978 pursuant to Section 24-42.6(8) is rated at twenty-five (25) gallons per
979 minute or less and includes an air gap or air break.
980
- 981 (h) At least one (1) sampling point, located after the point of no further
982 treatment, shown and labeled. The sampling point shall be directly
983 accessible for visual inspection and sampling.
984
- 985 (i) Profiles, sections and details of FOG control device and sampling
986 point drawn to scale. FOG control devices and sampling points shall
987 be accessible for cleaning pursuant to Section 24-42.6(9). At a
988 minimum, four (4) feet of vertical clearance and three (3) feet of
989 horizontal clearance shall be provided for each.
990
- 991 (j) Where FOG control device access risers are required, the riser height
992 shall not exceed thirty (30) inches. A greater riser height may be
993 approved by the Director or Director's designee where access for
994 inspection and cleaning can be achieved and demonstrated.
995
- 996 (k) Construction material for FOG control devices shall be labeled and
997 shall be compatible with all waste, including waste with a pH of 3 or
998 less.

- (l) The point and method of wastewater discharge for kiosk and booths using holding tanks shall be ~~are~~ shown and labeled. The point of discharge shall be a grease waste drain or FOG control device sized for the quantity of waste generated. All waste containers shall be shown on plans.

- (m) FOG control device sizing calculations and assumptions, including peak flow rate, temperature, FOG and solids loading rates, and frequency of FOG and solids removal shall be ~~are~~ shown and labeled. Where the FOG control device will serve multiple users/tenants, each user/tenant shall be identified and their flows and loading rates shall also be included on the plans. Loading rates shall include waste from food preparation and cleaning associated with eat-in, take-out and drive-thru meals. FOG loading shall include all FOG sources, including kitchen exhaust hoods. For self-cleaning kitchen exhaust hoods, the manufacturer’s specifications for peak discharge shall be included.

- (n) Manufacturer’s and third party certification installation requirements.

- (o) FOG control device model numbers and third party certifications ~~are~~ shall be shown and labeled. Plan profiles and sections shall demonstrate how all labels and markings on FOG control devices remain visible during and after installation.

- (p) State Health Office’s designated approval/tank numbers for grease interceptors designed in accordance with 64E-6, Florida Administrative Code, shall be ~~are~~ shown and labeled. All labels and markings on FOG control devices shall be visible before and after installation.

- (q) For concrete precast FOG control devices, the precast concrete plant name and precast concrete plant certifying agency accepted by the Florida Department of Transportation shall be ~~are~~ shown and labeled accordingly. Site cast FOG control devices are not permitted.

- (r) ~~Dishmachines are not required to be connected to a FOG control device where washing and rinsing are performed in a two (2) or three (3) compartment sink and the dishmachine connects to grease waste drain prior to a sampling point. Dishwashers with dedicated soiled-dish table or pre-rinse station, where all food solids and liquids are removed, are not required to be connected to a FOG control device when connected to a grease waste drain prior to a sampling point. All other and~~ dishwashers shall be connected to a FOG control device sized to account for emulsified grease FOG.

~~(q) At least one (1) sampling point located after the point of no further treatment shown and labeled. The sampling point shall be directly accessible for visual inspection and sampling. At a minimum, four (4) feet of vertical clearance and three (3) of horizontal clearance shall be provided.~~

(s) Locations and details for all stored waste, including yellow and brown grease, shall be are shown and labeled. Storage areas shall be designed to prevent the release of FOG to ground, groundwater, surface waters or storm sewers. Storage containers shall be identified by waste type and capacity in gallons and sized to prevent overfilling. All storage containers shall have a lid that prevents rainwater inflow and that can be locked to prevent vandalism.

(t) Locations and details for all wash-down areas shall be are shown and labeled. All wash-down areas shall be designed to prevent the release of wash-water and FOG to ground, groundwater, surface waters, storm sewer or any other location not approved by the Director or Director's designee. Where mat and equipment wash-down is to be performed in a mop sink, the mop sink shall be sized and labeled.

(u) Solids separation is provided prior to existing or proposed FOG control devices that require a flow control device or that are not certified to handle solids.

(v) Access is provided for cleaning of ~~food solids and congealed grease~~ FOG in grease waste drains where the horizontal run from the source of food waste and FOG is greater than ~~twenty-five (25)~~ fifty (50) feet from the solids separator or FOG control device. Access points shall not be spaced greater than ~~twenty-five (25)~~ fifty (50) feet, measured center-to-center. Location of access points and details for access point shall be provided in drawings. Where the horizontal run from the source of food waste and FOG is greater than one hundred (100) feet, plans shall include provisions for preventing clogging by ~~congealed FOG and other waste~~. Where the FOG control device is located at a remote location, it shall be equipped with a functional Interceptor Monitoring Alarm or Device. Remote locations include a different floor, or any horizontal distance exceeding one hundred (100) feet from the back of the house area.

(w) Sanitary wastes from bathrooms and stormwater are not discharged into grease waste drains, solids separators, ~~or~~ FOG control devices or ~~sampling point~~. Only grease waste lines and drains shall connect to a FOG control device.

1091 (9) FOG Control Device Sizing. Where required in Section 24-42.6, FOG
1092 control devices shall be sized for all intended users, facilities and tenants using
1093 one of the following criteria and approved by the Director or Director's designee:
1094

1095 (a) Gravity Grease Interceptors: The minimum volume for gravity grease
1096 interceptors shall be the largest of the following:
1097

1098 (i) Calculations or selection based on the Florida Building Code,
1099 latest edition; or
1100

1101 ~~(ii) Calculations prepared by a Florida Professional Engineer~~
1102 ~~demonstrate that the FOG effluent concentration is equal to or~~
1103 ~~less than the FOG sanitary sewer discharge limitation and~~
1104 ~~pretreatment standard referenced in Section 24-42.4.~~
1105 ~~Calculations shall include peak flow rate; temperature and~~
1106 ~~temperature driven flow patterns; rising and settling velocities;~~
1107 ~~short circuiting induced by inlet, baffle and outlet effects and~~
1108 ~~velocity distribution; FOG and solids loading rate; and~~
1109 ~~frequency of FOG and solids removal; or~~
1110

1111 (ii) Alternative calculations:
1112

1113 1. Calculations prepared by a Florida Professional
1114 Engineer that include projected peak flow rate, thirty
1115 (30)-minute hydraulic detention time calculated using
1116 net wet volume, temperature, FOG and solids loading
1117 rates, and proposed frequency of FOG and solids
1118 removal. Net wet volume shall be total wet volume
1119 minus the maximum volume of waste stored between
1120 cleaning cycles, and third party certification of FOG
1121 removal efficiency and containment capacity; or
1122

1123 2. Calculations prepared by a Florida Professional
1124 Engineer that include projected peak flow rate;
1125 temperature; FOG and solids loading rates; proposed
1126 frequency of FOG and solids removal; and third party
1127 certification of the maximum FOG containment
1128 capacity; and third party certification of the effluent
1129 concentration or of the FOG removal efficiency. The
1130 certified effluent concentration shall be equal to or less
1131 than the FOG sanitary sewer discharge limitation and
1132 pretreatment standards referenced in Section 24-42.4.
1133 The minimum FOG removal efficiency shall be 99% at
1134 the third party certified flow rate and minimum required
1135 FOG containment capacity.

(iii) Where Chapter 64E-6, Florida Administrative Code, applies, as determined by the Director or Director’s designee, total volume shall be calculated using seats and meals, where meals are used to calculate the volume associated with take out, drive through and other FOG loads not accounted for in seats, and the total volume is increased to account for the maximum volume of waste stored between cleaning cycles. ~~total wet volume, minus the maximum volume of waste stored between cleaning cycles, is the greater of the following:~~ As an alternative to calculating the maximum volume of waste stored between cleaning cycles, the following multiplication factors can be used to increase the volume calculated by seats and meals:

<u>Cleaning Cycle</u>	<u>Multiplication Factor</u>
<u>Every 30 days</u>	<u>1.0</u>
<u>Every 60 days</u>	<u>1.15</u>
<u>Every 90 days</u>	<u>1.25</u>

(b) Where more than one (1) gravity grease interceptor is required to provide the largest volume calculated in Section 24-42.6(8)(a), they shall be installed in series with consideration given to minimize disturbance between tanks by utilizing appropriately sized pipes and influent and effluent appurtenances that maximize FOG separation.

~~(i) Seven hundred and fifty (750) gallons; or~~

~~(ii) Volume calculated based on Chapter 64E-6; or~~

(c) Hydromechanical Grease Interceptors: The minimum size and number of hydromechanical grease interceptors shall be the greatest of the following:

(i) Twenty gallons per minute.

(ii) Calculations or selection based on the Florida Building Code, latest edition.; or

~~(ii) Calculations prepared by a Florida Professional Engineer demonstrate that the FOG effluent concentration is equal to or less than the FOG sanitary sewer discharge limitation and pretreatment standard referenced in Section 24-42.4. Calculations shall include peak flow rate; temperature and temperature driven flow patterns; rising and settling velocities; short-circuiting induced by inlet, baffle and outlet effects and velocity distribution; FOG and solids loading rate; and frequency of FOG and solids removal; or~~

(iii) Calculations prepared by a Florida Professional Engineer that include projected peak flow rate; temperature; FOG and solids loading rates; proposed frequency of FOG and solids removal; third party certification of the maximum FOG containment capacity; and third party certification of the effluent concentration or of the FOG removal efficiency. The certified effluent concentration shall be equal to or less than the FOG sanitary sewer discharge limitation and pretreatment standards referenced in Section 24-42.4. The minimum FOG removal efficiency shall be 99% at the third party certified flow rate and minimum required FOG containment capacity;~~or~~

~~Calculations prepared by a Florida Professional Engineer that include projected peak flow rate, temperature, FOG and solids loading rates, proposed frequency of FOG and solids removal, and third party certification of FOG removal efficiency and containment capacity. The minimum FOG removal efficiency shall be 99% at the third party certified flow rate and minimum required FOG containment capacity.~~

(d) Where more than one (1) hydromechanical grease interceptor is required to provide the required removal efficiency, they shall be installed in series and the removal efficiency shall be based on the third party testing of the proposed configuration and number of grease interceptors proposed. The test configuration, including flow control, air entrainment and other appurtenances, shall match the proposed field installation.

(e) FOG Control Devices not classified by the Director or Director's designee as hydromechanical or gravity grease interceptors: The minimum size and number of FOG control devices shall be the greatest of the following:

(i) Calculations or selection based on the Florida Building Code, latest edition;~~or~~

(ii) Calculations prepared by a Florida Professional Engineer that include ~~projected~~ peak flow rate; temperature; FOG and solids loading rates; FOG and solids biological and chemical removal rates; frequency of FOG and solids removal; and third party certification of maximum FOG containment capacity and effluent concentration. The certified effluent concentration shall be equal to or less than the FOG sanitary sewer discharge limitation and pretreatment standards referenced in Section 24-42.4.

- (f) Where more than one (1) FOG control device, not classified by the Director or Director’s designee as hydromechanical or gravity grease interceptors, is required to provide the required effluent concentration, it shall be based on third party testing of the proposed configuration and number of grease interceptors proposed. The test configuration, including flow control, air entrainment and other appurtenances, shall match the proposed field installation.

- (g) Peak Flow Rate. Where peak flow rate is required in Section 24-42.6, it shall be estimated as follows:
 - (i) Shell buildings. Peak flow shall be calculated using Manning’s Formula for full pipe flow for the grease waste drain nominal diameter and slope and a roughness coefficient of 0.0113.

 - (ii) Plans with complete plumbing design. Peak flow shall be estimated as provided above for shell building, total fixture flow rate using one (1) or two minute (2) drain time, or drainage fixture units (DFUs). For DFUs, the peak flow rate shall be calculated by multiplying the proposed DFUs by the flow rate calculated using Manning’s Formula for full pipe flow and a roughness coefficient of 0.0113 and divided by the maximum number of DFUs allowed under the Florida Building Code, latest edition, for the grease waste drain diameter and slope.

 - (iii) Minimum Peaks flows.

<u>Nominal pipe size in inches</u>	<u>Minimum Total Flow Rate at Grease Interceptor Influent</u>
<u>1.25 – 2.5</u>	<u>20 gpm</u>
<u>3</u>	<u>23 gpm</u>
<u>4</u>	<u>50 gpm</u>
<u>5</u>	<u>91 gpm</u>
<u>6</u>	<u>147 gpm</u>
<u>8</u>	<u>317 gpm</u>
<u>10</u>	<u>576 gpm</u>
<u>12</u>	<u>936 gpm</u>
<u>15</u>	<u>1,697 gpm</u>

1258
1259

1260 (10) Operating Permits for FOG Generators and FOG Control Device
1261 Operators. No person shall operate, cause, let, permit, suffer or allow the
1262 operation of a FOG generating facility or FOG control devices serving FOG
1263 generators ~~discharging to a utility or non-utility owned or operated sanitary sewer~~
1264 system or an onsite sewage treatment and disposal system located in a wellfield
1265 protection area of any utility potable water supply wells without a valid FOG
1266 operating permit issued by the Director or the Director's designee or in violation
1267 of any condition, limitation or restriction which is part of a FOG operating permit.
1268 ~~FOG operating permits are valid for up to one year, expire December 31 of each~~
1269 ~~year, and shall be renewed annually by January 1 of each calendar year.~~
1270

1271 (a) Existing FOG generators and FOG control device operators that do not
1272 hold a valid FOG operating permit issued prior to (CLERK TO
1273 INSERT EFFECTIVE DATE), that discharge to an onsite sewage
1274 treatment and disposal system located in a wellfield protection area of
1275 any utility potable water supply wells, shall apply for a FOG operating
1276 permit within 180 days of (CLERK TO INSERT EFFECTIVE DATE)
1277 using a form prescribed by the Director or Director's designee in
1278 accordance with Section 24-42.6(5).
1279

1280 (b) Applications for new FOG generators and new FOG control device
1281 operators and renewals of same shall be in a form prescribed by the
1282 Director or Director's designee. When the FOG operating permit
1283 applicant is a tenant, the application shall be completed and signed by
1284 the tenant(s) and property owner(s) as co-applicants. The owner's
1285 section of the application shall include a statement acknowledging that
1286 the property owner(s) is responsible for the proper closure of a FOG
1287 generator pursuant to Section 24-42.6(8)(c)(vi).
1288

1289 (c) Renewal applications shall include a certification form, which is
1290 prescribed by the Director or the Director's designee. ~~Where made~~
1291 available by the Department, certification shall be completed using a
1292 secure online system or by an equivalent system developed by the
1293 Department. Said form shall be prepared by a Florida Professional
1294 Engineer or licensed plumber or liquid waste transporter, attesting that
1295 the existing FOG control devices are functioning as designed and are
1296 in good working order. Where required in this Section, the renewal
1297 shall also include training certificates for staff trained pursuant to
1298 Section 24-42.6(8)(c)(iv).
1299

1300 (d) Operating permits for new FOG generators and new FOG control
1301 device operators, and renewal of same, discharging to a utility or non-
1302 utility owned or operated sanitary sewer system or an onsite sewage
1303 treatment and disposal system located in a wellfield protection area of
1304 any utility potable water supply wells shall include the following:

(i) Best management practices. The Director or Director's designee shall maintain a list of approved best management practices and update the list ~~annually or as required-necessary.~~

(ii) Maintenance. All FOG control devices and equipment shall be serviced to function properly and continuously to prevent the discharge of FOG into building sanitary drains, building sewers, utility or non-utility owned or operated sanitary sewer systems, ~~or and~~ onsite sewage treatment and disposal systems. Where cleaning of FOG control devices is required in Section 24-42.6, cleaning shall include the complete removal of the full contents of the FOG control device, including settled solids, wastewater and floating materials. Side walls, baffle walls, cross-pipes, and inlet and outlet pipes shall be pressure washed or scraped to remove all attached materials. Decanting, skimming, or backflushing is prohibited. Emulsifiers, grease cutters or other chemicals or detergents which could cause FOG to pass through the system to the building sanitary drains or building sewers are prohibited and shall not be used. At a minimum, the following maintenance shall be performed:

1. Grease Waste Drains, Building Sanitary Drains and Building Sewers. When jetting, rodding or other cleaning activities are required, FOG shall not be flushed, discharged, conveyed or allowed to pass through to utility or non-utility owned or operated sanitary sewer systems or onsite sewage treatment and disposal systems. All FOG shall be collected and transported by a liquid waste transporter, permitted by the Department, to an approved disposal facility.

2. Kitchen Exhaust Hoods. All waste generated by manual hood cleaning shall not be flushed, discharged, conveyed or allowed to pass through to utility or non-utility owned or operated sanitary sewer systems or onsite sewage treatment and disposal systems. All wastes shall be collected and transported by a liquid waste transporter permitted by the Department to an approved disposal facility. Where a hood is designed to be self-cleaning, the FOG control device shall be designed for the maximum cold water and hot water flow rates. Where a surfactant/detergent is used, the FOG control device shall be sized to provide sufficient detention time to allow FOG waste separation so that the effluent does not exceed the standards set forth in Section 24-42.4.

3. Yellow and Brown Grease Storage Areas. Yellow and brown grease storage areas shall be maintained free of debris and storage containers shall not be overfilled. Storage containers shall be visually inspected daily and emptied before they reach ninety (90) percent capacity. Spills shall be contained and cleaned using absorbent materials. Wet cleanup methods shall not be used. Storage container lids shall be maintained to prevent rainwater inflow and locked to prevent vandalism.

4. Mat and Equipment Wash-Down Areas. Mat and equipment wash-down areas shall be maintained free of debris and wash-water shall not be released to ground, groundwater, surface waters, storm sewer or any other location not approved by the Director or Director's designee. Wash-down areas shall not allow stormwater or rainwater to enter the building sanitary drains, building sewers, utility or non-utility owned or operated sanitary sewer systems, or onsite sewage treatment and disposal systems.

5. Solids Separators. Where installation of a solids separator is required or approved pursuant to Section 24-42.6(7), solids separators shall be serviced to function as designed and shall not be missing or have defective elements or components that reduce its ability to separate solids. All solids separators shall be visually inspected daily to prevent excessive accumulation and discharge of food solids to FOG control devices, building sanitary drains, building sewers, utility or non-utility owned or operated sanitary sewer systems, or onsite sewage treatment and disposal systems. Solids shall be properly discarded as solid waste or removed by a liquid waste transporter permitted by the Department.

6. Hydromechanical Grease Interceptors Traps. Cleaning of grease traps interceptors shall be performed as follows:

a. Automatic grease interceptors traps shall be cleaned by a liquid waste transporter, permitted by the Department, — Automatic grease traps shall be cleaned monthly or more frequently so that the FOG capacity limit or FOG sanitary

sewer discharge limitation and pretreatment effluent standards in Section 24-42.4 are not exceeded. The contents of the strainer/screen and automatic storage receptacles shall be emptied by the FOG generator or FOG control device operator on a daily basis and transferred to waste containers intended and approved for such use to prevent overflowing or spills. If at any time the automatic elements or components do not function as intended and designed, the malfunctioning automatic grease interceptor trap shall be operated and reported as a manual grease interceptor trap and cleaned by a liquid waste transporter, permitted by the Department, on a daily basis until the system is repaired. In no instance shall the automatic grease interceptor trap operate as a manual grease interceptor trap for more than thirty (30) days or be allowed to cause a sanitary nuisance at any time. In the event of a sanitary nuisance, such conditions shall be abated within twenty-four (24) hours pursuant to Section 24-28. The automatic grease interceptor trap shall be repaired within thirty (30) days of malfunctioning. If the automatic grease interceptor trap is not capable of repair, it shall be replaced within ninety (90) days of malfunctioning. Plans for replacement shall be reviewed and approved by the Director or Director's designee pursuant to Section 24-42.6(7).

- b. Manual grease interceptor traps shall be cleaned monthly by a liquid waste transporter permitted by the Department or more frequently when necessary to avoid exceeding the FOG capacity limit or effluent standards in Section 24-42.4. The FOG generator or FOG control device operator shall may remove floating materials and settled solids on a regular daily basis, between cleaning intervals performed by a liquid waste transporter, and may transfer the waste to containers intended and approved for such use to prevent overflowing or spills.

1443 c. Alternative cleaning frequencies, not to exceed
1444 90 days, may be approved by the Director or
1445 Director's designee based on a complete
1446 engineering analysis, pursuant to Section 24-
1447 42.6(8), or the results of a field study approved
1448 by the Director or Director's designee that
1449 demonstrates that less frequent cleaning is
1450 appropriate and will not result in an exceedance
1451 of the FOG sanitary sewer discharge limitation
1452 and pretreatment standards referenced in
1453 Section 24-42.4.

1454
1455 d. Exception: A FOG generator that does not have
1456 fryers; is not required by the Florida Building
1457 Code Mechanical (latest addition) to have a
1458 Type I kitchen exhaust hood; the ~~peak flow rate~~
1459 ~~to the grease interceptor-trap~~ is rated ~~at does~~
1460 ~~not exceed~~ twenty (20) gallons per minute ~~or~~
1461 ~~less~~, and cleans the grease ~~interceptor-trap~~ daily
1462 is not required to have a liquid waste transporter
1463 clean the grease ~~interceptor as required above in~~
1464 ~~Section 24-42.6(10)(d)(ii)(6)-trap~~ monthly if the
1465 FOG generator does not discharge FOG or food
1466 waste in quantities ~~or concentrations~~ which
1467 affects negatively or hinders the operation of
1468 any onsite sewage treatment and disposal
1469 system, sewage collection, transmission or
1470 treatment system, ~~or exceeds FOG sanitary~~
1471 ~~sewer discharge limitation and pretreatment~~
1472 ~~standards in Section 24-42.4,~~ or causes a
1473 sanitary nuisance.

1474
1475 7. Gravity Grease Interceptors. Cleaning of gravity grease
1476 interceptors shall be performed as follows:

1477
1478 a. Gravity grease interceptors ~~shall be~~ shall be
1479 cleaned every sixty (60) days by a liquid waste
1480 transporter permitted by the Department or more
1481 frequently when necessary to avoid exceeding
1482 the FOG capacity limit or FOG sanitary sewer
1483 discharge limitation and pretreatment effluent
1484 standards in Section 24-42.4.

1485
1486 b. Single and grouped gravity grease interceptors
1487 equipped with a functional Interceptor
1488 Monitoring Device shall ~~all~~ be cleaned by a

liquid waste transporter permitted by the Department at an interval not to exceed every one hundred eighty (180) days, by a liquid waste transporter permitted by the Department or more frequently when necessary to avoid exceeding the FOG capacity limit, or FOG sanitary sewer discharge limitation and pretreatment effluent standards in Section 24-42.4.

e. Grouped grease interceptors, in parallel or series, shall all be cleaned every sixty (60) days by a liquid waste transporter permitted by the Department or more frequently when necessary to avoid exceeding the FOG capacity limit or effluent standards in Section 24-42.4. Where functional Interceptor Monitoring Devices are used, all grease interceptors shall be cleaned every one hundred eighty (180) days by a liquid waste transporter permitted by the Department or more frequently when necessary to avoid exceeding the FOG capacity limit or effluent standards in Section 24-42.4

c. Alternative cleaning frequencies may be approved pursuant to Section 24-42.6(9)(d)(ii)6.c.

8. FOG Control Devices not classified by the Director or Director's designee as hydromechanical or gravity grease interceptors: FOG control devices shall be cleaned pursuant Section 24-42.6(9)(d)(ii)6.

(iii) Record Keeping. Each FOG generator and FOG control device operator shall maintain records of maintenance and repair activities, service calls and staff training. All records shall be retained onsite for a period of not less than three years and made available onsite to Department staff upon request. Offsite records shall not be an acceptable substitute for onsite records required herein. At a minimum, each FOG generator and FOG control device operator shall maintain the following records using forms prescribed by the Director or Director's designee.

1. Scheduled and unscheduled service calls to clean grease waste drains, building sanitary drains, or building sewers.
2. Repairs required resulting from food or FOG accumulation or blockages.
3. Kitchen exhaust hood cleaning.
4. FOG control device cleaning, maintenance and repair.
5. Waste manifest forms pursuant to Sections 24-42.6(9)(c)(v) and 24-46.
6. Staff training records pursuant to Section 24-42.6(9)(c)(iv).

(iv) Training Requirements. Each FOG generator and FOG control device operator~~s~~ shall maintain trained staff to ensure compliance with the requirements of Section 24-42.6(9). The content and form of training shall be prescribed by the Director or Director's designee. Training shall include orientation of new employees and quarterly training of existing employees. On or before January 1, 2019, each FOG generator and FOG control device operator shall have one (1) trained person on staff which has working knowledge of the following where applicable:

1. Kitchen exhaust hoods,
2. Solids separators.
3. FOG control devices.
4. Best management practices.
5. Yellow and brown grease storage.
6. Mat and equipment wash-down areas.
7. Record keeping and reporting.

(v) Reporting. Each FOG generator and FOG control device operator shall submit ~~monthly~~ reports to the Department using forms prescribed by the Director or Director's designee pursuant to maintenance schedules in Section 24-

1579 42.6(10)(d)(ii). Where made available by the Department,
1580 reporting shall be completed using a secure online system or by
1581 an equivalent system developed by the Department. Monthly
1582 Reports shall include ~~total volume of each waste stream~~
1583 ~~disposed, transported or collected,~~ the date and the name of
1584 liquid waste transporter.

1585
1586 (vi) Closure Requirements. No more than thirty (30) days after a
1587 FOG generator closes, the property owner shall notify the
1588 Department to perform a closure inspection. On or before the
1589 closure inspection, the property owner shall have all yellow
1590 and brown grease containers and bins emptied, storage areas
1591 cleaned and FOG control devices cleaned. Decanting,
1592 skimming, or backflushing is prohibited. Emulsifiers, grease
1593 cutters or other chemicals and detergents which could cause
1594 FOG to pass through the system to the drain lines are
1595 prohibited and shall not be used. All waste shall be disposed at
1596 a permitted facility, using an approved liquid waste transporter
1597 with manifests submitted to ~~the~~ Department.

1598
1599 (e) Existing FOG generators with a current FOG operating permit, issued
1600 prior to (CLERK TO INSERT EFFECTIVE DATE), proposing to
1601 increase seating capacity, dining area or drive-thru capacity, or other
1602 modification, any of which will increase the discharge of FOG, shall
1603 comply with Sections 24-42.6(6)(a)(i), (ii) and (iii), and 24-42.6(9)(c).

1604
1605 (f) FOG generators discharging to an onsite sewage treatment and
1606 disposal system located in ~~the basic~~ a wellfield protection area of any
1607 utility potable water supply wells, proposing to increase seating
1608 capacity, dining area or drive-thru capacity, or other modification, any
1609 of which will increase the discharge of FOG, shall comply with
1610 Sections 24-42.6(6)(b), and 24-42.6(9)(c).

1611
1612 (g) FOG generators discharging to an onsite sewage treatment and
1613 disposal system located in ~~the basic~~ a wellfield protection area of any
1614 utility potable water supply wells, not proposing to increase seating
1615 capacity, dining area or drive-thru capacity, or other modification, any
1616 of which will increase the discharge of FOG, shall apply for an
1617 operating permit ~~by January 1, 2018~~ pursuant to Section 24-42.6(5).

1618
1619 (h) Any FOG operating permit approved and issued by the Department
1620 may be revoked for failure to comply with permit conditions or
1621 conditions established in Section 24-42.6. Cause for revoking an
1622 operating permit may include, but not be limited to, the following:
1623

- 1624 (i) Falsifying information on any record or document required by
1625 the county; or
- 1626
- 1627 (ii) Failure to have a FOG control device cleaned properly or in a
1628 timely manner as described in Section 24-42.6(9); or
- 1629
- 1630 (iii) Having a FOG control device cleaned by a person not
1631 permitted by the Department to perform such cleaning; or
- 1632
- 1633 (iv) Utilizing a liquid waste transporter not permitted by the
1634 Department; or
- 1635
- 1636 (v) Failure to comply with any permit condition; or
- 1637
- 1638 (vi) Violation of any federal, state, or local regulation governing
1639 the handling of FOG wastes; or
- 1640
- 1641 (vii) Failure to pay invoices, fees, fines, judgments or liens owed to
1642 the county.
- 1643
- 1644 (viii) The revocation of an operating permit shall be in addition to
1645 any penalties assessed for violation of this Chapter, or provided
1646 elsewhere in the Code of Miami-Dade County.
- 1647

1648 (11) FOG Liquid Waste Transporters. Notwithstanding any provision of
1649 this Code, no person shall collect, pump, transport, or cause, let, permit, suffer or
1650 allow any FOG, yellow grease, brown grease or black grease to be collected,
1651 pumped or transported without a valid operating permit issued by the Department
1652 pursuant to Sections 24-18, ~~24-42.6(8)~~ and 24-46. In addition to the requirements
1653 enumerated in Section 24-46, FOG liquid waste transporters shall comply with the
1654 following:

- 1655
- 1656 (a) All waste transported and FOG control device condition assessments
1657 shall be manifested using forms prescribed by the Director or
1658 Director's designee and ~~Where made available by the Department,~~
1659 ~~reporting shall be completed using a secure online system or by an~~
1660 ~~equivalent system developed by the Department. Reporting shall be~~
1661 ~~completed no later than 20 days after the end of the month during~~
1662 ~~which cleaning was performed.~~
- 1663
- 1664 (b) FOG, yellow grease, ~~black grease~~ and brown grease shall only be
1665 stored or disposed at private or public facilities approved by the
1666 Department.
- 1667
- 1668 (c) FOG control device cleaning shall include completely removing the
1669 full contents of the FOG control device, including settled solids,

1670 wastewater and floating materials, pressure washing or scraping side
1671 walls, baffle walls, cross-pipes, and inlet and outlet pipes to remove all
1672 attached materials. Decanting, skimming, or backflushing is
1673 prohibited. Emulsifiers, grease cutters or other chemicals and
1674 detergents which could cause FOG to pass through the system to the
1675 building sanitary drains or building sewers are prohibited and shall not
1676 be used.

1677
1678 (d) Effective January 12, 2017~~9~~, liquid waste transporter staff shall be
1679 trained to ensure compliance with the requirements of Section 24-
1680 42.6(9)(c)(ii) and 24-42.6(10)(c). The content and form of training
1681 shall be prescribed by the Director or Director's designee. At a
1682 minimum, one trained staff member shall be present while ~~grease traps~~
1683 or ~~grease interceptors~~ FOG control devices are being cleaned. Staff
1684 performing assessments of the condition of any system or part thereof
1685 (condition assessments) stipulated in Section 24-42.6(10) shall be
1686 trained in accordance with this Section.

1687
1688 (e) ~~Effective January 2, 2017, s~~ Septage or other waste shall not be
1689 commingled with yellow or brown grease.

1690
1691 ~~(f) Effective January 2, 2017, where made available by the~~
1692 ~~Department, waste manifesting shall be completed using a secure~~
1693 ~~online system or by equivalent system developed by the Department.~~

1694
1695 (f) ~~Effective January 2, 2017, l~~ Liquid waste transporters shall perform
1696 FOG control device condition assessments when cleaning is required
1697 pursuant to Section 24-42.6(9)(c)(ii). The condition assessment shall
1698 be performed and reported ~~using forms prescribed by the Director or~~
1699 ~~Director's designee, including the online forms pursuant to Section 24-~~
1700 ~~42.6(10)(a) where made available by the Department.~~ At a minimum,
1701 the condition assessment shall document the following:

1702
1703 (i) The water level and thickness of floating FOG and settled
1704 solids prior to cleaning.

1705
1706 1. Where FOG control devices are installed below ground
1707 and the water level prior to cleaning is below the invert
1708 of the outlet pipe, or groundwater infiltration is
1709 observed during or after cleaning, the condition
1710 assessment shall document leaks.

1711
1712 2. Where FOG control devices are installed above ground
1713 and leaks are observed, the condition assessment shall
1714 document leaks.

~~3. All leaks shall be reported to the Department within twenty four (24) hours of being detected or observed and the FOG control device repaired within forty eight (48) hours. Until the FOG control device is repaired, the FOG control device shall not receive any flow or be bypassed.~~

3. Should a leak cause a sanitary nuisance, the sanitary nuisance shall be removed, abated or corrected within twenty-four (24) hours or such other reasonable time as the Director or the Director's designee may determine.

(ii) Integrity of solids separators and FOG control devices, including the inlet and outlet appurtenances; interior, bottom, top, side walls, baffle walls, and cross-pipes; manhole rings, extenders and covers; sampling points and cleanouts; interceptor monitoring alarms and devices; and other elements and equipment approved by the Department.

~~Where a solids separator or FOG control device is observed to be malfunctioning so that solids or FOG are being discharged to the building sanitary drains or building sewers, the Department shall be notified.~~

~~In no instance shall the unpermitted discharge be permitted to continue or result in a building sanitary drain or building sanitary drain back up or a sanitary nuisance.~~

~~(iii) All repairs performed by the liquid waste transporter.~~

(iii*) The condition of yellow and brown grease containers and bins.

(12) FOG Disposal Facilities. All facilities accepting, storing, transferring or treating FOG, yellow grease or brown grease shall obtain an operating permit pursuant to Section 24-18(A)(23) and comply with the following:

(a) Maintain trained staff to assure compliance with the requirements of Section 24-42.6. The content and form of training shall be prescribed by the Director or Director's designee. Training shall be completed prior to permit renewal starting January 1, 2019. At a minimum, one (1) trained staff member shall be present during maintenance and repair of the system and/or system components.

(b) Submit monthly reports to the Department using forms prescribed by the Director or Director's designee. Where made available by the

1762 Department, reporting shall be completed using a secure online system
1763 or by an equivalent system developed by the Department. Monthly
1764 reports shall include total volume of each waste stream accepted,
1765 collected, stored, treated, disposed, or transported and include waste
1766 manifests for all waste transported. Waste manifests shall track waste
1767 from the point of origin to the final disposal facility.

1768
1769 (13) Utilities. Utilities shall submit a monthly report to the Department that
1770 includes the following minimum information:

1771
1772 (a) A list with dates and locations where accelerated FOG maintenance
1773 was performed to prevent a sanitary sewer overflow. Locations shall
1774 also be identified in a geographical information system (GIS) format
1775 based on the utilities atlas pursuant to Section 24-42.2.

1776
1777 (b) A description of accelerated FOG maintenance performed, including
1778 quantities of waste FOG removed, recovered, collected or treated to
1779 prevent a sanitary sewer overflow. The information shall be provided
1780 in test and GIS form.

1781
1782 (c) Cost of accelerated FOG maintenance, including labor, equipment and
1783 materials. Labor shall include field and office staff.<<
